Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of Safe Auto Value Insurance Company ("the Company") have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Department of the State of Ohio. The Insurance Department of the State of Ohio recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts in these financial statements and notes. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums written are deferred and earned pro rata over the terms of the related insurance policies. Depending on the state, policy fees are either recognized in premiums earned on the effective date of the respective insurance policy or over the term of the policy.

Unearned premium reserves represent the portion of premiums written that are applicable to the unexpired terms of the policies in-force, and are determined on a daily pro rata basis.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as advertising, premium taxes and sales commissions, are charged to operations as incurred. The Company has not modified its capitalization policy from the prior period.

Net investment income earned consists primarily of interest, dividends and rental income less investment related expenses. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed or otherwise disposed, and include write-downs for impairments considered to be other-than-temporary.

In addition, the company uses the following accounting policies:

- (1) Short-term investments - No Significant Changes
- (2) Bonds not backed by other loans that are designated highest-quality and high-quality (NAIC designations 1 and 2, respectively) are reported at amortized cost, using the interest method. All other bonds (NAIC designations 3 to 6) are reported at the lower of amortized cost or fair value.
- (3) Common stocks - None
- (4) Preferred stocks - None
- (5) Mortgage loans - None
- (6) Loan-backed securities are reported at either amortized cost using the interest method or, if non-investment grade, at the lower of amortized cost, fair value or at the present value of future cash flows. The retrospective adjustment method is used to value all securities, except for interest only securities, where the yield had become negative, that are valued using the prospective method.
- (7) Investments in subsidiaries, controlled and affiliated entities - None
- (8) Investments in joint ventures, partnerships and limited liability companies - None
- (9) Derivatives - None
- (10) The Company does utilize anticipated investment income as a factor in the premium deficiency calculation.
- (11) Unpaid losses and loss adjustment expenses ("LAE") include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12) Changes in capitalization policy - None

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

(13) Pharmaceutical rebate receivables - None

D. Going Concern - Not Applicable

2. Accounting Changes and Corrections of Errors - No Significant Changes

3. Business Combinations and Goodwill - None

4. Discontinued Operations - None

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans - None

B. Debt Restructuring - None

C. Reverse Mortgages - None

D. Loan-Backed Securities

(1) Prepayment assumptions for Agency Mortgage-Backed Securities and Collateralized Mortgage Obligations were generated using a third-party prepayment model. The multi-factor model captures house price change trends, housing turnover, borrower default, and refinance incentive, among other factors. On an ongoing basis, we monitor the rate of prepayment and calibrate the model to reflect actual experience, market factors, and viewpoint.

(2) Loan-backed and structured securities with a recognized other-than-temporary impairment (OTTI) - None

14. Liabilities, Contingencies and Assessments (Continued)

G. All Other Contingencies

The Company could, from time to time and in the ordinary course of business, be faced with class action lawsuits, regulatory proceedings, and individual lawsuits that are not directly related to its insurance contracts. There are no current lawsuits directed against the Company, however the Company also has, on a net basis, potential exposure to relating lawsuits due to its participation in a pooling reinsurance agreement for which it is allocated litigation expenses. (See Note 26).

In accordance with applicable accounting principles, the Company establishes reserves for those matters as to which it has determined that it is probable a loss has been incurred and a reasonable estimate of the Company's potential exposure can be established. Likewise, the Company does not establish reserves for those matters where the loss is not probable and/or it currently is unable to estimate the Company's potential exposure.

20. Fair Value Measurements

A. Fair Value Measurement

Inputs Used for Assets and Liabilities Measured at Fair Value

The Company financial assets carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by ASC 820 Fair Value Measurements and Disclosures. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset or a liability classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are defined as follows:

- Level 1 Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.
- Level 2 Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.
- Level 3 Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.
- Level NAV (net asset value): Under certain conditions, as described in the NAIC SSAP No. 100R (Fair Value Measurement), NAV may be utilized as an expedient to fair value.

(1) Fair value measurements at reporting date

Assets recorded on the financial statements at fair value measurements by accounting hierarchy levels 1, 2, 3 and level NAV. The Company has categorized its assets that are measured at fair value into the three-level fair value hierarchy as reflected in the following table. The Company had no liabilities recorded at fair value.

Description for each class of asset or liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at fair value					
Cash Equivalent-Exempt Money Market Mutual Funds.....	\$..... 3,373,660	\$.....	\$.....	\$.....	\$..... 3,373,660
Total assets at fair value/NAV.....	<u>\$ 3,373,660</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$ 3,373,660</u>
b. Liabilities at fair value					
Total liabilities at fair value.....	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>	<u>\$</u>

(2) Fair value measurements in Level 3 of the fair value hierarchy - None

- (3) At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.
- (4) Fair value measurements for fixed income and equity securities are based on values either published by the NAIC's Security Valuation Office (SVO) or from an independent pricing service vendor. Under certain circumstances, if neither an SVO price nor a Vendor price is available, a price may be obtained from a broker. Short term securities and cash equivalents are valued at amortized cost.

When published prices from the SVO are not available, the Company relies predominately on independent pricing service vendors that have been evaluated and approved by our investment management company's internal pricing policy committee. Generally, pricing service vendors use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation.

Certain investments are carried at fair value, while others may periodically be carried at fair value based on certain factors such as the NAIC's lower of cost or market rule or an impairment. Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor's evaluation process is used by the Company to determine the appropriate fair value hierarchy. Documentation from each pricing vendor is reviewed and monitored periodically to ensure they are consistent with the Company's pricing policy. Market Information obtained from brokers with respect to security valuations is also considered in the pricing hierarchy.

Notes to the Financial Statements

25. Changes in Incurred Losses and Loss Adjustment Expenses

A. Reasons for Changes in the Provision for Incurred Loss and Loss Adjustment Expenses Attributable to Insured Events of Prior Years

Current year changes in estimates of costs of prior year losses and loss adjustment expenses (LAE) affect the current year Statement of Income. Increases in those estimates increase current year expense and are referred to as unfavorable development. Decreases in those estimates decrease current year expense and are referred to as favorable development. Current year losses and LAE of \$6,979,957 were lower by \$658,456 because of favorable development of prior year estimates. This favorable development was approximately 11.2% of the prior years' reserves for unpaid losses and LAE.

The decrease in prior years' estimates is a result of ongoing analysis of recent loss and expense trends. The Company decreased its estimate of ultimate losses for prior accident years by \$636,437 and decreased its estimate of ultimate LAE for prior accident years by \$22,019. This favorable development of losses is primarily a result of lower than expected frequency for material damage claims. Favorable LAE development in the period is due to lower than expected costs for defense of claims.

B. Significant Changes in Methodologies and Assumptions Used in Calculating the Liability for Unpaid Losses and Loss Adjustment Expenses

The Company does not issue retrospectively rated policies.

26. Intercompany Pooling Arrangements

The Company (Safe Auto Value Insurance Company) is a member of an intercompany pooling agreement. The effect of the pooling agreement is to transfer all insurance business of the participating companies to the lead Company. The lead Company cedes the pooled business as illustrated below.
