Unpaid claims and claims adjustment expenses represent management's best estimate of the ultimate net cost of all reported and unreported claims, less the estimated amount recoverable from claim overpayments and subrogation. The unpaid claims liability is actuarially estimated based on a review of historical claim payment patterns and claim trends. The estimates are subject to the effects to trends in claim severity and frequency, and a reasonable provision for adverse development has been incorporated in management's best estimate. Although considerable variability is inherent in such estimates, management believes that the amounts reported for unpaid claims and claims adjustment expenses are adequate. The estimates are continually reviewed and adjusted as necessary as experience develops or new information becomes known; such adjustments are included in current operations.

(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period

The Arrangement has made no modifications to its capitalization policy.
