ANNUAL STATEMENT FOR THE YEAR 2023 OF THE PROGRESSIVE EXPRESS INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Express Insurance Company (the “Company”) were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (“DOI”).

The DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the DOI. No deviations from NAIC statutory accounting practices (“NAIC SAP”) were used in preparing these statutory-basis financial statements as illustrated in the table below:

B. Use of Estimates in the Preparation of the Financial Statements

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense (“LAE”) reserves.

C. Accounting Policy

Premiums, Acquisition Costs, Other Income, and Nonadmitted Assets:

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company’s exposure to credit risk.

Acquisition costs, such as agents’ commissions, premium taxes, and other policy initiation costs, as well as advertising costs are charged to operations as incurred.

Other income includes finance and service charges collected on premiums receivable. This revenue is offset by finance and service charges ceded under the quota-share reinsurance agreement with United Financial Casualty Company (“UFCC”), an insurance affiliate domiciled in Ohio.

Certain assets designated as “nonadmitted assets,” in accordance with Statement of Statutory Accounting Principles (“SSAP”) No. 4, Assets and Nonadmitted Assets, are reported on page 2 - Assets in column 2. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, Capital and Surplus section.

Investment Policies:

(1) Cash, Cash Equivalents, and Short-term Investments

Cash and cash equivalents include bank accounts and short-term investments with original maturities of three months or less and securities acquired with remaining maturities of three months or less that are reported at amortized cost which approximates market value. Also includes money market mutual funds valued at fair value or net asset value (NAV) as a practical expedient.

Short-term investments include securities acquired within one year of maturity, excluding those with maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost which approximates market value.

(2) Bonds

Investment-grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider (“CRP”) designations and are reported at amortized cost using the scientific method which closely approximates the effective interest method. Non-investment-grade bond valuations are also based on NAIC designations or NAIC CRP designations and are reported at the lower of amortized cost or fair market value. Loan-backed and structured securities follow the guidance prescribed by SSAP No. 43R, Loan-backed and Structured Securities (“SSAP No. 43R”), for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.

(3) Common Stocks

Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market values based on active market closing quotations from a regulated exchange. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(4) Preferred Stocks

Nonredeemable preferred stocks are reported at fair market values and are not to exceed currently effective call price. Changes in the fair market values of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Investment-grade redeemable preferred stocks are reported at amortized cost, while non-investment-grade redeemable preferred stocks are reported at the lower of amortized cost or fair market value. The difference between the original cost and redemption value of the redeemable preferred securities is recognized using the scientific method, which closely approximates the effective interest method, over the lives of the respective issues and included in net investment gain.

NOTES TO FINANCIAL STATEMENTS

- (6) Loan-backed Securities
- Loan-backed and structured securities are accounted for as prescribed by SSAP No. 43R. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured debt securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends (see Note 5.D).

Repurchase Agreements and Reverse Repurchase Commitment Transactions:

The Company may enter into repurchase agreements in which it borrows cash by providing certain underlying securities as collateral for the arrangement. The cash borrowed is invested in cash equivalents and an offsetting liability is established. The cash equivalent investment maturities and the term of the borrowing arrangement on the collateralized securities match, eliminating duration risk exposure to the Company. The Company did not have any open repurchase agreements at either balance sheet date presented in the accompanying financial statements.

The Company may enter into reverse repurchase commitment transactions. In these transactions, the Company loans cash to an accredited bank and receives U.S. Treasury Notes pledged as general collateral against the cash borrowed. The Company chooses to enter into these transactions as rates on general collateral are more attractive than other short-term rates available in the market. The Company's exposure to credit risk is limited, as these internally managed transactions are typically overnight arrangements. The income generated on these transactions is calculated at the then applicable general collateral rates on the value of U.S. Treasury securities received. The Company has counterparty exposure on reverse repurchase agreements in the event of a counterparty default to the extent the general collateral security's value is below the cash which was delivered to acquire the collateral. The short-term duration of the transactions (primarily overnight investing) reduces that default exposure. The Company did not have any open reverse repurchase commitment transactions at either balance sheet date presented in the accompanying financial statements.

