NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern
A. Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (ODI).

The ODI recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted accounting practices by the State of Ohio.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- (1) All short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at either amortized cost, using the scientific interest method or the lower of amortized cost or fair market value. The company holds no SVO-Identified bond ETFs reported on Schedule D-1.
- (3) Unaffiliated common stocks are stated at fair market value. The Company has no subsidiaries or affiliates in which the company has an interest of 20% or more.
- (4) Preferred stocks are reported at a value based on their NAIC designation by the Securities Valuation Office (SVO) and the related net unrealized capital gains (losses) are reported in unassigned surplus along with any adjustment for federal income taxes. Redeemable preferred stocks are stated at amortized cost using the interest method. RP1-RP2 designations are stated at book value. RP3-RP6 designations are stated at lower of book or fair value. P1-P2 designations are stated at fair value and preferred stocks rated NAIC 3 or lower are stated at the lower of cost or fair market value.
- (5) The Company has no mortgage loans.
- (6) Loan-backed securities are stated at either amortized cost, using the interest method or the lower of amortized cost or fair market value. The retrospective adjustment method is used to value all securities except for interest only securities, EITF 99-20 eligible securities or securities where the yield has become negative are valued using the prospective method.
- (7) The Company has no subsidiaries. The Company's insurance affiliate is Casco Indemnity Company and United Mutual Insurance Company and the Company's non-insurance affiliates are Centurion Financial, Inc., Ohio United Agency, Inc., and United Premium Budget Service, Inc. The Company is wholly-owned by Ohio Mutual Insurance Company.
- (8) The Company has no ownership interest in any significant joint ventures, partnerships or limited liability companies.
- (9) The Company owns no derivative instruments.
- (10) The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53, Property-Casualty Contracts-Premiums.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company does not engage in pharmaceutical rebate receivables.

D. Loan-Backed Securities

(1) Prepayment assumptions for mortgage-backed securities, collateralized mortgage obligations and other structured securities were generated using a purchased prepayment model. The prepayment model uses a number of factors to estimate prepayment activity including the time of year (seasonality), current levels of interest rates (refinancing incentive), economic activity (including housing turnover) and term and age of the underlying collateral (burnout, seasoning). On an ongoing basis, the rate of prepayment is monitored and the model is calibrated to reflect actual experience, market factors, and viewpoint.

(4) a) The aggregate amount of unrealized losses:

1. Less than 12 Months	\$ (75,755)
2. 12 Months or Longer	

b) The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$ 5,587,317
2. 12 Months or Longer	

(5) Management regularly reviews the value of the Company's investments. If the value of any investment falls below its cost basis, the decline is analyzed to determine whether it is an other-than-temporary decline in value. To make this determination for each security, the following is considered: (1) the length of time and the extent to which the fair value has been below cost, (2) the financial condition and near-term prospects of the issuer of the security, including any specific events that may affect its operations or earnings potential, and (3) management's intent and ability to hold the security long enough for it to recover its value. Management concluded that unrealized losses were not other-than-temporary on the basis that the Company had the ability and intent to hold the investments for a period of time sufficient for a forecasted market price recovery up to or beyond the cost of the investment. Also, in management's opinion, evidence indicating the cost of the investment was recoverable within a reasonable period of time outweighed evidence to the contrary in considering the severity and duration of the impairment in relation to the forecasted market price recovery.

NOTE 20 Fair Value Measurements

A. Fair value measurements for fixed income and equity securities are based on valuations from independent pricing services that have been approved and monitored periodically by a pricing policy committee.

Generally, the pricing services use a pricing methodology involving the market approach, including pricing models, which use prices and relevant market information regarding a particular security or securities with similar characteristics to establish a valuation. Under certain circumstances, if a vendor price is unavailable, a price may be obtained from a broker.

Investments issued one year or less to maturity, including short-term investments and cash equivalents (less than 90 days to maturity), are valued at amortized cost, which approximates fair value.

Fair Value Hierarchy:

Assets recorded at fair value are categorized based on an evaluation of the various inputs used to measure the fair value. Supporting documentation received from pricing vendors detailing the inputs, models and processes used in the vendor's evaluation process is used to determine the appropriate fair value hierarchy. Market Information obtained from brokers with respect to security valuations is also considered in the pricing hierarchy.

Fair value hierarchy Levels include:

Level 1: Fair value is observable in an active market and based on quoted prices in active markets for identical assets.

Level 2: Fair value is based on quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, or prices derived from valuation models that consider various observable market inputs in active markets. Prices obtained from independent pricing services are generally considered Level 2.

Level 3: Unobservable inputs reflecting assumptions that market participants would use, including assumptions about risk. Generally, prices obtained from a broker are considered Level 3.

Net Asset Value (NAV):

Under certain circumstances, as defined in SSAP 100R, an entity may use NAV as a practical expedient to measure fair value. Investments reported at NAV as a practical expedient are excluded from the fair value hierarchy described above. For reconciliation purposes, these investments are identified separately in Footnote 20A and 20C. As of the most recent measurement period, there are no assets that utilize NAV as a practical expedient to measure fair value.

Assets held at fair value as of the reporting date are summarized in the table below. The Company did not hold any liabilities at fair value as of the reporting date.

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value Common Stock				\$ 71,419	\$ 71,419
Total assets at fair value/NAV	\$ -	\$ -	\$ 71,419	\$ -	\$ 71,419

A reconciliation from the beginning balance to the reporting date for fair value measurements categorized within Level 3 of the fair value hierarchy is below.

Description	Beginning Balance at 01/01/2024	Transfers into Level 3	Transfers out of Level 3	Total gains and (losses) included in Net Income	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settlements	Ending Balance at 12/31/2024

Total Assets	\$ 62,277	\$ -	\$ -	\$ -	\$ 9,142	\$ -	\$ -	\$ -	\$ -	\$ 71,419

Transfers between levels are recognized on the actual date of the event or change in circumstances that caused the transfer.

6.1 What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
The Company does not write workers' compensation insurance.

6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:

6.3 What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The Company's primary protection from an excessive loss arising from a concentration of risk is a comprehensive catastrophe reinsurance program with top quality reinsurers. In addition, the Company utilizes an internal concentration of risks metric that should not be exceeded in a given geographic area. The Company has also implemented predictive software to better access the potential risk before and after an event.
