NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

The accompanying financial statements of Safe Auto Insurance Company ("the Company") have been prepared on the basis of accounting practices prescribed or permitted by the Insurance Department of the State of Ohio. The Insurance Department of the State of Ohio recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below.

B. The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts in these financial statements and notes. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates

C. Listed below is a summary of the accounting policies that materially affect the financial statements.

Investments

Bonds with an NAIC designation of 1 or 2, including loan-backed and structured securities ("LBASS") and excluding Securities Valuation Office ("SVO")-identified investments, are reported at amortized cost using the effective yield method. Bonds with an NAIC designation of 3 through 6 are reported at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus as an unrealized capital loss. In general, LBASS utilize a multi-step process for determining carrying value and NAIC designation in accordance with SSAP No. 43R, *Loan-backed and Structured Securities*. Effective December 31, 2022, the SVO may assign an NAIC designation for use in determining carrying value for certain LBASS. The Company's bond portfolio also includes SVO-identified investments, which are reported at fair value. Changes in the fair value of SVO-identified investments are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Redeemable preferred stocks are reported at cost, amortized cost or the lower of cost, amortized cost or fair value, depending on the assigned NAIC designation. Perpetual preferred stocks are reported at fair value or the lower of cost or fair value depending on the assigned NAIC designation. Unaffiliated common stocks are reported at fair value. For preferred stocks reported at fair value and unaffiliated common stocks, the differences between amortized cost or cost and fair value are recorded as a change in net unrealized capital gains (losses), which is a component of unassigned surplus.

Common stock investments in insurance subsidiaries domiciled in the United States are recorded based on the underlying statutory equity of the subsidiary. Common stock investments in foreign insurance subsidiaries are recorded based on the underlying accounting principles generally accepted in the United States of America ("GAAP") equity from audited GAAP financial statements adjusted for items described in SSAP No. 97, Investments in Subsidiary, Controlled and Affiliated Entities.

Investments in real estate are reported at depreciated cost less encumbrances or the lower of depreciated cost or fair value, less encumbrances and estimated cost to sell the property.

Cash equivalents are reported at fair value or amortized cost. Cash equivalents reported at amortized cost are readily convertible into known amounts of cash and so near their maturity that they present an insignificant risk of change in value because of changes in interest rates.

Short-term investments are reported at amortized cost.

Other invested assets consist of investments in joint ventures, partnerships, limited liability companies, low income housing tax credit ("LIHTC") property investments, collateral loans and surplus notes. Investments in joint ventures, partnerships and limited liability companies are generally reported based on the underlying audited GAAP equity of the investee, with undistributed earnings or losses reflected in unassigned surplus as a change in net unrealized capital gains and losses and, are generally recognized on a delay due to the availability of financial statements. Surplus notes are reported at amortized cost or the lower of amortized cost or fair value depending on the NAIC designation.

Investment income primarily consists of interest, dividends, income from limited partnership interests, rental income from real estate and amortization of any premium or discount. Interest is recognized on an accrual basis using the effective yield method and dividends are recorded at the ex-dividend date. Interest income for LBASS is determined considering estimated pay-downs, including prepayments, obtained from third-party data sources and internal estimates. Actual prepayment experience is periodically reviewed, and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For LBASS of high credit quality with fixed interest rates, the effective yield is recalculated on a retrospective basis. For all others, the effective yield is recalculated on a prospective basis. In periods subsequent to the recognition of an other-than-temporary impairment ("OTTI") on a bond, including LBASS, the difference between the new amortized cost basis and the cash flows expected to be collected is accreted as interest income. Accrual of income is suspended for other-than-temporarily impaired bonds when the timing and amount of cash flows expected to be received is not reasonably estimable. Accrual of income is suspended for mortgage loans and bank loans that are in default or when the full and timely collection of principal and interest payments is not probable. Cash receipts on investments on nonaccrual status are generally recorded as a reduction of carrying value. Cash distributions received from investments in joint ventures, partnerships and limited liability companies are recognized in investment income to the extent that they are not in excess of the undistributed accumulated earnings attributable to the investee and the unrealized gain would be reversed. Any distributions that are in excess of the undistributed accumulated earnings attributable to the investee reduce the carrying amount of the investment.

NOTES TO FINANCIAL STATEMENTS

Realized capital gains and losses include gains and losses on investment sales and write-downs in value due to other than temporary declines in fair value. Realized capital gains and losses on investment sales are determined on a specific identification basis.

