NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of UDC Ohio, Inc. (the "Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, and for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Ohio. The state has adopted certain prescribed accounting practices that differ from those found in NAIC SAP. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the year. Actual results could differ from those estimates.

C. Accounting Policy

Premiums billed to individual and group subscribers are recognized as revenue in the month in which subscribers are entitled to receive dental care. Uncollected premiums over 90 days past due are nonadmitted and excluded from surplus. The Company contracts with dentists (providers) for dental services to be provided to its subscribers. Provider capitation consists of monthly fees paid to providers and is expensed in the month in which the provider is obligated to render dental services. Emergency services to members while temporarily out of their provider's area, as well as specialty services not covered by capitation fees, are recorded as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost, which approximates fair value.
- (2) Bonds, mandatory convertible securities, and SVO-identified investments identified in SSAP No. 26R, not backed by other loans, are stated at amortized cost using the scientific method, except for those securities, which are other-than-temporarily impaired or where the NAIC rating has fallen to 6 and the fair value has fallen below amortized cost, in which case they are carried at fair value.
- (3) Common stocks are stated at fair value.
- (4) The Company does not have investments in preferred stocks.
- (5) The Company does not have investments in mortgage loans.
- (6) The Company does not have investments in loan-backed securities.
- (7) The Company does not own any shares of an upstream or intermediate parent or affiliate, either directly or indirectly.
- (8) The Company does not have investments in joint ventures, partnerships or limited liability companies.
- (9) The Company does not have investments in derivative instruments.
- (10) The Company does not have health premium deficiency liabilities at December 31, 2022. Anticipated investment income was not used in the calculation.
- (11) The reserve for costs expected to be incurred for services approved during the year, as well as costs incurred but not reported, are actuarial estimates based on historical claims data. The methods for making such estimates and for

9. Income Taxes

A. The application of SSAP No. 101 requires a company to evaluate the recoverability of deferred tax assets and to establish a valuation allowance, if necessary, to reduce the deferred tax asset to an amount, which is more likely than not to be realized. Considerable judgment is required in determining whether a valuation allowance is necessary, and if so, the amount of such valuation allowance. As a result of management's evaluation at December 31, 2022, management believes it is more likely than not that the deferred tax assets will not be realized. Therefore, the Company has recorded a valuation allowance against the gross deferred assets ("DTAs"), excluding the effects associated with its deferred tax liabilities ("DTLs"), as of December 31, 2022, and December 31, 2021.

1. The components of deferred tax assets ("DTAs") and deferred tax liabilities ("DTLs") as of December 31, 2022, and December 31, 2021, are as follows:

20. Fair Value Measurements

A. Assets Measured at Fair Value

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market, income and cost approaches. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

- (1) The Company did not hold assets measured at fair value as of December 31, 2022.
- (2) Consistent with Note 20(A)(1), since no assets were measured at fair value, no securities were categorized within Level 3 of the fair value hierarchy for the year ended December 31, 2022.
- (3) The Company had no transfers into or out of Level 3 during the statement year. Additionally, the Company consistently follows its policy for determining when transfers between levels are recognized.
- (4) The Company has categorized the fair value of its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded at fair value in the Company's balance sheet are categorized as follows:

Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market. The types of assets and liabilities utilizing Level 1 valuations include U.S. Treasury and agency securities and investments in publicly-traded mutual funds with quoted market prices.

Level 2 - Quoted prices in markets that are not active or significant inputs that are observable either directly or indirectly. Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets,
- Quoted prices for identical or similar assets or liabilities in non-active markets,
- Inputs other than quoted market prices that are observable, and
- Inputs that are derived principally from or corroborated by observable market data through correlation or other means.

The types of assets and liabilities utilizing Level 2 valuations generally include U.S. Government securities not backed by the full faith and credit of the U.S. Government, municipal bonds, structured notes and certain asset-backed securities ("ABS") including collateralized debt obligations, residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS"), certain corporate debt and certain private equity investments.

NOTES TO FINANCIAL STATEMENTS

Level 3 - Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. They reflect management's opinions regarding the assumptions a market participant would use in pricing the asset or liability. Generally, the types of assets and liabilities utilizing Level 3 valuations are certain ABS, RMBS, and CMBS, certain corporate debt, certain private equity investments and certain mutual fund holdings and certain derivatives.

There have been no significant changes made in valuation techniques for the statement year.

(5) The Company does not hold derivative instruments.

B. Presentation of Fair Value Information

The Company has combined fair value disclosure requirements from other accounting pronouncements within Note 20.

C. Aggregate Fair Value of all Financial Instruments

The following table presents the carrying amounts and estimated fair values of the Company's financial instruments as of December 31, 2022:

Type of financial instrument	Aggregate Fair Value	Carrying Value	Level 1
Financial assets:			
Debt securities	\$ 205,254	\$ 219,408	\$ 205,255
Cash, cash equivalents and short-term investments	632,836	632,836	632,836
Total financial assets	<u>\$ 838,090</u>	<u>\$ 852,244</u>	<u>\$ 838,091</u>

The Company did not have any Level 2 or Level 3 financial instruments.

The methods and assumptions that the Company uses in determining the estimated fair value of its financial instruments are summarized below:

Debt securities: The Company determines the fair value of its publicly-traded fixed maturity securities using three primary pricing methods: third-party pricing services, non-binding broker quotes and pricing models. Prices are first sought from third-party pricing services with the remaining unpriced securities priced using one of the other two methods. Third-party pricing services derive the security prices through recently reported trades for identical or similar securities with adjustments for trading volumes and market observable information through the reporting date. In the event that there are no recent market trades, pricing services and brokers may use pricing models to develop a security price based on future expected cash flows discounted at an estimated market rate using collateral performance and vintages. The Company generally does not adjust quotes or prices obtained from brokers or pricing services.

Cash, cash equivalents and short-term investments: The carrying value for cash, cash equivalents and short-term investments approximates fair value due to the short-term nature and liquidity of the balances.

D. Not Practicable to Estimate Fair Value

The Company held no financial instruments where it was not practicable to estimate fair value.

Therefore, there has been a \$6,860 favorable prior-year development since December 31, 2021 to December 31, 2022.
