NOTE 20 Fair Value Measurements

A. Fair Value Measurements

(1) Fair Value Measurements at Reporting Date

SSAP No. 100, Fair Value Measurements, clarifies the definition of estimated fair value and establishes a hierarchy for measuring estimated fair value. The hierarchy established by this standard consists of three levels to indicate the quality of the estimated fair value measurements as described below:

Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable.

Level 2 - Significant Other Observable Inputs: Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1.

Level 3 - Significant Unobservable Inputs: Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of assets or liabilities. Unobservable inputs reflect the entity's assumptions about the assumptions that market participants would use in pricing the asset or liability.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value					
Common Stocks, unaffiliated	\$ 7,420,419	\$ 259	\$ 76,941		\$ 7,497,619
Total assets at fair value/NAV	\$ 7,420,419	\$ 259	\$ 76,941	\$ -	\$ 7,497,619

b. Liabilities at fair value

Description	Ending Balance as of Prior Quarter End	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance for Current Quarter End

Total Liabilities	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

(3) Policies when Transfers Between Levels are Recognized

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels 1, 2 or 3. The Company had no transfers into or out of any of the levels during the period reported.

(4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement

Common Stocks, unaffiliated- According to statutory accounting rules, common stocks are reported at fair value.

NOTES TO FINANCIAL STATEMENTS

C. Fair Value Level

The following tables reflect the estimated fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The estimated fair values are categorized into the three-level fair value hierarchy as described above.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Bonds	\$ 43,251,070	\$ 44,444,692		\$ 43,251,070			
unaffiliated	\$ 7,497,619	\$ 7,497,619	\$ 7,420,419	\$ 259	\$ 76,941		

Bonds and Common Stocks

When available, the estimated fair values for bonds, including loan-backed and structured securities, and certain short-term investments are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1. Generally, these are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified as Level 2.

When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgement or estimation, and cannot be supported by reference or market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investment are classified as Level 3.

The estimated fair value of cash approximates carrying value and is classified as Level 1 given the nature of cash.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

Reserves for the Company's incurred losses and loss adjustment expenses (after intercompany pooling) are attributable to insured events of prior years, which reflect favorable development totaling \$1,164,070. The development can be attributed primarily to the re-estimation of unpaid losses and loss adjustment expenses in the workers' compensation, commercial auto liability, private passenger auto liability, commercial multi perils, products liability and other lines of buisness. The favorable development in these lines was slightly offset by losses in homeowners, farmowners, and auto physical damage. The changes reflected in these lines were generally the result of recent development trends. There were not any premium adjustments made as a result of this loss and loss adjustment expense development.
