B. Use of Estimates in the Preparation of the Financial Statements - No Significant Changes

C. Accounting Policy

Listed below is a summary of the accounting policies that materially affect the financial statements.

Investments

The Company does not have a securities lending program.

The Company does not have any off-balance sheet commitments.

Premium revenue

Premiums are deferred and earned on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired periods of the policies is recorded as unearned premiums. Premiums received in advance of the policies' effective dates are recorded as advance premiums. Premiums written and not yet collected and agents' balances are shown as a receivable, with balances older than 90 days generally nonadmitted. The Company regularly evaluates this receivable and establishes valuation allowances, as appropriate, for items less than 90 days.

Reinsurance

In the normal course of business, the Company seeks to limit aggregate and single exposure to losses on large risks by purchasing reinsurance. The Company may also use reinsurance to affect the disposition of certain blocks of business. Reinsurance does not extinguish the Company's primary liability under the policies written. The Company regularly evaluates whether a provision for reinsurance is needed by evaluating the admissibility, collectability and collateralization of reinsurers' balances in accordance with the NAIC SAP. A provision for reinsurance is established, as appropriate, and this liability is netted against the reported reinsurance recoverable.

Indemnification

The Company may also participate in various indemnification mechanisms, including industry pools and facilities, which are reimbursement mechanisms that assess participating insurers for expected claims, reimburse participating insurers for qualifying paid claims and may permit participating insurers to recoup amounts assessed directly from insureds. Indemnification recoverables are backed by the financial resources of the property and casualty insurance company market participants. Indemnification recoverables are considered collectible based on the industry pool and facility enabling legislation.

The amounts reported in the Assets page as reinsurance and indemnification recoverables include amounts paid and due from reinsurers and indemnitors. Reserves are reported net of amounts expected to be recovered from reinsurers and indemnitors on losses and loss adjustment expense reserves that have not yet been paid. Reinsurance and indemnification recoverables on unpaid losses are estimated based upon assumptions consistent with those used in establishing the liabilities related to the underlying contract. Reinsurance and indemnification premiums are generally reflected in income in a manner consistent with the recognition of premiums on the associated contracts. For catastrophe coverage, the cost of reinsurance premiums is recognized ratably over the contract period to the extent coverage remains available. Certain catastrophe agreements are subject to reinstatement premiums. Reinstatement premium is earned over the period from the reinstatement of the limit to the expiration of the agreement.

Income taxes

The income tax provision is calculated under the liability method. Deferred tax assets ("DTAs") and deferred tax liabilities ("DTLs") are recorded based on the difference between the statutory financial statement and tax bases of assets and liabilities at the enacted tax rates. The net change in DTAs and DTLs is applied directly to unassigned surplus. The nonadmitted portion of gross DTAs is determined by applying the rules prescribed by SSAP No. 101, *Income Taxes* ("SSAP No. 101").

In addition, the company uses the following accounting policies:

- (1) Short-term investments - No Significant Changes

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

- (2) Bonds with an NAIC designation of 1 through 5, including LBASS and excluding SVO-identified investments, are reported at amortized cost using the effective yield method. Bonds with an NAIC designation of 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. The Company's bond portfolio also includes SVO-identified investments, which are reported at fair value. Changes in fair value of SVO-identified investments are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.
- (3) Common stocks - No Significant Changes
- (4) Preferred stocks - No Significant Changes
- (5) Mortgage loans - No Significant Changes
- (6) Loan-backed securities are reported at either amortized cost using the interest method or, if non-investment grade, at the lower of amortized cost, fair value or at the present value of future cash flows. The retrospective adjustment method is used to value all securities, except for interest only securities, where the yield had become negative, that are valued using the prospective method.
- (7) Investments in subsidiaries, controlled and affiliated entities - No Significant Changes
- (8) Investments in joint ventures, partnerships and limited liability companies - No Significant Changes
- (9) The Company does not hold derivatives in its investment portfolio.
- (10) Investment income as a factor in the premium deficiency calculation - No Significant Changes
- (11) Liabilities for losses and loss/claim adjustment expenses - No Significant Changes
- (12) Changes in capitalization policy - No Significant Changes
- (13) Pharmaceutical rebate receivables - Not Applicable

D. Going Concern

Based upon its evaluation of relevant conditions and events, management did not have substantial doubt about the Company's ability to continue as a going concern as of September 30, 2022 or December 31, 2021.

2. Accounting Changes and Corrections of Errors - No Significant Changes

3. Business Combinations and Goodwill - Not Applicable

4. Discontinued Operations - Not Applicable

5. Investments

- D. Loan-Backed Securities

- (1) Prepayment assumptions for LBASS were obtained from external sources and, if not available, developed internally.
- (2) Loan-backed and structured securities with a recognized other-than-temporary impairment (OTTI) - None
- (3) Securities held that were other-than-temporarily impaired due to the present value of cash flows expected to be collected was less than the amortized cost of securities - None
- (4) All impaired securities for which an OTTI has not been recognized in earnings as a realized loss

Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following table summarizes gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position as of September 30, 2022.

