Investment grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider ("CRP") designations from the Acceptable Rating Organization ("ARO") list and are reported at amortized cost using the scientific method which closely approximates the effective interest method. Non-investment grade bond valuations are also based on NAIC designations or NAIC CRP-ARO designations and are reported at the lower of amortized cost or fair market value. Loan-backed and structured securities follow the guidance prescribed by SSAP No. 43R, for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.

The Company routinely assesses the collectibility of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible.

The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has, on a net basis, potential exposure relating to lawsuits due to its participation in a 100% pooling reinsurance agreement for which it is allocated litigation expenses.

The pending lawsuits summarized below are in various stages of development, and the outcomes are uncertain or, if probable and estimable, are accrued in these statutory-basis financial statements. At the statement date, except to the extent an accrual has been established, the Company does not consider the losses from these pending cases to be both probable and estimable and is unable to estimate a range of loss at this time.

There was a putative class action lawsuit alleging the Company undervalues total loss claims through the use of certain valuation tools.

There was a qui tam lawsuit challenging the Company's reimbursement to Medicare Advantage Plans on first-party and/or third-party medical claims and settlements with insureds and claimants.

NOTES TO FINANCIAL STATEMENTS

NOTE 20 Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

(1) Fair Value Measurements by Levels 1, 2, and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

Determining the fair value of the investment portfolio is the responsibility of the Company's management. As part of the responsibility, management evaluates whether a market is distressed or inactive in determining the fair value for the Company's portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market. Based on this evaluation, management concluded that there was sufficient activity related to the sectors and securities for which they obtained valuations.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

The Company does not have any liabilities measured at fair value on the balance sheet.

(2) Roll Forward of Level 3 Items

Not applicable

(3) Policy on Transfers Into and Out of Level 3 input

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

See Note 20.A.1 above.

(5) Derivative Fair Values

B. Other Fair Value Disclosures

C. Fair Values for all Financial Instruments by Levels 1, 2, and 3

The unfavorable development is primarily due to more supplemental payments on previously closed features than anticipated in private passenger auto liability, partially offset by more salvage and subrogation recoveries than expected in auto physical damage and lower than anticipated claims adjusting expenses.
