The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance Law. The NAIC Accounting Practices and Procedures Manual – Effective January 1, 2001 (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. B. Use of Estimates in the Preparation of the Financial Statements
The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy
Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- 1.Short-term investments are stated at amortized cost.
- 2.Bonds not backed by other loans are stated at amortized cost using the scientific method. Bonds with NAIC designations of 3 through 6 are stated at the lower of amortized cost or fair value.
- 3.Common stocks are stated at fair market value, except for investments in stocks of unconsolidated subsidiaries and affiliates in which the Company has an interest of 10% or more which are reported in accordance with Note 1-C7 below.
- 4.The Company has no investments in preferred stock.
- 5.The Company has no mortgage loans.
- 6.Loan-backed securities are stated at amortized cost. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method. Loan-backed securities with NAIC designations of 3 through 6 are stated at the lower of amortized cost or fair value.

The carrying value and final NAIC designation for non-agency residential mortgage backed securities and commercial mortgage backed securities are determined using a special two-step NAIC process. In the first step, those assigned a NAIC designation of 1 or 2 are stated at amortized cost and those assigned a 3 through 6 designation are stated at the lower of amortized cost or fair value. The NAIC designation assigned under the second step of the process is reported for those securities in Schedule D and is used in the risk-based capital calculation.

- 7.The Company owns 100% of the common stock of ProCentury Insurance Company ("ProCentury"). All aforementioned stock is valued at the statutory net worth of the underlying insurance company. Affiliated investments are reported in accordance with SSAP 97 - Investment in Subsidiary Controlled and Affiliated Entities.
- 8.The Company does not have any ownership interests in joint ventures, partnerships, or limited liability companies.
- 9.The Company does not hold or issue derivative financial instruments.
- 10.The Company utilizes anticipated investment income as a factor in premium deficiency calculations.
- 11.Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- 12.Capitalization Policy - Not Applicable.
- 13.Pharmaceutical Rebate Receivables – Not Applicable.

D. Loan-Backed Securities

- (1) Our asset manager uses a proprietary model for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage-backed and asset-backed securities; inputs come from major third party data providers. The effect of interest rates, volatility, and prepayment speeds are derived using Monte Carlo simulation. Credit loss analysis, resulting effective analytics (spreads, duration, convexity) and cash-flows are reported to clients on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.
- (2) Securities where the Company has either the intent to sell or lacks the ability to retain the securities - Not applicable.
Loan-backed securities with a historical or current period other-than-temporary impairment ("OTTI"), currently held by the reporting entity where the present

NOTE 20 Fair Value Measurements

A.

- (1) Fair Value Measurements at Reporting Date
The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the following table.

Level 1 - Valuations that are based on unadjusted quoted market prices in active markets for identical securities. The fair value of exchange-traded equities and mutual funds included in the Level 1 category were based on quoted prices that are readily and regularly available in an active market and are thus classified as Level 1.

Level 2 - Valuations that are based on observable inputs (other than Level 1 prices), such as quoted prices for similar assets at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly. The fair value of securities included in the Level 2 category were based on market values obtained from a third-party pricing service. They were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other observable market information. The third-party service monitors market indicators as well as industry and economic events. The Level 2 category includes corporate bonds, government and agency bonds, asset-backed, residential mortgage-backed and commercial mortgage-backed securities and municipal bonds.

Level 3 - Valuations that are derived from techniques in which one or more of the significant inputs are unobservable and/or involve management judgment and/or are based on non-binding broker quotes.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value					
Other Money Market Mutual Fund	\$ 2,825,891				\$ 2,825,891
Industrial & Misc.			\$ 1,213,717		\$ 1,213,717
Total assets at fair value/NAV	\$ 2,825,891	\$ -	\$ 1,213,717	\$ -	\$ 4,039,608

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels. During the current year, no transfers into or out of Levels 1 and 2 were required.

- (2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy

Description	Beginning Balance at 01/01/2021	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance at 12/31/2021
a. Assets										
Indust. & Misc.	\$ 1,082,825				\$ 130,892					\$ 1,213,717
Total Assets	\$ 1,082,825	\$ -	\$ -	\$ -	\$ 130,892	\$ -	\$ -	\$ -	\$ -	\$ 1,213,717

- (3) At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.
- (4) The estimated fair values of the Company's investments are based on prices provided by a third party pricing service and a third party investment manager. The prices provided by these services are based on quoted market prices, when available; non-binding broker quotes, or matrix pricing. The Company has not historically adjusted security prices.

For corporate, government and municipal bonds, the third party pricing service utilizes a pricing model with standard inputs that include benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, market bids / offers, and other reference data observable in the marketplace. The model uses the option adjusted spread methodology and is a multi-dimensional relational model. All bonds valued under these techniques are classified as Level 2.

For asset-backed, residential mortgage-backed and commercial mortgage-backed securities, the third party pricing service valuation methodology includes consideration of interest rate movements, new issue data, monthly remittance reports and other pertinent data that is observable in the marketplace. This information is used to determine the cash flows for each tranche and identifies the inputs to be used such as benchmark yields, prepayment assumptions and collateral performance. All asset-backed, residential mortgage-backed and commercial mortgage-backed securities valued under these methods are classified as Level 2.

For all assets where readily observable pricing methods are not available the third party investment manager will price the asset using a combination of non-binding broker / dealer quotes, benchmarking techniques, and sector specific knowledge. All assets priced by using this methodology are classified as Level 3.

- (5) Not applicable.

B. Not applicable.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A.

NOTES TO FINANCIAL STATEMENTS

The contract is a retroactive reinsurance contract and is accounted and reported for as such in the corresponding financial statements in accordance with the requirements of SSAP 62R.

On a statutory accounting basis, SSAP 62R requires retroactive reinsurance to be recorded and disclosed differently from prospective reinsurance. Retroactive reinsurance is recorded and reported as a separately identifiable contra-liability write-in item on the balance sheet, under Aggregate Write-ins. Any surplus gain resulting from a retroactive reinsurance agreement must be identified as segregated special surplus until the actual retroactive reinsurance recovered exceeds the consideration paid. As of December 31, 2021, this gain was \$20.0 million (difference between ADC Recoverable of \$50.0 million and consideration paid of \$30.0 million).

Star is also required to report the initial gain arising from the retroactive reinsurance transaction as a separately identifiable write-in item on the income statement, under Other Income.

Retroactive reinsurance is not reported on Schedule F or Schedule P for annual statement purposes, however, the same collateral requirements are considered when placing such coverage with unauthorized reinsurers.

NOTE 33 Asbestos/Environmental Reserves
The Company currently writes coverage in lines of business such as general liability and workers compensation which are often associated with the property and casualty industry's exposure to asbestos and environmental claims. However, with the exception of the business underwritten through our Environmental division, the Company's policies exclude coverage for asbestos and limit environmental exposure. The Company has written Environmental business through an Environmental division started in 2008. The Company's environmental division underwrites liability coverage, including pollution liability, for a wide range of environmental and non-environmental contractors and environmental engineers and consultants.

These risks are tightly underwritten by specialized underwriters who have a long history of success in writing environmental liability coverage. Therefore such liabilities assumed by the company are anticipated, underwritten, engineered and priced for. In addition, policies are issued with policy provisions intended to limit the coverage trigger and exposure to such liabilities. The Company is aware of a minimal amount of past insureds for which exposure exists due to these types of claims. The Company has disclosed the loss or loss adjustment expense reserves for these asbestos and environmental liabilities. The Company estimates the full impact of the asbestos exposure by establishing full case basis reserves on all known losses and computing incurred but not reported losses based on previous experience.
