No significant change

C. Accounting Policy

- 1.-5., 7.-13. No significant change.
6. Loan-backed securities are stated at amortized cost. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method. Loan-backed securities with NAIC designations of 3 through 6 are stated at the lower of amortized cost or fair value.

The carrying value and final NAIC designation for non-agency residential mortgage backed securities and commercial mortgage backed securities are determined using a special two-step NAIC process. In the first step, those assigned a NAIC designation of 1 or 2 are stated at amortized cost and those assigned a 3 through 6 designation are stated at the lower of amortized cost or fair value. The NAIC designation assigned under the second step of the process is reported for those securities in Schedule D and is used in the risk-based capital calculation.

The effect of interest rates, volatility, and prepayment speeds are derived using Monte Carlo simulation. Credit loss analysis, resulting effective analytics (spreads, duration, convexity) and cash-flows are reported to clients on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

(2) Securities where the Company has either the intent to sell or lacks the ability to retain the securities - Not applicable

(3) Loan-backed securities with a historical or current period other-than-temporary impairment ("OTTI"), currently held by the reporting entity where the present value of the discounted cash flows was/is less than the amortized cost basis of the securities - Not applicable.

NOTE 20 Fair Value Measurements

A.

(1) Fair Value Measurements at Reporting Date

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the following table.

Level 1 - Valuations that are based on unadjusted quoted market prices in active markets for identical securities. The fair value of exchange-traded equities and mutual funds included in the Level 1 category were based on quoted prices that are readily and regularly available in an active market and are thus classified as Level 1.

Level 2 - Valuations that are based on observable inputs (other than Level 1 prices), such as quoted prices for similar assets at the measurement date; quoted prices in markets that are not active; or other inputs that are observable, either directly or indirectly. The fair value of securities included in the Level 2 category were based on market values obtained from a third-party pricing service. They were evaluated using pricing models that vary by asset class and incorporate available trade, bid and other observable market information. The third-party service monitors market indicators as well as industry and economic events. The Level 2 category includes corporate bonds, government and agency bonds, asset-backed, residential mortgage-backed and commercial mortgage-backed securities and municipal bonds.

Level 3 - Valuations that are derived from techniques in which one or more of the significant inputs are unobservable and/or involve management judgment and/or are based on non-binding broker quotes.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value					
Exempt Money Market Mutual Fund	\$ 64,352				\$ 64,352
Other Money Market Mutual Fund	\$ 607,325				\$ 607,325
Industrial & Misc.			\$ 1,045,954		\$ 1,045,954
Total assets at fair value/NAV	\$ 671,677	\$ -	\$ 1,045,954	\$ -	\$ 1,717,631

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between Levels. During the current year, no transfers into or out of Levels 1 and 2 were required.

(2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy

Description	Ending Balance as of Prior Quarter End	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance for Current Quarter End
a. Assets										
Indust. & Misc.	\$ 1,120,784				\$ (74,830)					\$ 1,045,954
Total Assets	\$ 1,120,784	\$ -	\$ -	\$ -	\$ (74,830)	\$ -	\$ -	\$ -	\$ -	\$ 1,045,954

(3) At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

NOTES TO FINANCIAL STATEMENTS

(4) The estimated fair values of the Company's investments are based on prices provided by a third party pricing service and a third party investment manager. The prices provided by these services are based on quoted market prices, when available; non-binding broker quotes, or matrix pricing. The Company has not historically adjusted security prices.

For corporate, government and municipal bonds, the third party pricing service utilizes a pricing model with standard inputs that include benchmark yields, reported trades, issuer spreads, two-sided markets, benchmark securities, market bids / offers, and other reference data observable in the marketplace. The model uses the option adjusted spread methodology and is a multi-dimensional relational model. All bonds valued under these techniques are classified as Level 2.

For asset-backed, residential mortgage-backed and commercial mortgage-backed securities, the third party pricing service valuation methodology includes consideration of interest rate movements, new issue data, monthly remittance reports and other pertinent data that is observable in the marketplace. This information is used to determine the cash flows for each tranche and identifies the inputs to be used such as benchmark yields, prepayment assumptions and collateral performance. All asset-backed, residential mortgage-backed and commercial mortgage-backed securities valued under these methods are classified as Level 2.

For all assets where readily observable pricing methods are not available the third party investment manager will price the asset using a combination of non-binding broker / dealer quotes, benchmarking techniques, and sector specific knowledge. All assets priced by using this methodology are classified as Level 3.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall. The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures and ventures). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A.
