B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions and premium taxes, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost. Cash equivalents are carried at amortized cost or fair value.
- (2) Bonds with NAIC designation of 1 or 2, including loan-backed and structured securities ("LBSS") are reported at amortized cost using the effective yield method. Bonds with NAIC designation of 3 through 6 are carried at the lower of amortized cost or fair value with the difference reflected in unassigned surplus as unrealized capital loss.
- (3) Common stocks are stated at fair market value with changes in fair value recorded as a change in net unrealized capital gains (losses) in unassigned surplus, except for investments in stocks of wholly owned uncombined subsidiaries and affiliates, which the Company carries on the equity basis.
- (4) Redeemable preferred stocks are carried at amortized cost or the lower of cost or fair value, depending on the assigned NAIC designation. Perpetual preferred stocks are carried at fair value not to exceed the current effective call price.
- (5) Mortgage loans on real estate are stated at their unpaid principal balance.
- (6) The Company does not invest in loan-backed securities.
- (7) The Company has no related non-insurance companies.
- (8) Other invested assets consist of investments in joint ventures, partnerships and limited liability companies and surplus notes. The Company generally carries these interests based on the underlying audited GAAP equity of the investees.

(2) The manner in which the Board of Directors sets forth for allocating the consolidated Federal Income Tax ("FIT"):

The method of allocation among the affiliated companies is subject to a written agreement that covers all periods in which the companies are included in the consolidated FIT return filed by Kemper Corporation. The agreement states that each subsidiary agrees to pay Kemper Corporation the amount of FIT liability the subsidiary would pay to the Internal Revenue Service or receive from Kemper refunds they would receive from the IRS, as if they were separate companies filing separate federal income tax returns and were not part of a consolidated group. Each subsidiary's tax liability can be no greater or less than what the FIT liability would be if the subsidiary had filed a separate tax return based upon the rules provided by the Internal Revenue Code of 1986, as amended for all years in the consolidate period.

20. Fair Value Measurements

A. Fair Value Measurement

Fair value is defined per SSAP 100R as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Company is responsible for the determination of fair value of financial assets and liabilities, including the supporting assumptions and methodologies, and uses independent third-party valuation service providers, broker quotes and internal pricing methods to determine fair values. The Company obtains or estimates only one single quote or price for each financial instrument.

The Company uses a hierarchical framework for inputs to determine fair value which prioritizes the use of observable inputs and minimizes the use of unobservable inputs. Additionally, the Company categorizes fair value measurements based on the lowest level of input that is considered to be significant to the entire measurement. Assets measured and reported at fair value are categorized as follows:

(1) Fair value at reporting date

| Description for each class of asset or liability          | Level 1                   | Level 2         | Level 3         | Net Asset Value (NAV) | Total                     |
|-----------------------------------------------------------|---------------------------|-----------------|-----------------|-----------------------|---------------------------|
| a. Assets at fair value                                   |                           |                 |                 |                       |                           |

| b. Liabilities at fair value                              |                           |                 |                 |                       |                           |

Level 1: Unadjusted quoted prices for identical assets or liabilities in an active market.  
Level 2: Observable inputs other than Level 1: (a) quoted prices for similar assets or liabilities in active markets; (b) quoted prices for identical or similar assets or liabilities in markets that are not active; or (c) valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the asset or liability.  
Level 3: Assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Unobservable inputs reflect the Company's estimates of the assumptions that market participants would use in valuing the assets and liabilities.

(2) Fair value measurements in Level 3 of the fair value hierarchy - None

(3) Policy on transfers into and out of Level 3 - None

(4) Inputs and techniques used for Level 2 and Level 3 fair values - None

The Company uses third party valuation service providers which are leading, nationally recognized providers of market data and analytics and utilize proprietary models that vary by asset class and incorporate available trade, bid and other market information when developing valuation information in the form of a single fair value for individual bond or equity security. The inputs used by the valuation service providers include, but are not limited to, market prices from recently completed transactions and transactions of comparable securities, interest rate yield curves, credit spreads, liquidity spreads, sector groupings and benchmarking of like securities. Credit and liquidity spreads are typically implied from completed transactions and transactions of comparable securities. Valuation service providers also use proprietary discounted cash flow models that are widely accepted in the financial services industry and similar to those used by other market participants to value the same financial instruments. The valuation models take into account, among other things, market observable information as of the measurement date, as well as the specific attributes of the security being valued including its term, interest rate, credit rating, industry sector, and where applicable, collateral quality and other issue or issuer specific information. The Company classifies investments in US Treasury bonds, actively traded exchange traded funds, mutual funds, and public common stock as Level 1 securities. The Company classifies investments in public corporate bonds, states and political subdivisions bonds, collateralized loan obligations, mortgage-backed securities, convertible bonds, majority of preferred stocks and certain private placement bonds and common stock as Level 2 securities.

The Company classifies investments as Level 3 in the fair value hierarchy when specific inputs significant to the fair value estimation models are not market observable. Significant unobservable inputs used include credit profile, credit spread, and resulting market yield, which involve considerable judgment by management. This primarily occurs when fair value is derived using non-binding broker quotes where the inputs have not been corroborated to be market observable, or internal valuation estimates that use significant non-market observable inputs. The Company classifies investments in certain private placement bonds, private asset backed securities, and certain preferred stock are currently as Level 3 securities.

25. Changes in Incurred Losses and Loss Adjustment Expenses

A. Reasons for Changes in the Provision for Incurred Loss and Loss Adjustment Expenses Attributable to Insured Events of Prior Years

Property and casualty insurance reserves are estimates based on historical experience patterns and current economic trends. Actual loss experience and loss trends are likely to differ from these historical experience patterns and economic conditions. Loss experience and loss trends emerge over several years from the dates of loss inception. The Company monitors such emerging loss trends. Upon concluding, based on the data available, that an emerging loss trend will continue, the Company adjusts its property and casualty insurance reserves to reflect such trend. These changes in loss trend are reflected in the results of the period of change and included in the Company's financial statements net of reinsurance. The business to which this development relates is not retrospectively rated; therefore, they are not subject to premium adjustments. As the Company cedes 100% of its net losses to its affiliate, Trinity Universal Insurance Company, net reserves as of December 31, 2024 and December 31, 2023 were \$0, and the Company experienced no reserve development.
