There were no transfers into or out of Level 3 as of March 31, 2023.

(4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement

Level 1 - Valuation is based upon quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 - Valuation methodologies include quoted prices for similar assets and liabilities in active markets or quoted prices for identical, quote prices for identical or similar assets or liabilities in markets that are not active, or the Company may use various valuation techniques or pricing models that use observable inputs to measure fair value.

Level 3 - Valuation is based upon unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.
