B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Direct, assumed, and ceded premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance. Premiums receivable are primarily due from agents and policyholders are charged off when specific balances are determined to be uncollectible.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists primarily of interest, dividends, and rental income reduced by investment related expenses. Rental income includes an imputed rent charge for the Company’s occupancy of its own buildings. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed, or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other-than-temporary.

In addition, All America Insurance Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds, mandatory convertible securities, and SVO-Identified investments identified in SSAP No. 26R are stated at amortized cost using the interest method.
- (3) Common stocks are stated at market value except investments in stocks of uncombined subsidiaries and affiliates in which All America Insurance Company has an interest of 20% or more are carried on the equity basis.
- (4) Preferred stocks are stated in accordance with the guidance provided in SSAP No. 32.
- (5) All America Insurance Company holds no mortgage loans on real estate.
- (6) Loan-backed securities are stated at amortized cost. Prepayment assumptions for loan-backed bonds and structured securities are obtained from dealer surveys. These assumptions are consistent with the current interest rate and economic environment. The prospective adjustment method is used to value these securities.
- (7) All America Insurance Company owns 100% of the common stock of Central Insurex Agency, Inc., an inactive surplus and excess lines insurance agency. All America Insurance Company owns 100% of the common stock of CAFCO,

Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.

For other mortgage-backed, loan-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody’s Analytics. Moody’s applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody’s projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors’ models.

20. Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

The Company has categorized its assets and liabilities that are reported on the balance sheet at fair value into the three-level fair value framework as described below. The framework for determining fair value is based on a hierarchy that prioritizes the inputs and valuation techniques used to measure fair value.

Fair values determined by Level 1 inputs use quoted prices in active markets for identical assets that the Company has the ability to access.

Fair values determined by Level 2 inputs use other inputs that are observable, either directly or indirectly. These Level 2 inputs include quoted prices for similar assets in active markets and other inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset.

(3) Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred, or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Level 2 Measurements

- U.S. Government Securities – The fair value of these instruments is based on quoted prices for identical securities or quoted prices for similar securities with adjustments as necessary made using observable inputs where markets are corroborated.
- Obligations of States, Political Subdivisions, Federal Agencies, and Corporate Debt Securities – The primary inputs to valuation include quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, and current spreads.

Level 3 Measurements

- Affiliated Common Stocks and Consolidated Controlled Subsidiaries – These investments are carried at their statutory equity value or as otherwise specified by the NAIC, with changes in statutory equity charged or credited to unassigned surplus. Investments in unconsolidated controlled subsidiaries are recorded on the equity method of accounting but are not admitted, as audited financial statements are not available.

- A. Reserves as of December 31, 2024 were \$106.3 million. As of December 31, 2024, \$36.3 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$68.7 million as a result of re-estimation of unpaid claims and claim adjustment expenses principally on Assumed Retrocessions, Workers Comp, Commercial Excess, and Commercial Auto lines of insurance. Therefore, there has been a \$1.4 million favorable prior-year development since December 31, 2023 to December 31, 2024. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. Included in this decrease, the Company experienced \$0 million of prior year claim development on retrospectively rated policies. However, the business to which it relates is subject to premium adjustments.
- B. There were no changes in the methodologies and assumptions used in calculating the liability for unpaid losses and loss adjusting expenses for the most recent reporting period.

26. Intercompany Pooling Arrangements

An intercompany pooling agreement exists between the following companies to share in premiums, losses, expenses and accounts receivable balances according to the percentages shown:

| Lead Company: | Central Mutual Insurance Company | 20230 | 84% |
| Affiliate:    | All America Insurance Company    | 20222 | 16% |

All lines of business are pooled. Each company can make facultative cessions to non-affiliated reinsurers prior to pooling. All treaty cessions are processed through the lead company after cessions are made from the affiliate. Both companies have contract rights under all non-affiliated treaty reinsurance contracts.

27. Structured Settlements

All America Insurance Company has purchased several annuities on which claimants are payees in settlement of claims under the Company's policies. The Company has obtained releases from the respective claimants acknowledging that receipt of the structured settlement under each annuity is full payment of the claim. A&D.

Does the Company have on the books, or has it ever written an insured for which you have identified a potential for the existence of, a liability due to asbestos losses?    Yes ( x )    No (   )

Does the Company have on the books, or has it ever written an insured for which you have identified a potential for the existence of, a liability due to environmental losses?    Yes ( x )    No (   )

The Company’s exposure arises primarily from the sale of general liability insurance, including the general liability portion of commercial package policies. However, smaller exposure also exists for these lines of insurance: workers’ compensation, homeowners, and commercial property.

The Company tries to estimate the full impact of the environmental and asbestos exposure by establishing full case basis reserves on all known losses and computing incurred but not reported loss reserves and allocated loss adjustment reserves based on previous experience.

The previous experience is combined with the other Company experience and analyzed in a combined manner as part of the regular loss reserve analysis.

The Company’s systems do not separate environmental and asbestos-related claims. Therefore, only combined environmental and asbestos-related loss data is available for presentation. Environmental claims represent the majority of the exposure included in the following numbers.

Notes to Financial Statements

The Company’s environmental and asbestos-related losses (including coverage dispute costs) for each of the five most recent calendar years were as follows:
