NOTES TO FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Northwestern Insurance Company (the “Company”) were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (“DOI”).

The DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the DOI. No deviations from NAIC statutory accounting practices (“NAIC SAP”) were used in preparing these statutory-basis financial statements, except for the NAIC’s limited-time exception for the year ended December 31, 2020, allowing the classification of policyholder credits related to COVID-19 as an underwriting expense instead of a reduction of premium. The NAIC issued INT 20-08 providing a limited-time exception to NAIC SAP which allowed the Company to recognize policyholder credits related to COVID-19 as an underwriting expense (Page 4, Line 4) rather than a reduction of premium (Page 4, Line 1) when a policy endorsement allowing for discretionary payments to policyholders due to COVID-19 related issues was filed, if required by the state, prior to June 15, 2020. This limited-time exception expired on January 1, 2021.

In the year ended December 31, 2020, the Company reported \$62,470,885 in policyholder credits to personal auto policyholders in response to the expected reduction in auto accident frequency and the financial hardships imposed by the impact of COVID-19 social distancing and shelter-in-place restrictions (“COVID-19 restrictions”). In accordance with INT 20-08, the Company has included these policyholder credits in underwriting expense (Page 4, Line 4) rather than a reduction of premium (Page 4, Line 1) due to the Company filing policy endorsements, if required by the state, prior to June 15, 2020. The table below illustrates that there were no other deviations from NAIC SAP and that the permitted practice described above has no net impact on either Net Income or Surplus.

	SSAP #	F/S Page	F/S Line #	2021	2020
NET INCOME					
(1) PROGRESSIVE NORTHWESTERN INSURANCE COMPANY state basis (Page 4, Line 20, Columns 1 & 2)	XXX	XXX	XXX	\$ 165,832,233	\$ 326,134,875
(2) State Prescribed Practices that increase/decrease NAIC SAP					
(3) State Permitted Practices that increase/decrease NAIC SAP					
(4) NAIC SAP (1 – 2 – 3 = 4)	XXX	XXX	XXX	\$ 165,832,233	\$ 326,134,875

(5) PROGRESSIVE NORTHWESTERN INSURANCE COMPANY state basis (Page 3, line 37, Columns 1 & 2)	XXX	XXX	XXX	\$ 809,783,149	\$ 782,258,014

(8) NAIC SAP (5 – 6 – 7 = 8)	XXX	XXX	XXX	\$ 809,783,149	\$ 782,258,014

The following table illustrates the impact in the year ended December 31, 2020 of reporting the policyholder credits related to COVID-19 restrictions as an underwriting expense rather than a reduction of premium on the operating percentages and other percentages reported in the Five-Year Historical Data Exhibit:

	Policyholder Credits as an Underwriting Expense	Policyholder Credits as a Reduction of Premium
Operating Percentages:		
Premiums earned	100.0	100.0
Losses incurred	54.0	55.5
Loss expenses incurred	9.2	9.4
Other underw riting expenses incurred	23.8	21.6
Net underw riting gain/loss	13.0	13.4
Other Percentages:		
Other underw riting expenses to net premiums written	22.6	20.5
Losses and loss expenses incurred to premiums earned	63.2	65.0
Net premiums written to policy holders' surplus	298.4	290.4

B. Use of Estimates in the Preparation of the Financial Statement

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense (“LAE”) reserves.

C. Accounting Policy

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company’s exposure to credit risk.

Acquisition costs, such as agents’ commissions, premium taxes, and other policy initiation costs, are charged to operations as incurred. Advertising costs are expensed as incurred.

Certain assets designated as “nonadmitted assets”, in accordance with Statement of Statutory Accounting Principles (“SSAP”) No. 4, Assets and Nonadmitted Assets, are reported on page 13, Exhibit of Nonadmitted Assets. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, capital and surplus section..

In addition, the Company uses the following accounting policies:

