NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

- A. Accounting Practices
The financial statements of Utica National Insurance Company of Ohio are presented on the basis of accounting practices prescribed or permitted by the Ohio Insurance Department.
The Ohio Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Ohio Insurance Laws. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The state of Ohio has adopted some practices that differ from NAIC SAP; however, none of those changes would impact the financial results of Utica National Insurance Company of Ohio.
A reconciliation of net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below.

The models combine the effects of interest rates, volatility, and pre-payment speeds based on various scenario (Monte Carlo) simulations with resulting effective analytics (spreads, duration, convexity) and cash flows on a monthly basis. Credit sensitive cash flows are calculated using a proprietary model which estimates future loan defaults in terms of timing and severity. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

Pricing Level 1 – Valuations based on unadjusted quoted prices in active markets for identical assets that our pricing sources have the ability to access. Since the valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant amount or degree of judgment.

Pricing Level 2 – Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.

Pricing Level 3 – Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are non-binding.
