Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory financial statements of Scottsdale Indemnity Company (the Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Department of Insurance recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance law. The NAIC's *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio. The Company has no statutory accounting practices that differ from NAIC SAP.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

**Federal Income Taxes.** The Company's parent, Nationwide Mutual Insurance Company (Mutual), files a consolidated federal income tax return, which includes all eligible U.S. subsidiaries and affiliates. In this regard, the included subsidiaries and affiliates pay to Mutual the amount which would have been payable on a separate return basis without regard to the alternative minimum tax. Mutual pays tax due on a consolidated basis.

The Company provides for federal income taxes based on amounts the Company believes it will ultimately owe. Inherent in the provision for federal income taxes are estimates regarding the deductibility of certain items and the realization of certain tax credits. In the event the ultimate deductibility of certain items or the realization of certain tax credits differs from estimates, the Company may be required to change the provision for federal income taxes recorded in the financial statements, which could be significant. Management has used best estimates to establish reserves based on current facts and circumstances regarding tax exposure items where the ultimate deductibility is open to interpretation.

In accordance with guidance specified in the NAIC SAP, the Company utilizes the asset and liability method of accounting for income taxes. Under this method, deferred tax assets (DTA), net of any non-admitted portion and statutory valuation allowance, and deferred tax liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. DTAs and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The change in deferred taxes, excluding the impact of taxes on unrealized capital gains or losses and nonadmitted deferred taxes, is charged directly to surplus.

**Reinsurance Recoverables.** The Company cedes insurance to other companies in order to limit potential losses and diversify its exposure. Such agreements do not relieve the Company of its primary obligation to the policyholder in the event the reinsurer is unable to meet the obligations it has assumed. The Company monitors the financial condition of reinsurers on an ongoing basis and reviews its reinsurance agreements regularly in an attempt to minimize its exposure to significant losses from reinsurer insolvencies. Reinsurance recoverables include amounts billed to reinsurers on losses paid. Estimates of amounts expected to be recovered from reinsurers that have not yet been paid on losses are estimated in a manner consistent with the claim liability associated with the underlying policy. Such reinsurance recoverables and reserve deductions partially offset claim costs in the Company's statutory statements of operations and are included as an offset to losses and loss expense reserves in the accompanying statutory statements of admitted assets, liabilities and surplus. There were no contracts using deposit accounting as of December 31, 2021 and 2020.

Statutory accounting principles require recognition of a minimum liability for certain unsecured or overdue reinsurance recoverables. As of December 31, 2021 and 2020, the Company had no provision related to conditional reinsurance recoverables.

In addition, the Company uses the following accounting policies:

- Short-term investments consist of investments with maturities of twelve months or less at acquisition and are stated at amortized cost, which approximates fair value.
- Bonds, excluding loan-backed and structured securities, are stated at amortized cost except those with an NAIC designation of "3" through "6", which are stated at the lower of amortized cost or fair value. Amortization of premiums and discounts is calculated using the effective yield method. The Company does not hold any mandatory convertible securities or SVO-identified investments.
- Unaffiliated common stocks are reported at fair value.
- Redeemable preferred stocks are stated at amortized cost, except those with an NAIC designation of "3" through "6", which are stated at the lower of amortized cost or fair value. Perpetual preferred stocks are stated at fair value, except those with an NAIC designation of "3" through "6", which are stated at the lower of amortized cost or fair value.
- Mortgage loans are carried at the unpaid principal balance adjusted for premiums and discounts, less a valuation allowance. The valuation allowance for mortgage loans reflects management's best estimate of probable credit losses.

NOTES TO THE FINANCIAL STATEMENTS

6.

Loan-backed and structured securities (collectively, loan-backed securities) are stated at amortized cost or the lower of amortized cost or fair value in accordance with the provisions of Statement of Statutory Accounting Principles (SSAP) No. 43-Revised and the Purposes and Procedures Manual of the NAIC Securities Valuation Office. The retrospective adjustment method is used to value loan-backed securities where the collection of all contractual cash flows is probable. For all other loan-backed securities, the Company uses the prospective adjustment method. Refer to Note 5(D) for a discussion of the other-than-temporary impairment policy for loan-backed securities.
7.

Not applicable – The Company does not have any subsidiaries.
8.

Other invested assets consist primarily of alternative investments in hedge funds, private equity funds, private and emerging market debt funds, tax credit funds and real estate partnerships. Except for investments in certain tax credit funds, these investments are recorded using the equity method of accounting. Changes in carrying value as a result of the equity method are reflected as net unrealized capital gains and losses as a direct adjustment to surplus. Gains and losses are generally recognized through income at the time of disposal or when operating distributions are received. Partnership interests in tax credit funds are held at amortized cost with amortization charged to investment income over the period in which the tax benefits, primarily credits, are utilized.
9.

