Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of Gateway Health Plan of Ohio, Inc. ("GHPOI") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("the Department"). The Department recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Ohio insurance law and regulations. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual, ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Ohio.

A reconciliation of GHPOI's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Accounting policies that materially affect assets, liabilities, capital and surplus or results of operations include:

Effective January 1, 2020, GHPOI no longer offers Medicare Advantage plans in the states of OH, KY, and NC. As of January 1, 2020, there is no membership. GHPOI continued to process run-out of claims during 2021. Through December 31, 2019, GHPOI provided Medicare managed care services under contract with the Centers for Medicare and Medicaid Services (CMS). GHPOI's revenue recognized during 2020 and 2021 are prior year adjustments based on per capita amounts as previously contracted between GHPOI and CMS through December 31, 2019. Expenses recognized during 2020 and 2021 are prior year adjustments related to services performed on or prior to December 31, 2019.

In addition, GHPOI uses the following accounting policies:

- (1) GHPOI does not hold any short-term investments.
- (2) GHPOI does not hold Mandatory Convertible securities and SVO Identified investments. Bonds are stated at amortized cost using the scientific interest method.
- (3) GHPOI does not hold common stocks.
- (4) GHPOI does not hold preferred stocks.
- (5) GHPOI does not hold any mortgage loans on real estate.
- (6) GHPOI does not hold any loan-backed securities.
- (7) GHPOI does not hold any investments in subsidiaries, controlled or affiliated investments.
- (8) GHPOI does not hold any investments in joint ventures, partnerships and limited liability companies.
- (9) GHPOI does not hold any derivatives instruments.
- (10) Investment Income is not considered a factor in the premium deficiency calculation, in accordance with SSAP No. 54, Individual and Group Accident and Health Contracts.
- (11) Medical and hospital costs are accrued based on claims received but unpaid and an estimate for claims incurred but not yet received (IBNR). These estimates are projected through an actuarial model, which calculates the outstanding liability based on the payment trends and membership. Milliman USA serves as GHPOI's external actuarial firm and completes quarterly and annual certifications of claims liability in conformity with the various Ohio state departments. Claims adjustment expenses are paid by GHPOI's parent, Gateway Health Plan, LLC ("GHLCC") as part of the services fee but are shown separately on the Annual Statement for consistency and presentation of all claim related items.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company's pharmaceutical rebate receivables are estimated based on historical rebates received per member per month (PMPM) and current volume. The majority of rebates are billed or confirmed within 90 days at the end of each quarter. The rebates are then paid in the accordance with contract terms with each manufacturer.

D. Going Concern

Management has evaluated the Company's ability to continue as a going concern. There is no substantial doubt in its ability to continue as a going concern.

F. Consolidated Federal Income Tax Return

The Corporation is not included in a consolidated federal income tax return with any other entities.

G. Federal or Foreign Income Tax Loss Contingencies

The Corporation does not anticipate that any significant increase or decrease to unrecognized tax benefits will be recorded in 2022.

SSAP 101 provides that deferred tax assets ("DTA's") are reduced by a statutory valuation allowance if, based on the weight of all available evidence, it's more likely than not that some or all of the DTA will not be realized. The Corporation considered all available evidence, both positive and negative, including projected future taxable income, tax planning strategies and recent core earnings from financial operations. Based on this evidence, a full valuation allowance was recognized against the Corporation's DTA's. Management will continue to monitor the Corporation's financial performance and assess the need for the valuation allowance in the future.

20. Fair Value Measurements

- A. Fair Value Measurement

The Level of the fair value hierarchy within which the fair value measurements are categorized in their entirety (Level 1, 2 or 3)

In accordance with SSAP No. 100, financial assets and liabilities recorded at fair value in the statements of assets, liabilities, capital and surplus are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Input levels, as defined by NAIC SAP, are as follows:

- Level 1 – Pricing inputs are based on unadjusted quoted market prices for identical financial assets in active markets. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2 – Pricing inputs are based on other than quoted prices in active markets included in Level 1 that are observable unadjusted quoted market prices for similar financial assets or liabilities in active markets or quoted market prices for identical assets in inactive markets.
- Level 3 – Pricing inputs include unobservable inputs that are supported by little or no market activity that reflect management's best estimate of what market participants would use in pricing the asset at the measurement date.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

(1) Fair value measurements at reporting date

Description for each class of asset or liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at fair value					
Total Cash Equivalents.....	\$ 4,018,891	\$	\$	\$	\$ 4,018,891
Total assets at fair value/NAV.....	\$ 4,018,891	\$	\$	\$	\$ 4,018,891
b. Liabilities at fair value					
Total liabilities at fair value.....	\$	\$	\$	\$	\$

(2) Fair value measurements in Level 3 of the fair value hierarchy - None

(3) GHPOI's policy for determining when transfers between levels are recognized is determined at the end of the reporting period

(4) The following methods and assumptions were used to determine the fair value of each class of the following assets and liabilities recorded at fair value in the statements of assets, liabilities, capital and surplus:

Bonds – Fair values are based on quoted market prices, where available. These fair values are obtained primarily from a third party pricing service, which generally uses Level 1 or Level 2 inputs for the determination of fair value to facilitate fair value measurements and disclosures. Level 2 securities primarily include corporate securities, securities from states, municipalities, and political subdivisions and mortgage-backed securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds.

Short-term securities – Short-term securities include securities with a maturity of less than one year but greater than 90 days at the date of purchase. Fair values of short-term securities are based on quoted market prices, where available. These fair values are obtained primarily from a third party pricing service, which generally use Level 1 or Level 2 inputs, for the determination of fair value to facilitate fair value measurements and disclosures. U.S. Government securities represent Level 1 securities, while Level 2 securities include corporate securities. Inputs that are often used in the valuation methodologies include, but are not limited to, broker quotes, benchmark yields, credit spreads, default rates, and prepayment speeds.

Cash and cash equivalents: Cash equivalents include exempt money market funds, commercial paper, and discount notes or securities with a maturity of 3 months or less. Cash equivalents are designated as Level 1 or Level 2, depending on structure and the extent of credit-related features.

GHPOI uses a third party pricing service to obtain quoted prices for each security. The third party service provides pricing based on recent trades of the specific security or like securities, as well as a variety of valuation methodologies for those securities where an observable market price may not exist. The third party service may derive pricing for Level 2 securities from market corroborated pricing, matrix pricing, and inputs such as yield curves and indices. Pricing for Level 3 securities may be obtained from investment managers for private placements or derived from discounted cash flows, or ratio analysis and price comparisons of similar companies. GHPOI performs an analysis of reasonableness of the prices received for fair value by monitoring month-to-month fluctuations and determining reasons for significant differences, selectively testing fair values against prices obtained from other sources, and comparing the combined fair value of a class of assets against an appropriate index benchmark. There were no adjustments to quoted market prices obtained from third party pricing services during the period ended December 31, 2021 that were material to the statutory financial statements.

Notes to the Financial Statements

25. Change in Incurred Claims and Claim Adjustment Expenses

A. Reasons for Changes in the Provision for Incurred Claim and Claim Adjustment Expenses Attributable to Insured Events of Prior Years

Reserves as of December 31, 2020 were \$1,871,438. As of December 31, 2021, \$860,880 has been paid for incurred claims and claims adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$30,532 as a result of re-estimation of unpaid and claim adjustment expenses. Therefore there has been a \$980,026 favorable prior-year development since December 31, 2020 and December 31, 2021. These changes are generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.

B. Significant Changes in Methodologies and Assumptions Used in Calculating the Liability for Unpaid Claims and Claim Adjustment Expenses

There were no significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses.