- a. The aggregate amount of unrealized losses:

1. Less than 12 months..... \$..... (3,051)

2. 12 months or longer.....

- b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months..... \$..... 120,125

2. 12 months or longer.....

- (5) The following table summarizes the gross unrealized losses by unrealized loss position and credit quality as of September 30, 2022.

LBASS with unrealized loss position less than 20% of amortized cost ⁽¹⁾⁽²⁾	Investment Grade	Below Investment Grade	Total
	\$ (2,171)	\$ 0	\$ (2,171)

(1) Substantially all below investment grade LBASS have been in an unrealized loss position for less than twelve months.

(2) Related to LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggested that these securities did not pose a high risk of being other-than-temporarily impaired.

Notes to the Financial Statements

5. Investments (Continued)

Investment grade is defined as a security having an NAIC designation of 1 or 2, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency, or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third-party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of September 30, 2022, the Company had not made the decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of September 30, 2022, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

9. Income Taxes

The Inflation Reduction Act of 2022 ("Act") which contains several tax-related provisions, was signed into law during the reporting period on August 16, 2022. The Act creates a 15% corporate alternative minimum Tax ("CAMT") on certain large corporations, effective beginning in 2023. While, on a consolidated group basis, the Company will be required to compute CAMT starting in 2023, the Company has not included the impact of the CAMT for the third quarter 2022 statutory statement, in evaluating the admissibility of statutory deferred tax assets because a reasonable estimate cannot be made.

A. Components of the Net Deferred Tax Asset/(Liability)

The application of SSAP No. 101 requires the Company to evaluate the recoverability of DTAs and to establish a statutory valuation allowance adjustment ("valuation allowance") if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and DTLs; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid an operating loss or tax credit carryforward from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs, net of the valuation allowance, will be realized. The Company did not record a valuation allowance as of September 30, 2022 or December 31, 2021.

20. Fair Value Measurements

A. Fair Value Measurement

Fair value is defined, per SSAP No. 100R, *Fair Value* ("SSAP No. 100R"), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value (NAV) as a practical expedient to determine fair value.

(1) Fair value measurements at reporting date

1. The following tables summarize the Company's assets measured and reported at fair value in the Assets page as of September 30, 2022

Notes to the Financial Statements

(2) Fair value measurements in Level 3 of the fair value hierarchy

The following table presents the rollforward of Level 3 assets measured and reported at fair value:

Description	Beginning balance as of 07/01/2022	Transfers Into Level 3	Transfers Out of Level 3	Total Gains and (Losses) Included in Net Income	Total Gains and (Losses) Included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance at 09/30/2022

(3) The Company consistently follows its policy for determining when transfers between levels are recognized. The policy about the timing of recognizing transfers into Level 3 is the same as that for recognizing transfers out of Level 3.

(4) In determining fair value, the Company principally uses the market approach which generally utilizes market transaction data for the same or similar instruments. To a lesser extent, the Company uses the income approach which involves determining fair values from discounted cash flow methodologies. For the majority of Level 2 valuations a combination of the market and income approaches is used.

Listed below is a summary of the significant valuation techniques for assets measured and reported at fair value.

Level 2 measurements

Bonds – Industrial and miscellaneous bonds consists of corporate bonds, including those that are privately placed. The primary inputs to the valuation for publicly traded corporate bonds include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Privately placed corporate bonds are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer.

Unaffiliated common and perpetual preferred stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are not active.

Level 3 measurements

Unaffiliated common stocks - The primary inputs to the valuation include quoted prices or quoted net asset values for identical or similar assets in markets that are less active relative to those markets supporting Level 2 fair value measurements.

(5) The Company did not utilize derivatives in 2022.

B. Other Fair Value Disclosures - Not Applicable

C. Fair Values for All Financial Instruments by Level 1, 2 and 3

Presented below are the aggregate fair value estimates and admitted values of financial instruments as of September 30, 2022:

Cash Equivalents	959,897	959,897	959,897				
Short-Term Investments							

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

The fair value of bonds in Level 1 is based on unadjusted quoted prices for identical assets in active markets the Company can access. The fair value of publicly traded bonds in Level 2 is based upon quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads. Non-publicly traded bonds in Level 2 are valued using a discounted cash flow model that is widely accepted in the financial services industry and uses market observable inputs and inputs derived principally from, or corroborated by, observable market data. The primary inputs to the discounted cash flow model include an interest rate yield curve, as well as published credit spreads for similar assets in markets that are not active that incorporate the credit quality and industry sector of the issuer. The fair value of LBASS in Level 2 is primarily based on valuation models utilizing quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, collateral performance and credit spreads to determine fair value. The fair value of LBASS in Level 3 is based on internal models with non-market observable inputs. The fair value of corporate bonds in Level 3 is primarily based on non-binding broker quotes where the inputs have not been corroborated to be market observable. Other inputs for corporate bonds include an interest rate yield curve, as well as published credit spreads for similar assets that incorporate the credit quality and industry sector of the issuer.

