NOTES TO FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

United Transportation Union Insurance Association’s (Insurance Association or UTUIA), statutory-basis financial statements are prepared in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual*. The UTUIA, a fraternal benefit society, is domiciled in Ohio. The Insurance Association’s primary business is providing life, accident and health insurance and annuities to members of the SMART-TD and to members of other transportation industries. Life insurance and annuities comprise more than 69% of UTUIA’s premiums, with accident and health products representing the balance. UTUIA sells insurance throughout most of the United States with the highest concentrations per schedule T.

B. Use of Estimates in the Preparation of the Financial Statement

Preparation of financial statements requires management to make claims and claim adjustment expenses on accident and health policies which represent the estimated ultimate net cost of estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Such estimates and assumptions could change in the future as more information becomes known, which could impact the amounts reported and disclosed herein.

C. Accounting Policy

Basis of Presentation

The accompanying financial statements of the Insurance Association have been prepared in conformity with statutory accounting practices as prescribed. Such practices vary from accounting principles generally accepted in the United States (GAAP). The more significant variances from GAAP are as follows:

Investments

Investments in bonds are reported at amortized cost or market value based on their NAIC rating; but for GAAP, such fixed maturity investments are designated at purchase as either held-to-maturity, trading, or available-for-sale. Held-to-maturity fixed investments would be reported at amortized cost, and the remaining fixed maturity investments would be reported at fair value, with unrealized holding gains and losses reported in operations for those designated as trading or as a separate component of surplus for those designated as available-for-sale.

Fair values of certain investments in bonds and stocks are based on values specified by the NAIC rather than on actual or estimated market values. Changes between cost and admitted asset investment amounts are credited or charged directly to unassigned surplus rather than to a separate surplus account.

Under a formula prescribed by the NAIC, the Insurance Association defers the portion of realized capital gains and losses on sales of fixed income investments, that is attributable to changes in the general level of

---

---

interest rates, and amortizes those deferrals over the remaining period to maturity. That net deferral is reported as the interest maintenance reserve (IMR), a required statutory reserve, in the accompanying balance sheets. Realized capital gains and losses are reported in income net of transfers to the IMR.

The asset valuation reserve (AVR) provides a valuation allowance for invested assets. The AVR is determined by a NAIC prescribed formula and is reported as a liability rather than unassigned surplus. Under GAAP, realized capital gains and losses are reported in the income statement in the period that the asset giving rise to the gains or losses are sold and valuation allowances are provided when there has been a decline in value deemed other than temporary, in which case, the provision for such declines are charged to income.

### ***Policy Acquisition Costs***

The costs of acquiring and renewing business are expensed when incurred. Under GAAP, acquisition costs related to traditional life insurance, to the extent recoverable from future policy revenues, are deferred and amortized over the premium-paying period of the related policies using assumptions consistent with those used in computing policy benefit reserves. For universal life insurance and investment products, to the extent recoverable from future gross profits, deferred policy acquisition costs are amortized generally in proportion to the present value of expected gross profits from surrender charges and investment, mortality, and expense margins.

### ***Nonadmitted Assets***

Certain assets designated as non-admitted, principally prepaid insurance and loans to Regional Insurance Managers, are excluded from the accompanying balance sheet and are charged directly to unassigned surplus.

### ***Certificate Reserves***

Certain certificate reserves are calculated based on statutorily required interest and mortality assumptions rather than on estimated expected experience and actual account balances.

### ***Certificate Dividends***

Certificate holder dividends are recognized when declared rather than over the term of the related policies.

*Other significant accounting practices are as follows:*

### ***Investments***

Bonds, common stocks, short-term investments, and other investments are stated at values prescribed by the NAIC as follows:

Bonds not backed by other loans are stated at amortized cost using the interest method.

Loan-backed bonds and structured securities are valued at amortized cost using the interest method including anticipated prepayments. Prepayment assumptions are obtained from dealer survey values and data from public sources and are consistent with the current interest rate and economic environment. The retrospective adjustment method is used to record adjustments to bond premiums and discounts.

Short-term investments include money market funds.

Common stocks, mutual funds and variable annuity investments are reported at market value as determined by the Securities Valuation Office (SVO) of the NAIC. Preferred Stocks are reported at book value and hold NAIC designations RP1 to RP3.

Contract loans are reported at unpaid principal balances.

***Cash and Short-Term Investments***—the carrying amounts reported in the accompanying balance sheets for these financial instruments approximate their fair values.

***Investment Securities***—the fair values for fixed maturity securities are based on market values prescribed by the SVO of the NAIC or quoted market prices, where available. For investments for which the NAIC does not provide a value, the amortized cost amount is substituted. The fair values for equity securities are based

NOTES TO FINANCIAL STATEMENTS

on market values prescribed by the SVO of the NAIC.

**Contract Loans**—the fair values for contract loans are estimated using discounted cash flow analyses, using interest rates currently being offered for similar loans to borrowers with similar credit ratings.

**Investment Contracts**—the fair values for UTUIA’s liabilities under investment-type insurance contracts are estimated as the amount payable to the contract holder upon demand. As of March 31, 2022 the carrying amount of such liabilities approximates the surrender value.

The fair values of the Insurance Association’s liabilities for insurance contracts, other than investment-type contracts, are not required to be disclosed.

**Claims and Claim Adjustment Expenses**

Claims and claim adjustment expenses on accident and health policies represent the estimated ultimate net cost of all reported and unreported claims incurred prior to year end. The reserves for unpaid claims and claim adjustment expenses are estimated using individual case-basis valuations and statistical analyses. Those estimates are subject to the effects of trends in claim severity and frequency. Although considerable variability is inherent in such estimates, management believes that the reserves for claims and claim adjustment expenses are adequate. The estimates are continually reviewed and adjusted as necessary as experience develops or new information becomes known; such adjustments are included in current operations.

D.      Going Concern