The Company has a comprehensive portfolio monitoring process to identify and evaluate each bond, including LBASS, and common and preferred stock, whose carrying value may be other-than-temporarily impaired. For each bond, excluding LBASS, in an unrealized loss position (fair value is less than amortized cost), the Company assesses whether management with the appropriate authority has made a decision to sell the bond prior to its maturity at an amount below its carrying value. If the decision has been made to sell the bond, the bond's decline in fair value is considered other than temporary and the Company recognizes a realized capital loss equal to the difference between the amortized cost and the fair value of the bond at the balance sheet date the assessment is made. If the Company has not made the decision to sell the bond, but it is probable the Company will not be able to collect all amounts due according to contractual terms, the bond's decline in value is considered other-than-temporarily impaired, and a write-down of the amortized cost to fair value is required. For securities with an NAIC designation of 3 through 6, unrealized losses that are not deemed other-than-temporarily impaired are reflected in the Company's unassigned surplus.

For LBASS, the Company assesses whether management with the appropriate authority has made a decision to sell each LBASS in an unrealized loss position or does not have the intent and ability to retain the LBASS for a period of time sufficient to recover the amortized cost basis. If either situation exists, the security's decline in value is considered other-than-temporarily impaired and the security is written down as a realized capital loss to fair value. If management has not made the decision to sell the LBASS and management intends to hold the security for a period of time sufficient to recover the amortized cost basis, the Company analyzes the present value of the discounted cash flows expected to be collected. If the present value of the discounted cash flows expected to be collected is less than the amortized cost, the security is considered other-than-temporarily impaired and the Company recognizes a realized capital loss for the difference between the present value of the discounted cash flows and the amortized cost. For securities with an NAIC designation of 3 through 6, unrealized losses that are not deemed other-than-temporarily impaired are reflected in the Company's unassigned surplus.

For common and preferred stocks, the Company considers various factors, including whether the Company has the intent and ability to hold the stock for a period of time sufficient to recover its cost basis. Where the Company lacks the intent and ability to hold to recovery, or believes the recovery period is extended, the stock's decline in fair value is other than temporary and the difference between the stock's cost and fair value is recognized as a realized capital loss. A decision to sell stock for an amount below its cost would be an other than temporary decline and a realized capital loss is recorded.

The Company's portfolio monitoring process includes a quarterly review of all securities to identify instances where the fair value of a security compared to its amortized cost (for bonds, including LBASS) or cost (for stocks) is below internally established thresholds. The process also includes the monitoring of other impairment indicators such as ratings, ratings downgrades and payment defaults. The securities identified, in addition to other securities for which the Company may have a concern, are evaluated for potential OTTI using all reasonably available information relevant to the collectability or recovery of the security. Inherent in the Company's evaluation of OTTI for these securities are assumptions and estimates about the financial condition and future earnings potential of the issue or issuer. Some of the factors that may be considered in evaluating whether a decline in fair value is other than temporary are: (1) the financial condition, near-term and long-term prospects of the issue or issuer, including relevant industry specific market conditions and trends, geographic location and implications of rating agency actions and offering prices; (2) the specific reasons that a security is in an unrealized loss position, including overall market conditions which could affect liquidity; and (3) the length of time and extent to which the fair value has been less than amortized cost or cost.

The Company does not hold derivatives in its investment portfolio.

The Company does not have a securities lending program.

The Company does not have any off-balance sheet commitments.

Premium revenue

Premiums are deferred and earned on a pro-rata basis over the policy period. The portion of premiums written applicable to the unexpired periods of the policies is recorded as unearned premiums. Premiums received in advance of the policies' effective dates are recorded as advance premiums. Premiums written and not yet collected and agents' balances are shown as a receivable, with balances older than 90 days generally nonadmitted. The Company regularly evaluates this receivable and establishes valuation allowances, as appropriate, for items less than 90 days.

Reserves for losses and loss adjustment expenses

Reserves for losses and loss adjustment expenses are the estimated amounts necessary to settle all reported and unreported claims for the ultimate cost of insured losses, based upon the facts in each case and the Company's experience with similar cases. These reserves are reported net of unpaid reinsurance recoverables and estimated amounts of salvage and subrogation. The establishment of appropriate reserves, including reserves for catastrophes, is an inherently uncertain and complex process. Reserve estimates are regularly reviewed and updated using the most current information available. Any resulting reestimates are reflected in the current Statement of Income.

