19. Fair Value Measurements

HealthSpan has no nonfinancial assets or liabilities that are required to be measured and reported at fair value on a recurring basis. Fair value is defined as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. HealthSpan's financial assets carried at fair value have been classified, for disclosure purposes, based on a hierarchy that prioritizes inputs to valuation techniques used to measure fair value into three levels.

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 – Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices

Statements

from those willing to trade in markets that are not active, or other inputs that are observable or can

Ended December 31, 2020

be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads, and yield curves.

- Level 3 – Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement.

Investments, as discussed in the Investments note, are reported at lower of amortized cost or fair value, with impairment recorded if amortized cost is greater than fair value. The fair values of investments are based on quoted market prices, if available, or estimated using quoted market prices for similar investments. If listed prices or quotes are not available, fair value is based upon other observable inputs or models that primarily use market-based or independently sourced market parameters as inputs. In addition to market information, models also incorporate transaction details such as maturity. Fair value adjustments, including credit, liquidity, and other factors are included, as appropriate, to arrive at a fair value measurement.

21. Reinsurance

HealthSpan did not write any insurance business or cover lives during 2020 or 2020. Therefore, HealthSpan had no reinsurance.

22. Retrospectively Rated Contracts

The ACA established risk sharing programs, known as risk adjustment, reinsurance, and risk corridors, to protect health insurers against the incurrence of high claims which may occur as a result of the guarantee issue rules of the ACA. Two of the programs, reinsurance and risk corridors, were temporary and concluded in 2016. The risk adjustment program is permanent.

The risk adjustment program shifts risk by transferring funds to individual and small group plans that report high risk based on the demographic factors and health status of each member as derived from current year medical diagnosis as reported throughout the year. This program transfers funds from lower risk plans to higher risk plans within similar plans in the same state. Under the risk adjustment program, a risk score is assigned to each covered member to determine an average risk score at the individual and small group level by legal entity in a particular market in a state. Additionally, an average risk score is determined for the entire subject population for each market in each state. Settlements are determined on a net basis by legal entity and state. Each health insurance issuer's average risk score is compared to the state's average risk score. Plans with an average risk score below the state average will pay into a pool, and health insurance issuers with an average risk score that is greater than the state average risk score will receive money from that pool. The Company's estimate of amounts receivable and/or payable under the risk adjustment program is based on our estimate of both our own and the state average risk scores.

The risk corridor program limits issuer gains and losses for qualified health plans in the individual and small markets by comparing allowable medical costs to a target amount, each defined/prescribed by Department of Health and Human Services (HHS), and sharing the risk for allowable costs with the federal government. Allowable medical costs are adjusted for risk adjustment settlements, transitional reinsurance recoveries, and cost sharing reductions received from HHS. Variances from the target exceeding certain thresholds may result in HHS making additional payments to HealthSpan or require HealthSpan to refund HHS a portion of the premiums we received. HHS guidance provides that risk corridor collections over the life of the three year program will first be applied to any shortfalls from previous benefit years before application to current year obligations.

24. Retrospectively Rated Contracts (Continued)

On December 21, 2020, HealthSpan Integrated Care received \$25M in funds resulting from the settlement of a class action lawsuit related to unpaid Risk Corridor receivables. The amount received was reported as Other Revenue for the year ended December 31, 2020 net of a 5% reduction for attorney and other fees. A schedule reflecting the final amounts due and collected is depicted in the Risk Corridor table below.

During 2017, HealthSpan recognized \$0 thousand and collected \$1.8 million in income related to the 2014 Risk Corridor receivable. No receivable from 2015 or 2016 was reflected in the financial statements as the program was not funded and management has determined that the collectability is uncertain. Additionally, the NAIC's position on the risk corridor required that any receivable recorded be non-admitted on the statutory-basis financial statements. As of September 30, 2021, the 2014, 2015 and 2016 receivables were fully settled.

The reinsurance program requires HealthSpan to make reinsurance contributions for calendar years 2014 through 2016 to HHS based on a national contribution rate per covered member as determined by HHS. While all commercial medical plans, including self-funded plans, are required to fund the reinsurance entity, only fully-insured non-grandfathered plans compliant with the ACA in the individual commercial market will be eligible for recoveries if individual claims exceed a specified threshold.

For individual members, who may incur high claim costs eligible for reimbursement, the ACA reinsurance program is accounted for as reinsurance. Accordingly, plan contributions are recorded as premium reductions and recoveries are recorded as a reduction of claim expense. For group members, the ACA reinsurance program is accounted for as an assessment because claims incurred for group members are not eligible for recovery under the program.
