### **A. Accounting Policies**

The financial statements of Oscar Insurance Corporation of Ohio ("The Company") are present on the bases of accounting practices prescribed or permitted by the Ohio Department of Insurance (ODI).

The ODI recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The state has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

### **B. Use of Estimates in the Preparation of the Financial Statements**

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

### **C. Accounting Policy**

Premiums are earned ratably over the terms of the related insurance policies. Ceded premiums are earned ratably over the terms of the applicable reinsurance contracts. Expense incurred in connection with acquiring new insurance business, including acquisition cost such as marketing are charged to operations as incurred.

In addition, The Company used the following accounting policies:

- (1) Short-term investments are stated at amortized cost
- (2) Bonds not backed by other loans are stated at amortized costs using the interest method
- (3-9) Not applicable
- (10) The Company does not anticipate investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 54, Individual and Group Accident and Health Contracts.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from prior period.

## **20. Fair Value Measurements**

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 - Quoted (unadjusted) prices for identical assets in active markets.

Level 2 - Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 - Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds, short-term investment and cash equivalents are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service ("pricing service"), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest-level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

**22. Events Subsequent**

Type I – Recognized Subsequent Events:

## **Notes to Financial Statement**

There have been no Type I events. Subsequent Events have been considered through November 15, 2021 for the statutory quarterly 2021 statements issued on November 15, 2021.

### Type II – Unrecognized Subsequent Events:

There have been no Type II events. Subsequent Events have been considered through November 15, 2021 for the statutory quarterly 2021 statements issued on November 15, 2021.

On January 1, 2021, the Company was subject to an annual fee under Section 9010 of the federal Affordable Care Act (ACA). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity's net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity's portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of September 30, 2021, the Company has written health insurance subject to the ACA assessment, expects to conduct health insurance business in 2021 and estimates their portion of the annual health insurance industry fee to be payable on September 30, 2021 to be \$0. This amount is reflected in special surplus. This assessment is expected to impact risk based capital (RBC) by 0%. Reporting the ACA assessment as of September 30, 2021 would not have triggered an RBC action level.

In December 2019, the Further Consolidated Appropriations Act was enacted which repealed the annual fee on health insurance providers applying to calendar years beginning after December 31, 2020 (fee years after the 2020 fee year). Accordingly, there is no amount reflected in the Company's current year aggregate write-ins for special surplus funds related to this payable as of September 30, 2021 (for fee year 2021). There was also no resulting impact to the Company's RBC to assess as of December 31, 2021 as a result of this repeal.