Reinsurance

In the normal course of business, the Company seeks to limit aggregate and single exposure to losses on large risks by purchasing reinsurance. The Company may also use reinsurance to affect the disposition of certain blocks of business. Reinsurance does not extinguish the Company's primary liability under the policies written. The Company regularly evaluates whether a provision for reinsurance is needed by evaluating the admissibility, collectability and collateralization of reinsurers' balances in accordance with the NAIC SAP. A provision for reinsurance is established, as appropriate, and this liability is netted against the reported reinsurance recoverable.

Indemnification

The Company may also participate in various indemnification mechanisms, including industry pools and facilities, which are reimbursement mechanisms that assess participating insurers for expected claims, reimburse participating insurers for qualifying paid claims and may permit participating insurers to recoup amounts assessed directly from insureds. Indemnification recoverables are backed by the financial resources of the property and casualty insurance company market participants. Indemnification recoverables are considered collectible based on the industry pool and facility enabling legislation.

The amounts reported in the Assets page as reinsurance and indemnification recoverables include amounts paid and due from reinsurers and indemnitors. Reserves are reported net of amounts expected to be recovered from reinsurers and indemnitors on losses and loss adjustment expense reserves that have not yet been paid. Reinsurance and indemnification recoverables on unpaid losses are estimated based upon assumptions consistent with those used in establishing the liabilities related to the underlying contract. Reinsurance and indemnification premiums are generally reflected in income in a manner consistent with the recognition of premiums on the associated contracts. For catastrophe coverage, the cost of reinsurance premiums is recognized ratably over the contract period to the extent coverage remains available. Certain catastrophe agreements are subject to reinstatement premiums. Reinstatement premium is earned over the period from the reinstatement of the limit to the expiration of the agreement.

Income taxes

The income tax provision is calculated under the liability method. Deferred tax assets ("DTAs") and deferred tax liabilities ("DTLs") are recorded based on the difference between the statutory financial statement and tax bases of assets and liabilities at the enacted tax rates. The net change

NOTES TO FINANCIAL STATEMENTS

in DTAs and DTLs is applied directly to unassigned surplus. The nonadmitted portion of gross DTAs is determined by applying the rules prescribed by SSAP No. 101, *Income Taxes* ("SSAP No. 101").

3. There were no other-than-temporary impairments recorded as of December 31, 2022, or December 31, 2021.
4. Unrealized losses are calculated as the difference between amortized cost and fair value. They result from declines in fair value below amortized cost and are evaluated for OTTI. Every LBASS with unrealized losses was included in the portfolio monitoring process.

The following tables summarize gross unrealized losses and the fair value of LBASS by the length of time individual securities have been in a continuous unrealized loss position as of December 31, 2022, and December 31, 2021.

		<u>2022</u>	
a. The aggregate amount of unrealized losses:			
	1. Less than 12 months	\$	1,184
	2. 12 months or longer	\$	554
b. The aggregate related fair value of securities with unrealized losses:			
	1. Less than 12 months	\$	106,958
	2. 12 months or longer	\$	938
		<u>2021</u>	
a. The aggregate amount of unrealized losses:

	2. 12 months or longer	\$	-
b. The aggregate related fair value of securities with unrealized losses:			
	1. Less than 12 months	\$	12,643
	2. 12 months or longer	\$	-

5. The following table summarizes the gross unrealized losses by unrealized loss position and credit quality as of December 31, 2022.

	<u>Investment Grade</u>	<u>Below Investment Grade</u>	<u>Total</u>
LBASS with unrealized loss position less than 20% of amortized cost ⁽¹⁾⁽²⁾	\$ 2,171	\$ 0	\$ 2,171

⁽¹⁾ Substantially all below investment grade LBASS have been in an unrealized loss position for less than twelve months.

⁽²⁾ Related to LBASS with an unrealized loss position less than 20% of amortized cost, the degree of which suggested that these securities did not pose a high risk of being other-than-temporarily impaired.

Investment grade is defined as a security having an NAIC designation of 1 or 2, a rating of AAA, AA, A or BBB from S&P Global Ratings, a comparable rating from another nationally recognized rating agency, or a comparable internal rating if an externally provided rating is not available. Market prices for certain securities may have credit spreads which imply higher or lower credit quality than the current third-party rating. Unrealized losses on investment grade securities were principally related to an increase in market yields which may include increased risk-free interest rates and/or wider credit spreads since the time of initial purchase. The unrealized losses are expected to reverse as the securities approach maturity.

