## NOTES TO FINANCIAL STATEMENTS

### **Note 1 - Summary of Significant Accounting Policies and Going Concern**

#### **A. Accounting Practices**

The Annual Statement of National Interstate Insurance Company (Company) has been prepared on the basis of accounting practices prescribed or permitted by the State of Ohio Department of Insurance. The Ohio Department of Insurance requires insurance companies domiciled in the state of Ohio to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the Ohio Department of Insurance. There are no deviations prescribed or permitted by the Ohio Department of Insurance utilized in these financial statements as shown below:

8. Statutory surplus, NAIC SAP	XXX	XXX	XXX	<u>\$ 505,054,537</u>	<u>\$ 480,506,229</u>

#### **B. Use of Estimates**

The preparation of financial statements in accordance with the NAIC *Accounting Practices and Procedures Manual* requires management to make estimates and assumptions that affect amounts reported in these financial statements and notes. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from the estimates and assumptions used.

#### **C. Accounting Policies**

Premiums that are written, assumed and ceded under the Company's insurance policies and reinsurance contracts are earned over the terms of the related policies and contracts on a pro rata basis. Unearned premiums are established as liabilities and represent the portion of premiums written, but not yet earned.

Unlike the recognition of premium revenue, expenses incurred while producing new insurance business, such as commissions and premium taxes, are charged to operations as incurred and ceding allowances received or receivable are credited to operations through reductions in expenses incurred.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at amortized cost using the interest method. Non-investment grade short-term investments are stated at the lower of amortized cost or fair value.
2. Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. The Company does not own any SVO Identified Exchange Traded Funds.
3. Common stocks are stated at fair value except for investments in subsidiaries – see Item 7.
4. Redeemable preferred stocks rated 1 and 2 are stated at amortized cost; perpetual preferred stocks rated 1 and 2 are stated at fair value; all others are stated at the lower of cost, amortized cost or fair value.
5. Mortgage loans on real estate are stated at the aggregate unpaid balance, net of unamortized discount.
6. For residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and other loan-backed and structured securities (LBASS), the NAIC has retained a third-party investment management firm to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based on not only the probability of loss, but also the severity of loss. Those RMBS, CMBS and LBASS securities that are not modeled but receive a current year NAIC Credit Rating Provider (CRP) rating equal to NAIC 1 and 2 are stated at amortized cost and NAIC 3-6 are stated at lower of amortized cost or fair value. Mandatory convertible bonds are stated at the lower of book value or fair value, regardless of the NAIC designation.
7. Investments in subsidiary and affiliated companies are stated as follows:

Three wholly owned insurance subsidiaries, National Interstate Insurance Company of Hawaii, Inc. (NIHI), Triumphe Casualty Company (TCC) and Vanliner Insurance Company (VIC) are stated at the statutory equity in net assets. TransProtection Service Company (TPSC), a wholly owned non-insurance subsidiary, is stated at GAAP equity value, but is nonadmitted.

8. Investments in limited partnerships are stated at the underlying audited GAAP equity value.
9. Investments in interest rate swaps are carried at fair value. (See Note 8).
10. The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.
11. Unpaid losses and loss adjustment expense reserves represent the estimated ultimate net cost of all reported and unreported losses incurred. The Company does not discount loss and loss adjustment expense reserves. The

## NOTES TO FINANCIAL STATEMENTS

---

reserves for unpaid losses and loss adjustment expenses include an amount determined using individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Those estimates are subject to the effects of trends in loss severity and frequency. Although considerable variability is inherent in such estimates and the ultimate liability may be in excess of or less than the amounts provided, management believes that the reserves for losses and loss adjustment expenses are adequate. The estimates are continually reviewed and adjusted as necessary as experience develops or new information becomes known; such adjustments are reflected in the period determined.

12. The Company has a capitalization policy for prepaid expenses and purchases of items such as office equipment, software/hardware, furniture, vehicles, other equipment and leasehold improvements. The predefined capitalization thresholds under this policy have not changed from those of the prior year.
13. The Company is a property and casualty insurance company only and does not write major medical and/or prescription drug coverage.

#### **Note 8 – Derivative Instruments**

A. As of December 31, 2024, the Company currently has a total of three swaps. The purpose of these swaps is to effectively convert a portion of the Company's floating-rate fixed maturity securities to fixed rates by offsetting the variability in cash flows attributable to changes in the applicable Secured Overnight Financing Rate (SOFR). The Company recognized a year-to-date unrealized gain of \$640,307 on the swaps.

These interest rate swaps are centrally cleared at the Chicago Mercantile Exchange (CME). The Company is required to post initial margin, daily maintenance margin, and settle all future cashflows with the CME. The Company does not expect any credit-related losses from this clearinghouse counterparty exposure.

The Company has no derivative instruments with financing premiums.

#### **Note 9 – Income Taxes**

In August 2022, the Inflation Reduction Act was enacted, and included a new corporate alternative minimum tax (CAMT). The CAMT, effective in 2023, is based on "adjusted financial statement income" of controlled corporate groups with three-year average financial statement income over \$1 billion ("applicable corporation").

In accordance with INT 23-03, American Financial Group, Inc. ("AFG"), of which the Company is a member, meets the financial statement income threshold to be treated as an applicable corporation and is not subject to a tax allocation agreement exclusion. As such, the Company is an applicable reporting entity and is required to perform CAMT calculations for the applicable period. Based on these calculations, the Company has determined that it will not be liable for CAMT in 2024 or the applicable period. The Company has not made any material modifications to the methodology used to project CAMT during the applicable period.