Fair Market Values, Realized Gains and Losses, and Other-Than-Temporary Impairment:

The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. In very rare cases, if none of the aforementioned primary sources are available, matrix pricing using the reporting entity's own market-based assumptions may be utilized. The approved methods for computation of fair market value are prescribed in the Securities Valuation Office Purposes and Procedures Manual.

Realized gains and losses on sales of securities are computed based on the first-in, first-out method.

The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for other-than-temporary impairment ("OTTI") requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43R). This evaluation reflects management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

When persuasive evidence exists that causes management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

Loss, LAE, and Premium Deficiency Reserves:

Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company reviews a large majority of its reserves by product/state subset combinations on a quarterly time frame, with the remaining reserves generally reviewed on a semiannual basis. A change in the Company's scheduled reviews of a particular subset of the business depends on the size of the subset or emerging issues relating to the product or state (see Note 25).

The Company does not anticipate investment income when evaluating the need for premium deficiency reserves (see Note 30).

Capitalization of Assets:

The Company has written capitalization policies for its various asset classes. The capitalization policy thresholds have not materially changed from the prior year.

- (1) The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings. The Company uses a retrospective adjustment methodology to revalue most loan-backed securities. For primarily interest-only securities, loan-backed securities below high investment-grade status (i.e., below AA-), and certain loan-backed securities with sub-prime loan exposure, the Company uses the prospective method.
- (2) The Company has not recorded an OTTI for loan-backed and structured debt securities during the current year.
- (3) The Company has not recorded an OTTI for loan-backed and structured debt securities during the current year.
- (4) The Company does not own loan-backed or structured debt securities in an unrealized loss position.
- (5) Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

B. Assessments

(1) Nature and Amount of Assessments

The Company is subject to state guaranty fund and other assessments by the states in which it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2023 and 2022, the Company's estimated liability for state guaranty fund and other assessments was \$32,215 and \$26,305, respectively.

As of December 31, 2023 and 2022, the Company's estimated liability for various surcharges was \$33,606 and \$28,734, respectively.

The Company is named as defendant in various lawsuits arising out of its insurance operations. All legal actions relating to claims made under insurance policies are considered by the Company in establishing its loss and LAE reserves. The Company also has potential exposure relating to lawsuits due to its participation in a management agreement for which it is allocated litigation expenses (see Note 10).

The pending lawsuits summarized below are in various stages of development, and the outcomes are uncertain or, if probable and estimable, are accrued in these statutory-basis financial statements. At the statement date, except to the extent an accrual has been established, the Company does not consider the losses from these pending cases to be both probable and estimable and is unable to estimate a range of loss at this time.

There was an individual lawsuit challenging the Company's practice in Florida of adjusting personal injury protection and first-party medical payments.

There were two putative class action lawsuits challenging the Company's reimbursement to Medicare Advantage Plans or Medicaid on first party and/or third-party medical claims and settlements with insureds and claimants.

NOTE 20 Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

(1) Fair Value Measurements by Levels 1, 2, and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

Determining the fair value of the investment portfolio is the responsibility of the Company's management. As part of the responsibility, management evaluates whether a market is distressed or inactive in determining the fair value for the Company's portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market. Based on this evaluation, management concluded that there was sufficient activity related to the sectors and securities for which they obtained valuations.

Certain securities are carried at fair market value in the statutory financial statements. Other securities are periodically measured at fair value, such as when impaired, or for certain bonds which are carried at the lower of amortized cost or fair market value.

See Note 1.C for further information regarding methods used to determine fair market value.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

(2) Fair Value Measurements in Level 3 of the Fair Value Hierarchy

Not applicable

(3) Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

Additionally, securities that were determined to have an indirect subprime exposure were also reviewed as part of the OTTI process.

The Company's management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the subprime mortgage loan disruption, as well as broader credit and financial market events.