LBASS in an unrealized loss position were evaluated based on actual and projected collateral losses relative to the securities' positions in the respective securitization trusts, security specific expectations of cash flows and credit ratings. This evaluation also takes into consideration credit enhancement, measured in terms of: (1) subordination from other classes of securities in the trust that are contractually obligated to absorb losses before the class of security the Company owns, and (2) the expected impact of other structural features embedded in the securitization trust beneficial to the class of securities the Company owns, such as overcollateralization and excess spread.

As of December 31, 2022, the Company had not made the decision to sell and it was not more likely than not the Company would be required to sell LBASS with unrealized losses before recovery of the amortized cost basis. As of December 31, 2022, the Company had the intent and ability to hold LBASS with unrealized losses for a period of time sufficient for them to recover.

9. Income Taxes

The Inflation Reduction Act of 2022 ("Act") which contains several tax-related provisions, was enacted on August 16, 2022.

NOTES TO FINANCIAL STATEMENTS

The Act created a 15% corporate alternative minimum tax (“CAMT”) on certain large corporations, effective beginning in 2023. The controlled group of corporations of which the Company is a member has determined that it is considered an “applicable corporation” under the rules of CAMT, and as such, the controlled group is expected to be required to perform the CAMT computations. The controlled group of which the Company is a member has not determined as of the reporting date if it will be liable for CAMT in 2023. Therefore, the year-end 2022 financial statement does not include an estimated impact of the CAMT, because a reasonable estimate cannot be made.

The application of SSAP No. 101 requires the Company to evaluate the recoverability of DTAs and to establish a statutory valuation allowance adjustment (“valuation allowance”) if necessary to reduce the DTA to an amount which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. In evaluating the need for a valuation allowance the Company considers many factors, including: (1) the nature of the DTAs and DTLs; (2) whether they are ordinary or capital; (3) the timing of their reversal; (4) taxable income in prior carryback years as well as projected taxable earnings exclusive of reversing temporary differences and carryforwards; (5) the length of time that carryovers can be utilized; (6) unique tax rules that would impact the utilization of the DTAs; and (7) any tax planning strategies that the Company would employ to avoid an operating loss or tax credit carryforward from expiring unused. Although the realization is not assured, management believes it is more likely than not that the DTAs, net of the valuation allowance, will be realized. The Company did not record a valuation allowance as of December 31, 2022 or 2021.

20. Fair Value Measurements

A. Fair value is defined, per SSAP No. 100R, *Fair Value* (“SSAP No. 100R”), as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SSAP No. 100R identified three valuation techniques which are used, either independently or in combination, to determine fair value: (1) market approach; (2) income approach; and (3) cost approach. SSAP No. 100R also contains guidance about observable and unobservable inputs, which are assumptions that market participants would use in pricing an asset or liability. To increase consistency and comparability in fair value measurements, the fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels: 1, 2 and 3. The hierarchy for inputs used in determining fair value maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that observable inputs be used when available. Certain assets are measured utilizing net asset value (NAV) as a practical expedient to determine fair value.

The Company and certain of its affiliated insurance companies were ceding insurers of nine ILS agreements and seven ILS agreements related to directly-written insurance risks as of December 31, 2022 and December 31, 2021, respectively.

As of December 31, 2022, the ILS placements provide \$1.55 billion of reinsurance limits (with \$1.53 billion remaining limit available) for qualifying losses in all states except Florida caused by “Named Peril Basis” events with no reinstatement of limits. The ILS placements were comprised of \$150 million, \$250 million, \$550 million (45.5% placed), \$550 million (36.4% placed), and \$400 million (25% placed) placements providing occurrence only coverage; \$100 million (\$79 million remaining aggregate limit available), \$225 million (66.7% placed), and \$500 million (35% placed) placements providing occurrence and aggregate protection; and a \$500 million (35% placed) placement providing aggregate only coverage.

There were 46 and 42 ceding affiliated property and casualty companies under the agreement as a group as of December 31, 2022 and December 31, 2021, respectively. A ceding company's share of loss recovery under an agreement for a loss occurrence is based

Reinsurance recoveries under the contract are limited to our ultimate net loss from a covered event subject to the contract's limit.

The table below reports all known ILS involvements that would likely be used to satisfy the Company's reinsurance agreements.