### G. Consolidated / Holding Company Plans

#### Employee Retirement Plan

AFG has established the American Financial Group, Inc. 401(k) Retirement and Savings Plan for the benefit of employees of AFG and its participating subsidiaries. Substantially all employees meeting minimum requirements regarding service are eligible to participate in this Plan. The Plan is a defined contribution plan in which participating employees are entitled to share in contributions made by the Company on their behalf. The Plan has three types of contributions, including: (1) Retirement Contributions made by the Company, (2) 401(k) Contributions made by participating employees, and (3) Matching Contributions made by the Company. The benefits for Retirement Contributions are based on the relationship of its total eligible compensation to total eligible compensation under the Plan for all participating subsidiaries. In addition, participating employees are permitted to make 401(k) Contributions to the plan. Matching Contributions may be made by the Company based on the amount of 401(k) Contributions made by the participating employees. Plan costs are funded as they accrue and vested benefits are fully funded. Both Retirement Contributions and Matching Contributions to the Plan are subject to the discretion of the Company. The Company has no liability for future contributions to the Plan. At December 31, 2024, the fair market value of the Plan's Retirement Contributions Account assets was \$481,456,825 and the fair market value of the Plan's Matching Contributions Account assets was \$473,622,242. The Company's share of the expense for the Plan during 2024 was \$3,292,182.

#### Postretirement Benefit Plan

The Company provides postretirement health care and life insurance benefits to employees meeting age and service requirements through plans sponsored by AFG. The retiree medical care plan is a contributory plan covering all eligible employees hired prior to 1993; employees hired after 1992 pay the full cost of retiree medical coverage. The Company has established a cap on the total amount of health care costs that are subsidized for the majority of current retirees. All eligible future retirees receive a flat dollar amount contributed to a Retiree Health Reimbursement Arrangement Account. The Company currently pays the full cost of life insurance coverage for past retirees, but no coverage is provided for new retirees after 2005. The medical plan is funded by monthly payments to a trust. Life insurance benefits are provided by insurance contracts. AFG has the right to modify or terminate either of these plans in the future. The Company has the right to terminate its participation at any time in the future.

The Company accrues its postretirement benefits over the period the employees qualify for such benefits. At December 31, 2024, the Company's accumulated postretirement benefit obligation was \$195,109 using a discount rate of 5.00% of which \$165,924 is currently accrued. Net postretirement costs for the year ended December 31, 2024 were \$25,815, which includes service cost, interest cost, and amortization of the transition obligation. The weighted average annual assumed rate of increase in health care cost trend rate is 6.50% for 2025 and is assumed to decrease gradually to 5.00% over 7 years and to remain at that level thereafter.

### **Note 20 – Fair Value Measurement**

#### A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

##### 1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

Level 3 inputs are unobservable inputs for the asset or liability.

The following table provides information as of December 31, 2024 about the Company's investments measured at fair value.

##### 3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between levels. The Company's policy is to recognize transfers in and transfers out as of the end of the reporting period.

##### 4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company's investment manager, AMMC (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads,

## NOTES TO FINANCIAL STATEMENTS

bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company's affiliated investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment professionals compare the valuation received to independent third party pricing sources and consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the pricing service to value specific securities.

Level 1 consists of publicly traded equity securities and highly liquid, direct obligations of the U.S. Government whose fair value is based on quoted prices that are readily and regularly available in an active market. Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and perpetual preferred stocks that are not actively traded. Level 3 consists of valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information. The Company primarily uses the market approach valuation technique for all investments.

### 5. Derivative Fair Values

The Company's derivative assets and liabilities are not material and are included in Note 20A. (1) - (4).

### B. Other Fair Value Disclosures

Net incurred losses during the current year	468,428,821	295,839,776

The foregoing reconciliation shows that \$264,321,135 was assumed by National Interstate Insurance Company due to an amendment in the Groups intercompany reinsurance pooling agreement that was effective January 1, 2024. Additionally, \$2,000,000 of unfavorable development from December 31, 2023 balances emerged in 2024 and \$1,050,000 of favorable development from the December 31, 2022 balances emerged in 2023. The unfavorable development that emerged in 2024 resulted from the combination of settling cases and adjusting current estimates of case and incurred but not reported (IBNR) reserves for amounts more than the case and IBNR estimates carried at the end of the prior year. Management of the Company evaluates case and IBNR estimates based on data from a variety of sources including the Company's historical experience and knowledge of various factors such as the historic loss experience of the industry, trends in claims frequency and severity, the Company's mix of business and claims processing procedures, legislative enactments, judicial decisions, legal developments in imposition of damages and changes and trends in general economic conditions, including the effects of inflation.

### B. Significant Change in Methodologies and Assumptions – See Note 26.

### **Note 26 – Intercompany Pooling Arrangements**

## NOTES TO FINANCIAL STATEMENTS

In March 2024, the Company received \$369,949,012 in cash and investments in settlement of the assumption of unearned premium reserves, loss and LAE reserves, and other liabilities from its insurance subsidiaries in accordance with the Amended and Restated Agreement. All 2024 activity was recorded based on the Amended and Restated Pooling Agreement.

Prior to the pooling of business, each participating company makes cessions, primarily excess of loss arrangements, to various other affiliated and non-affiliated reinsurers under terms of other reinsurance agreements. Each participant records its own Provision for Reinsurance based on its pre-pooling reinsurance activity. These liabilities are not shared with the other pooled participants. In the event that a reinsurance balance becomes uncollectible, the pool members will share the uncollectible balance in accordance with the pooling participation schedule. As of December 31, 2024, under the pooling agreement, the Company, the lead entity for pooling activity, has payable balances due to NIHI, TCC, and VIC of \$976,721, \$1,218,399, and \$6,704,086, respectively. These amounts are settled on a quarterly basis.
