B. Uses of Estimate in the Preparation of the Financial Statements

The preparation of financial statement in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities. It also requires disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies. Unearned premium reserves are established to cover the un-expired portion of premiums written. Such reserves are computed by pro rata methods for direct business.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred.

In addition, the company uses the following accounting policies:

- (1) Short-term investments are stated at amortized value using the interest method.
- (2) Bond investments are stated at amortized value using the interest method.
- (3-10) Not applicable
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

For measurement purposes, a 0.0 percent annual rate of increase in the per capita cost of covered health care benefits was assumed for the year ending December 31, 2022. Due to plan changes during 2013 & 2014, Ohio FAIR Plan's postretirement benefit obligation is no longer tied to the medical inflation rates since they are contributing a fixed amount each year to the plans.

- (8) The amount of the accumulated benefit obligation for defined benefit pension plans was (\$11,319,244) for the current year and (\$14,892,560) for the prior year.

- (9) The company has multiple non-pension postretirement benefit plans. The health care plans are contributory, with participants' contributions adjusted annually; the life insurance plan is noncontributory. The accounting for the health care plans anticipates future cost-sharing changes to the written plan that are consistent with the company's expressed intent to change retiree contributions each year to coincide with the changes in employees contributions.

- (10) The following estimated future payments, which reflect expected future service, as appropriate, are expected to be paid in the years indicated:

	Year Ended December 31,	Pension Trust	Group Medical & Life Plans	
2023.....	\$	888,963	750,722	138,241

Thereafter Total.....	\$	4,662,602	4,038,470	624,132

- (11) The Company expects to contribute approximately \$318,000 to its pension plan and \$112,269 its group medical and life plans in 2023. The expected 2023 pension contribution does not include any "catch-up" contribution.

B. The Company participates in the Pension Plan for Insurance companies (PPIO) who are responsible for managing the Company's pension plan assets. All investment decisions are made at the discretion of PPIO in accordance with their policies. Once money is contributed to the Plan, the money is invested by plan officials called fiduciaries. Specific investments are made in accordance with the Plan's investment policy. The investment policy of the Plan is to limit the impact of capital market fluctuations on the plan by investing in a mix of assets that aligns with the plan's liability profile. The total portfolio is expected to be less volatile than the market the vast majority of the time. The plan assets are invested in a mix of equity and fixed income investments subject to target allocation ranges. The target allocation range for domestic equity investments is 30% and 50%. The target allocation range for fixed income investments is between 50% and 70%. The target allocation range for international equity investments is between 0% and 10%. Remaining funds not invested in the categories above are to be invested in short-term cash equivalents such as money market funds. Target allocation ranges are guidelines, not limitations, and occasionally the Named Fiduciaries will approve allocations above or below a target range.

The plan assets are invested in various classes including U.S. equity securities, foreign equity securities, fixed income (debt) securities, and cash. Market values are used to measure the fair value of plan assets. To the best of our knowledge, PPIO does not invest in any assets that would need to be measured using significant unobservable inputs (Level 3). PPIO has not identified that there are any significant concentrations of risk within the plan assets.

D. Expected long-term rate of return on plan assets assumption is 4.50%. As defined under Accounting Standards Codification 715-30, this assumption represents the rate of return on plan assets reflecting the average rate of earning expected on funds invested or to be invested to provide for the benefits included in the benefit obligation. The assumption has been determined by reflecting expectations regarding future rates of return for the invested portfolio, with consideration given to the distribution of investments by asset class and historical rates of return for each individual asset class. This rate is used based on the investment allocation strategy implemented by PPIO, which is targeted at minimizing volatility.

E. Defined Contribution Plans

Insurance company employees are covered by a qualified defined contribution pension plan sponsored by the Company.

Contributions of up to 100% of 6 percent of each employee's compensation are made each year. The Company's contribution for the plan was \$119,085 and \$128,812 for 2022 and 2021, respectively. At December 31, 2022, the fair value of plan assets was \$6,019,995.45.

I. Impact of Medicare Modernization Act on Postretirement Benefits

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act includes the following two new features to Medicare Part D that could affect the measurement of the accumulated postretirement benefit obligation (APBO) and net periodic postretirement cost for the Plan:

- A federal subsidy, which is not taxable, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is at least actuarially equivalent to Medicare Part D; and
- The opportunity for a retiree to obtain a prescription drug benefit under Medicare.

The Company is unable to conclude whether the benefits provided by the Plan are actuarially equivalent to Medicare Part D under the Act. As a result, the effects of the Act on accumulated postretirement benefit obligation are not reflected in the financial statement or accompanying notes.

C. Items Measured and Reported at Fair Value by Levels 1, 2 and 3

The Company has categorized its assets that are reported on the balance sheet at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows:

Level 1 - Quoted Prices in Active Markets for Identical Assets: This category for items measured at fair value on a recurring basis includes short-term investments and cash equivalents. The estimated fair value of the equity securities within this category are based on quoted prices in active markets and are thus classified as Level 1.

Level 2 - Significant Other Observable Inputs: This category for items measured at fair value on a recurring basis includes bonds which are not exchange-traded. The estimated fair values of some of these items were determined by independent pricing services using observable inputs. Others were based on quotes from markets which were not considered actively traded.

Level 3 - Significant Unobservable Inputs: The Company has no assets measured at fair value in this category.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Net Practicable (Carrying Value)

The decrease in 2022 is a continued development from settling case-basis reserves established in prior years for amounts that were less than expected and a continued decrease in reported losses. No additional premiums or return premiums have been accrued as a result of the prior-year effects.

B. No significant changes in methodologies and assumptions used in calculating the liability for unpaid losses and loss adjustment expenses were made in 2022 by the Company.
