NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern
A. Accounting Practices

The financial statements of Utica National Insurance Company of Ohio are presented on the basis of accounting practices prescribed or permitted by the Ohio Insurance Department.

The Ohio Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Ohio Insurance Laws. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio. The state of Ohio has adopted some practices that differ from NAIC SAP; however, none of those changes would impact the financial results of Utica National Insurance Company of Ohio.

A reconciliation of net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Ohio is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in compliance with Statutory Accounting Principles (SAP) requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the balance sheet date as well as reported amounts of revenue and expenses during the period covered by the income statement. The actual results could vary from these estimates.

C. Accounting Policy

Premiums are earned over the term of related policies and reinsurance contracts. Unearned premium reserves are established to cover the non-expired portion of premiums written and are computed on a daily pro-rata basis. Expenses incurred with the acquisition of new insurance business, including acquisition cost of commissions, are charged to operations as they are incurred. Expenses incurred are reduced by allowances for ceding commissions as per reinsurance contracts.

The Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost, or the lower of amortized cost or fair market value if defined by the NAIC as non-investment grade (rated 3 through 6).
- (2) Bonds not backed by loans are carried at amortized cost using the scientific yield to worst method. Bonds that are defined by the NAIC as non-investment grade (rated 3 through 6) are carried at the lower of amortized cost or fair market value.
- (3) Common stock is stated at market value.
- (4) Preferred stocks are stated at cost or market value based on their NAIC designation.
- (5) Mortgage loans on real estate are stated at the aggregate carrying value less accrued interest.
- (6) Loan-backed securities are stated at either amortized cost, or the lower of amortized cost or fair market value if defined by the NAIC as non-investment grade (rated 3 through 6). The prospective adjustment method is used to value all loan-backed securities.
- (7) The Company does not have any investments in subsidiaries, controlled or affiliated companies.
- (8) The Company has no ownership interests in joint ventures, partnerships or limited liability companies.
- (9) The Company does not own any derivatives.
- (10) The Company anticipates investment income as a factor in the premium deficiency calculation.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company does not have any pharmaceutical rebate receivables.

D. Loan-Backed Securities

(1) Our asset manager uses a proprietary model for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage-backed and asset-backed securities with inputs from major third party data providers. The models combine the effects of interest rates, volatility, and pre-payment speeds based on various scenario (Monte Carlo) simulations with resulting effective analytics (spreads, duration, convexity) and cash flows on a monthly basis. Credit sensitive cash flows are calculated using a proprietary model which estimates future loan defaults in terms of timing and severity. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.