The fair value of unaffiliated common stocks in Levels 2 and 3 is based on the valuation methods described in Part A4 of this note.

The fair value of cash equivalents in Level 1 is based on unadjusted quoted prices or daily quoted net asset values for identical assets in active markets the Company can access. The fair value of cash equivalents in Level 2 is based on quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields and credit spreads.

The Company continues to closely monitor and proactively adapt to developments and changing conditions. Currently, it is not possible to reliably estimate the impact to the Company's operations, but the effects have been and could be material.

D. Business Interruption Insurance Recoveries - Not Applicable

E. State Transferable and Non-Transferable Tax Credits - Not Applicable

F. Subprime-Mortgage-Related Risk Exposure

(1) The Company identified it had exposure to subprime residential mortgage related risk in the form of asset-backed residential mortgage-backed securities ("ABS RMBS") as of September 30, 2022. The ABS RMBS portfolio included securities that were collateralized by mortgage loans issued to borrowers that cannot qualify for prime or alternative financing terms due in part to an impaired or limited credit history. It also included securities that were collateralized by certain second lien mortgages regardless of the borrower's credit profile. As of September 30, 2022, the ABS RMBS portfolio had net unrealized losses of \$326 due entirely to \$0 of unrealized gains and \$200 of unrealized losses. ABS RMBS securities were considered loan-backed and included in bonds in the Company's Asset page.

(2) Direct exposure through investments in subprime mortgage loans - None

(3) Direct exposure through other investments

The Company's direct exposure to other subprime investments is summarized as follows as of September 30, 2022:

G. Insurance-Linked Securities (ILS) Contracts

The Company and certain of its affiliated insurance companies were ceding insurers of eight ILS agreements and seven ILS agreements related to directly-written insurance risks as of September 30, 2022 and December 31, 2021, respectively.

As of September 30, 2022, the ILS placements provide \$1.45 billion of reinsurance limits (with \$1.43 billion remaining limit available) for qualifying losses in all states except Florida caused by "Named Peril Basis" events with no reinstatement of limits. The ILS placements were comprised of \$150 million, \$250 million, \$550 million (45.5% placed), and \$550 million (36.4% placed) placements providing occurrence only coverage; \$100 million (\$87 million remaining aggregate limit available), \$225 million (66.7% placed), and \$500 million (35% placed) placements providing occurrence and aggregate protection; and a \$500 million (35% placed) placement providing aggregate only coverage.

Notes to the Financial Statements

21. Other Items (Continued)

As of December 31, 2021, the ILS placements provide \$1.70 billion of reinsurance limits (with \$1.40 billion remaining limit available) for qualifying losses in all states except Florida caused by "Named Peril Basis" events with no reinstatement of limits. The ILS placements were comprised of \$150 million, \$400 million (62.5% placed), and \$250 million placements providing occurrence only coverage; \$500 million, \$400 million (75% placed, \$0 remaining aggregate limit available), \$100 million (\$97 million remaining aggregate limit available) placements providing occurrence and aggregate protection; and a placement providing an occurrence limit of \$225 million (66.7% placed) and aggregate limit of \$500 million (30% placed, available April 1, 2022).

Allstate declared catastrophes to personal lines property and automobile business can be aggregated to erode the aggregate retention and qualify for coverage under the aggregate limit. Recoveries are limited to our ultimate net loss from the reinsured event. Each agreement's contractual limit applies to AIC and its ceding affiliated property and casualty companies under the agreement as a group, and not separately to each ceding company. There were 46 and 42 ceding affiliated property and casualty companies under the agreement as a group as of September 30, 2022 and December 31, 2021, respectively. A ceding company's share of loss recovery under an agreement for a loss occurrence is based on the proportion of the ceding company's ultimate net loss for such loss occurrence to the total ultimate net loss incurred by AIC and its ceding affiliated property and casualty companies for the loss occurrence, and is limited to the ceding company's ultimate net loss. Reinsurance recoveries under the contract are limited to our ultimate net loss from a covered event subject to the contract's limit.

The table below reports all known ILS involvements that would likely be used to satisfy the Company's reinsurance agreements. The term "Aggregate Maximum Proceeds", as listed in the table, represents the aggregate of the contract limits of all of the Company's outstanding ILS contracts.
