NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of The National Mutual Insurance Company (the “Company”) have been prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance requires insurance companies domiciled in Ohio to prepare their statements in conformity with the NAIC Annual Statement Instructions and Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the Ohio Department of Insurance. The Company has not implemented any accounting practices which are prescribed or permitted by the State of Ohio that differ from those found in the NAIC Accounting Practices and Procedures Manual.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles (SSAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at amortized cost, using the scientific yield to worst method. Non-investment grade bonds with NAIC designations 3 thru 6 are stated at the lower of amortized cost or fair value.
- (3) Unaffiliated common stocks are stated at fair value.
- (4) Redeemable preferred stocks with NAIC designations 1 thru 2 are stated at amortized cost while those that have a designation of 3 thru 6 are carried at the lower of amortized cost or fair value. Perpetual preferred stock with NAIC designations of 1 thru 2 are stated at fair value while those that have designations of 3 thru 6 are carried at the lower of amortized cost or fair value.
- (5) The Company has no mortgage loans.
- (6) Loan-backed securities are carried at amortized cost using the prospective method, which utilizes anticipated prepayment cash flow assumptions obtained from a widely accepted third party data provider and are based on interest rates and current economic conditions. Loan-backed securities rated 3 thru 6 by the NAIC are reported at the lower of amortized cost or fair value.
- (7) Investments in stock of subsidiaries are carried on the equity basis and subsequently non-admitted in accordance with SSAP No. 97 as audited statements of the subsidiaries are not obtained.
- (8) The Company has no investments in joint ventures, partnerships or limited liability companies.
- (9) The Company owns no derivatives.
- (10) The Company does not anticipate investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53. Property - Casualty Contracts - Premiums.
- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods used for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company does not offer health insurance policies and has no pharmaceutical rebate receivables.

NOTES TO FINANCIAL STATEMENTS

NOTE 20 Fair Value Measurements

A. Financial assets carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by Statement of Statutory Accounting Principle No. 100, Fair Value Measurements. Level 1 inputs in the hierarchy consist of unadjusted quoted prices for identical assets and liabilities in active markets. Level 2 inputs consist of quoted prices in active markets for similar assets or liabilities or quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Level 3 inputs consist of unobservable inputs (supported by little or no market activity) and reflect management’s best estimate of what hypothetical market participants would use to determine a transaction price at the reporting date.

b. Liabilities										
Total Liabilities	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Transfers in and out of Level 3 are made when NAIC designation changes require the security to be carried at fair value. Modeled prices are used when there is a lack of active trading in the security and transfers out occur when there is active trading in the market for the security.

(3) Level 3 inputs represent values for securities which are not actively traded in the market. The carrying values reflect management’s best estimate at the reporting date and transfers between levels are recognized on the actual date of an event or change in circumstances.

(4) Level 2 inputs include quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, spreads and yield curves.

Level 3 inputs are unobservable (supported by little or no market activity), including broker quotes that are non-binding, and reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset at the reporting date.

(5) The Company has no derivative assets or liabilities.

NOTE 26 Intercompany Pooling Arrangements

National Mutual Insurance Company (National) acts as the lead company in the reinsurance pooling agreement with the affiliated companies listed below; each is shown with its pool participation percentages.

The pool participation percentages remain unchanged from the prior year, and currently are:

NAIC #	Company	Percent
20176	Celina Mutual Insurance Company	36%
20184	National Mutual Insurance Company	34%
16764	Miami Mutual Insurance Company	30%

All lines of business are included in the pooling agreement and are ceded to National, the lead company. Facultative reinsurance is ceded on an individual company basis to non-affiliated reinsurers prior to pooling. Premiums for excess of loss and catastrophe treaties, where all pool companies are named participants, are ceded to non-affiliated reinsurers by National after the initial assumption of pooled business. Ceded losses are specifically identified and recorded in each company except for catastrophe losses which are accumulated in National after the initial assumption of pooled business. Catastrophe losses in excess of the aggregate retention are then ceded to non-affiliated reinsurers.

There are no discrepancies between entries regarding pooled business on the assumed and ceded reinsurance schedules of the lead company and corresponding entries on the assumed and ceded reinsurance schedules of other pool participants. At December 31, 2024, the Company recorded net balances of \$3,429,891 receivable from Celina, and \$1,988,187 payable to Miami for pooling of premiums, commissions, losses and loss adjustment expenses.

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:
The company uses the RMS and AIR/Verisk Models to obtain estimates of probable maximum losses using a series of simulated tornado/hail storms encompassing a range of probable United States events. These analyses included an Annual Probability of Non-Exceedance analysis and an average annual loss analysis. Concentrations of exposures with a higher potential exist in western Ohio and northern Indiana.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
The company maintains catastrophe protection and may cede 100% of cessions over \$10 million up to \$65 million. In addition, a property aggregate cover provides protection in excess of an aggregate and per occurrence deductible.

6.4

Does the reporting entity carry catastrophe reinsurance protection for at least one reinstatement, in an amount sufficient to cover its estimated probable maximum loss attributable to a single loss event or occurrence?

Yes [X] No []

14.2

If yes, please describe the method of allocating and recording reinsurance among the cedants:
The Company and two affiliated companies participate in the Celina Insurance Group Property & Casualty Pool with National Mutual Insurance Company acting as the lead company. Facultative reinsurance is ceded on an individual company basis. The premium balance after facultative cessions, is ceded to the lead company who calculates and cedes reinsurance premium to outside reinsurers for excess of loss and catastrophe reinsurance. The remaining net pooled premium is then assumed from the lead company based on each company's share of the pool. Allocation of excess of loss and catastrophe premiums to a non-pool affiliate is made based on its percentage of subject premium to the total. Ceded losses are specifically identified and recorded in each company except for catastrophe reinsurance with aggregate retention. Allocation of the aggregate retention and ceded loss in excess of the retention is prorated to company based on subject incurred losses.
