NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of All America Insurance Company are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining solvency under the Ohio Insurance Law. The Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio. The Commissioner of Insurance has the right to permit specific practices that deviate from prescribed practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Direct, assumed, and ceded premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance. Premiums receivable are primarily due from agents and policyholders are charged off when specific balances are determined to be uncollectible.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest, dividends, and rental income reduced by investment related expenses. Rental income includes an imputed rent charge for the Company's occupancy of its own buildings. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed, or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other-than-temporary.

In addition, All America Insurance Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds, mandatory convertible securities, and SVO-Identified investments identified in SSAP No. 26R are stated at amortized cost using the interest method.
- (3) Common stocks are stated at market value except investments in stocks of uncombined subsidiaries and affiliates in which All America Insurance Company has an interest of 20% or more are carried on the equity basis.
- (4) Preferred stocks are stated in accordance with the guidance provided in SSAP No. 32.
- (5) All America Insurance Company holds no mortgage loans on real estate.
- (6) Loan-backed securities are stated at amortized cost. Prepayment assumptions for loan-backed bonds and structured securities are obtained from dealer surveys. These assumptions are consistent with the current interest rate and economic environment. The prospective adjustment method is used to value these securities.

Notes to Financial Statements

- (7) All America Insurance Company owns 100% of the common stock of Central Insurex Agency, Inc., an inactive surplus and excess lines insurance agency. All America Insurance Company owns 100% of the common stock of CAFCO, Inc., an inactive premium finance company. Stocks held in all subsidiaries are carried at their Admitted Asset Equivalent.

Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12)The Company has not modified its capitalization policy from the prior period.

- (1) The Company uses Clearwater Analytics for investments reporting. For fixed-rate agency mortgage-backed securities, Clearwater Analytics calculates prepayment speeds utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs). MIMs are derived from a semi-monthly dealer-consensus survey of long-term prepayment projections. For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody’s Analytics. Moody’s applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody’s projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors’ models.
- (2) Securities with a recognized other-than-temporary impairment – N/A, NONE

The Company asserts that it is has the intent and ability to hold securities long enough to allow the cost basis of these securities to be recovered. The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value framework as described below. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Company has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets and other inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Notes to Financial Statements

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.