Not applicable – The Company does not have derivatives.
10.

Insurance premiums are generally earned ratably over the policy term. The liability for unearned premiums represents the portion of premiums written relating to the unexpired terms of coverage. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed. Premiums in course of collection represent agent balances and uncollected premiums from policyholders for current policies in force and policy premiums assumed from others, including amounts placed with affiliates. As of December 31, 2021 and 2020, the Company had no liabilities related to premium deficiency reserves. The Company includes anticipated investment income when calculating its premium deficiency reserves, in accordance with SSAP No. 53, Property-Casualty Contracts – Premiums.
11.

The Company establishes losses and loss expense reserves for reported claims and claims incurred but not yet reported (IBNR). Estimating the liability for losses and loss expense reserves involves significant judgment and multiple assumptions. Management considers the Company's experience with similar claims, historical trends, economic factors and judicial, legislative and regulatory changes in establishing reserves. The Company's losses and loss expense reserves are recorded net of reinsurance and amounts expected to be received from salvage (the amount recovered from property after the Company pays for a total loss) and subrogation (the right to recover payments from third parties).

Assumptions and estimates for losses and loss expense reserves are updated as new information becomes available. Due to the inherent uncertainty in estimating losses and loss expense reserves, the actual cost of settling claims may differ materially from recorded amounts. Changes in losses and loss expense reserve estimates are included in results of operations in the period the estimates are revised.
12.

The Company has a written capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, vehicles, other equipment and leasehold improvements. The Company has not modified its capitalization policy from the prior period.
13.

Not applicable as the Company does not write major medical insurance with prescription drug coverage.

D. Going Concern

Not applicable.

**Note 2 – Accounting Changes and Corrections of Errors**

In December 2020, the Company adopted revisions to SSAP No. 2R, Cash Equivalent – Cash and Liquidity Pools. The adopted revisions require internal cash pooling arrangements to meet certain criteria to be considered qualified cash pools, with investments in qualifying pools reported as cash and cash equivalents on Page 2 within line 5. The Company's cash pool meets the criteria to be considered a qualified cash pool under SSAP No. 2R. The internal cash pooling arrangement with Nationwide Cash Management Company (NCMC) was historically classified as short-term investments, resulting in a change in classification to cash and cash equivalents. See Note 10 for more information on the Company's relationship with NCMC.

NOTES TO THE FINANCIAL STATEMENTS

5. The Company reviews all loan-backed and structured securities in which the fair value of the given security is less than the amortized cost to determine if a given security is other-than-temporarily impaired. The Company examines characteristics of the underlying collateral, such as delinquency and default rates, the quality of the underlying borrower, the type of collateral in the pool, the vintage year of the collateral, subordination levels within the structure of the collateral pool, and the quality of any credit guarantors, to determine the cash flows expected to be received for the security. If the severity and duration of the security's unrealized loss indicates a risk of an other-than-temporary impairment, then the Company will evaluate if the amortized cost basis of the security will be recovered by comparing the present value of the cash flows expected to be received for the given security with the amortized cost basis of the security. If the present value of cash flows is greater than the amortized cost basis of a security then the security is deemed not to be other-than-temporarily impaired.

Note 20 – Fair Value Measurements

A. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes assets and liabilities held at fair value in the statutory statements of assets and liabilities, surplus and other funds as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, London Interbank Offered Rate, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimates of the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for assets and liabilities quarterly. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the period in which the change occurs.

Independent pricing services are most often utilized to determine the fair value of bonds and stocks for which market quotations or quotations on comparable securities are available. For these bonds and stocks, the Company obtains the pricing services' methodologies, pricing from additional sources, inputs and assumptions and classifies the investments accordingly in the fair value hierarchy.

A corporate pricing matrix is used in valuing certain corporate bonds. The corporate pricing matrix was developed using publicly available spreads for privately placed corporate securities with varying weighted average lives and credit quality ratings. The weighted average life and credit quality rating of a particular bond to be priced using the corporate pricing matrix are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

NOTES TO THE FINANCIAL STATEMENTS

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when deemed appropriate or when quotes are not available from independent pricing services or a corporate pricing matrix. These bonds are classified with the lowest priority in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers as the brokers often do not provide the necessary transparency into their quotes and methodologies. At least annually, the Company performs reviews and tests to ensure that quotes are a reasonable estimate of the investments' fair value. Price movements of broker quotes are subject to validation and require approval from the Company's management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment's fair value.

The Company carries short-term investments at amortized cost, which approximates fair value.

No assets or liabilities were held at fair value as of December 31, 2021.

None of the aforementioned items have had a material impact on the overall financial condition of the Company. While many of the government-imposed measures have eased in 2021, the extent to which the COVID-19 pandemic may impact the Company's ongoing operations and financial condition will depend on future developments that are evolving and uncertain.