Investments

NOTES TO FINANCIAL STATEMENTS

- Cash and cash equivalents include bank accounts and certificates of deposit as well as short-term investments with original maturities of three months or less and securities acquired with remaining maturities of three months or less that are reported at amortized cost which approximates market value. Also includes money market mutual funds valued at fair value or net asset value (NAV) as a practical expedient.
- Short-term investments include securities acquired within one year of maturity, excluding those with maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost which approximates market value.
- Investment-grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider ("CRP") designations from the Acceptable Rating Organization ("ARO") list and are reported at amortized cost using the scientific method which closely approximates the effective interest method. Non-investment-grade bond valuations are also based on NAIC designations or NAIC CRP-ARO designations and are reported at the lower of amortized cost or fair market value. Loan-backed and structured securities follow the guidance prescribed by SSAP No. 43R for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.
- Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market values based on active market closing quotations from a regulated exchange. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.
- Nonredeemable preferred stocks are reported at fair market values and are not to exceed currently effective call price. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Investment-grade redeemable preferred stocks are reported at amortized cost, while non-investment-grade redeemable preferred stocks are reported at the lower of amortized cost or fair market value. The difference between the original cost and redemption value of the redeemable preferred securities is recognized using the scientific method, which closely approximates the effective interest method, over the lives of the respective issues and included in net investment gain.
- The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. In very rare cases, if none of the aforementioned primary sources are available, matrix pricing using the reporting entity's own market based assumptions may be utilized. The approved methods for computation of fair market value are prescribed in the Securities Valuation Office *Purposes and Procedures Manual*.
- The Company has no investments in mortgage loans.
- Loan-backed and structured securities are accounted for as prescribed by SSAP No. 43R. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends (see Note 5D).
- The Company has no investments in joint ventures, partnerships, or limited liability companies.
- The Company has no investments in derivatives.
- The Company may enter into repurchase agreements in which it borrows cash by providing certain underlying securities as collateral for the arrangement. The cash borrowed is invested in cash equivalents and an offsetting liability is established. The cash equivalent investment maturities and the term of the borrowing arrangement on the collateralized securities match, eliminating duration risk exposure to the Company. The Company did not have any open repurchase agreements at December 31, 2021 and December 31, 2020.
- The Company may enter into reverse repurchase commitment transactions. In these transactions, the Company loans cash to an accredited bank and receives U.S. Treasury Notes pledged as general collateral against the cash borrowed. The Company chooses to enter into these transactions as rates on general collateral are more attractive than other short-term rates available in the market. The Company's exposure to credit risk is limited, as these internally managed transactions are typically overnight arrangements. The income generated on these transactions is calculated at the then applicable general collateral rates on the value of U.S. Treasury securities received. The Company has counterparty exposure on reverse repurchase agreements in the event of a counterparty default to the extent the general collateral security's value is below the cash which was delivered to acquire the collateral. The short-term duration of the transactions (primarily overnight investing) reduces that default exposure. The Company did not have any open reverse repurchase commitment transactions at December 31, 2021 and December 31, 2020.
- Realized gains and losses on sales of securities are computed based on the first-in, first-out method.
- The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for other-than-temporary impairment ("OTTI") requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43R). This evaluation reflects management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation. When persuasive evidence exists that causes management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

Loss, Loss Adjustment Expense, and Premium Deficiency Reserves

- Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company conducts extensive reviews each month on portions of its business to help ensure that the Company is meeting its objective of always having reserves that are adequate with minimal variation. Results would differ if different assumptions were made (see Notes 25 and 33).
- The Company does not anticipate investment income when evaluating the need for premium deficiency reserves (see Note 30).

Capitalization of Assets

- The Company has written capitalization policies for its various asset classes. The capitalization policy thresholds have not materially changed from the prior year.

Pharmaceutical Rebate Receivables

- The Company does not write medical insurance or prescription drug coverage.

D. Going Concern

Management continuously monitors the Company's financial results and compliance with regulatory requirements and found no reason to expect the Company to not continue as a going concern.

D. Loan-Backed Securities

1. The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.
2. Intent to Sell or Inability to Hold Securities with a Recognized Other-Than-Temporary Impairment
- Not Applicable
3. The Company has not recorded an other-than-temporary impairment for loan-backed and structured debt securities during the current year.
4. At the end of the reporting period, the composition of fair value and gross unrealized losses on loan-backed and structured debt securities by the length of time that individual securities have been in a continuous unrealized loss position is as follows:

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$ 4,394,615
	2. 12 Months or Longer	\$ 223,354
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$ 503,948,133
	2. 12 Months or Longer	\$ 9,461,211

5. Additional information

Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

B. Assessments

The Company is subject to state guaranty fund and other assessments by the states in which it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2021 and 2020, the Company's estimated liability for state guaranty fund and other assessments was \$152,747 and \$121,715, respectively. The Company did not recognize any premium tax benefit associated with its various assessments.

The Company is named as defendant in a lawsuit arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in a 100% pooling reinsurance agreement for which it is allocated litigation expenses (see Note 26).

