Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements have been prepared in accordance with statutory accounting principles (SAP) prescribed or permitted by the Ohio Department of Insurance (ODI). The ODI requires that insurance companies domiciled in the state prepare their financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual, subject to deviations prescribed by the ODI. The Company had no permitted practices for the period ended December 31, 2024.

A reconciliation of the Company's net income (loss) and capital and surplus between SAP and practices prescribed and permitted by the State of Ohio is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums and annuity considerations are recorded as earned when received, adjusted for advance premiums and premiums deferred and uncollected. Changes in policy benefit reserves and policy acquisition and other period expenses are charged to operations as incurred. Reinsurance commission and expense allowances are recognized as revenue when realized in accordance with the contract terms.

Commissions and other acquisition costs are charged to operations as incurred instead of being deferred and amortized against the related policy premiums which are taken into income over the period covered by the policies.

In addition, the Company uses the following accounting policies:

- (1) Basis for Short-term Investments
- Short-term investments include all investments whose remaining maturities, at the time of acquisition, are one year or less and are stated at amortized cost, which approximates estimated fair value.
- (2) Basis for Bonds and Amortization Method
- Bonds not backed by other loans are stated at amortized cost using the interest method. The Company has no non-investment grade bonds.

20. Fair Value Measurements

A. Fair Value Measurement

(1) Fair value at reporting date

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

- Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).
- Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 - Inputs that are unobservable. Unobservable inputs reflect our subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

The Company does not have any assets or liabilities measured at fair value on the balance sheet.
