- Pricing Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that our pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount or degree of judgment.
- Pricing Level 2 – Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.
- Pricing Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are non-binding.
- (5) Not applicable