A pending lawsuit is summarized below, and the outcome is uncertain. At period end, the Company does not consider a loss from this pending case to be both probable and estimable, and is unable to estimate a range of loss at this time.

There was a qui tam lawsuit challenging the Company's reimbursement to Medicare Advantage Plans on first-party and/or third-party medical claims and settlements with insureds and claimants.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements at Reporting Date

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect our subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

Determining the fair value of the investment portfolio is the responsibility of management. As part of the responsibility, management evaluates whether a market is distressed or inactive in determining the fair value for our portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market. Based on this evaluation, management concluded that there was sufficient activity related to the sectors and securities for which we obtained valuations.

See Note 1, Investment Policies section for further information regarding methods used to determine fair market value.

The valuations classified as either Level 1 or Level 2 in the table below are priced exclusively by external sources, including: pricing vendors, dealers/market makers, and exchange-quoted prices. The Company did not have any transfers between Level 1 and Level 2. At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

Fair Value Measurements at the reporting date:

F. Subprime Mortgage Related Risk Exposure

1. Description of the Subprime-Mortgage-Related Risk Exposure and Related Risk Management Practices

The following sub prime disclosure and the review and procedures described within are completed at a consolidated level for all the Progressive companies. To the extent the Company had any direct subprime exposure, those securities would be listed in Note 21.F.3.

Management’s review of the investment portfolio for securities with direct subprime exposure, such as Alt-A residential mortgage loan-backed bonds and home equity loan-backed bonds, is performed in conjunction with the OTTI analysis and procedures (see Note 1.C). Additionally, securities that were determined to have an indirect subprime exposure were also reviewed as part of the OTTI process.

The Company’s management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the subprime mortgage loan disruption, as well as broader credit market events.

In the reporting period, the Company recorded no OTTI write-downs on any securities as a result of direct subprime exposure.

Note 26 – Intercompany Pooling Arrangements

The Company participates in a pooling reinsurance agreement with the property-casualty affiliates listed below (the “Agency Pool”) under which 100% of the underwriting business of each member company, net of external reinsurance, is ceded to Casualty, the Agency Pool manager and an Agency Pool participant. The combined premiums, losses, and expenses are then retroceded to each Agency Pool member based on pre-determined pooling percentages.

Progressive Hawaii Insurance Corp. (“Hawaii”), an insurance affiliate domiciled in Ohio and National Continental Insurance Company (“National Continental”), an insurance affiliate domiciled in New York, terminated their future participation in the Agency Pool effective November 5, 2005 and January 1, 1996, respectively. Hawaii and National Continental have zero percent retrocession participation in the Agency Pool for all policies written prior to the dates listed above.

The pooling percentages for each Agency Pool participant were as follows:

Company	NAIC Code	2021 Pool %	2020 Pool %
Progressive Casualty Insurance Company (Lead)	24260	49.0%	49.0%
Progressive Northern Insurance Company	38628	12.0	12.0
Progressive Northwestern Insurance Company	42919	12.0	12.0

Progressive Hawaii Insurance Corp.	10067	--	--
National Continental Insurance Company	10243	--	--
		100.0%	100.0%

All business written by each Agency Pool participant is subject to pooling. Business ceded by Agency Pool members to non-affiliated reinsurers prior to pooling is primarily due to state-provided reinsurance programs. The Company does not participate in any intercompany sharing of the provision for reinsurance and the write-off of uncollectible reinsurance.

At the reporting period, amounts recoverable from and payable to the Company and all affiliates participating in the Agency Pool are as follows:

Note 33 – Asbestos/Environmental Reserves

Because the Company is primarily an insurer of motor vehicles, it has limited exposure for asbestos and environmental claims. In accordance with disclosure requirements, the amounts reported for direct, assumed, and net below reflect the Company's pooled share (see Note 26) of the Agency Pool's exposure to asbestos and environmental claims. The Agency Pool's exposure arises from Casualty's participation in various reinsurance pools from 1972 to 1975, which underwrote general liability insurance, Casualty's aggregate stop loss reinsurance agreement with Progressive Max Insurance Company, an insurance affiliate domiciled in Ohio, for various reinsurance pools from 1972 to 1974, Progressive American Insurance Company's, an insurance affiliate domiciled in Ohio and Agency Pool member, exposure from a limited number of general liability policies issued from 1972 to 1975, and Casualty's aggregate stop loss reinsurance agreement with National Continental for general liability business written on or before November 25, 1985.

The Company records case and DCC reserves based on financial information received from the various external reinsurance pool managers. IBNR reserves are established based on previous experience.
