B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect reported amounts of assets and liabilities. It also requires disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received.

Expenses incurred in connection with acquiring new insurance business , including acquisition costs such as sales commissions are charged to operations as incurred.

The amount of dividends to be paid to policyholders is determined annually by the Union's board of directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity and expense experience for the year and judgement as to the appropriate level of statutory surplus to be retained by the Union.
