NOTES TO THE FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory financial statements of Scottsdale Insurance Company (the Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Department of Insurance recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance law. The NAIC’s *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio. The Company has no statutory accounting practices that differ from NAIC SAP.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policies

Federal Income Taxes. The Company’s parent, Nationwide Mutual Insurance Company (Mutual), files a consolidated federal income tax return, which includes all eligible United States (U.S.) subsidiaries and affiliates. In this regard, the Company pays tax due on a consolidated basis. The included subsidiaries and affiliates pay to Mutual the amount of regular tax which would have been payable on a separate return basis. If the consolidated federal income tax return group is an Applicable Corporation and has a Corporate Alternative Minimum Tax (CAMT) liability, all members of the group will be treated as Applicable Corporations subject to CAMT. CAMT is paid by affiliates based on the ratio of the subsidiary’s CAMT liability to the total CAMT liabilities of all subsidiaries.

The Company provides for federal income taxes based on amounts the Company believes it will ultimately owe. Inherent in the provision for federal income taxes are estimates regarding the deductibility of certain items and the realization of certain tax credits. In the event the ultimate deductibility of certain items or the realization of certain tax credits differs from estimates, the Company may be required to change the provision for federal income taxes recorded in the financial statements, which could be significant. Management has used best estimates to establish reserves based on current facts and circumstances regarding tax exposure items where the ultimate deductibility is open to interpretation.

In accordance with guidance specified in the NAIC SAP, the Company utilizes the asset and liability method of accounting for income taxes. Under this method, deferred tax assets (DTA), net of any nonadmitted portion and statutory valuation allowance, and deferred tax liabilities (DTL) are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. DTA and DTL are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The change in deferred taxes, excluding the impact of taxes on unrealized capital gains or losses and nonadmitted deferred taxes, is charged directly to surplus.

Reinsurance Recoverables. The Company cedes insurance to other companies in order to limit potential losses and diversify its exposure. Such agreements do not relieve the Company of its primary obligation to the policyholder in the event the reinsurer is unable to meet the obligations it has assumed. The Company monitors the financial condition of reinsurers on an ongoing basis and reviews its reinsurance agreements regularly in an attempt to minimize its exposure to significant losses from reinsurer insolvencies. Reinsurance recoverables include amounts billed to reinsurers on losses paid. Estimates of amounts expected to be recovered from reinsurers that have not yet been paid on losses are estimated in a manner consistent with the claim liability associated with the underlying policy. Such reinsurance recoverables and reserve deductions partially offset claim costs in the Company’s statutory statements of operations and are included as an offset to losses and loss expense reserves in the accompanying statutory statements of admitted assets, liabilities and surplus. There were no contracts using deposit accounting as of December 31, 2024 and 2023.

Statutory accounting principles require recognition of a minimum liability for certain unsecured or overdue reinsurance recoverables. As of December 31, 2024 and 2023, the Company had conditional reserves of \$5,637,000 and \$6,695,200, respectively.

In addition, the Company uses the following accounting policies, when applicable:

- 1. Short-term investments consist of investments with maturities of twelve months or less at acquisition and are stated at amortized cost, which approximates fair value.
- 2. Bonds, excluding loan-backed and structured securities, are stated at amortized cost except those with a NAIC designation of “3” through “6”, which are stated at the lower of amortized cost or fair value. Amortization of premiums and discounts are calculated using the effective yield method. The Company does not hold any mandatory convertible securities or Securities Valuation Office (SVO) identified investments.
- 3. Unaffiliated common stocks are reported at fair value.
- 4. Redeemable preferred stocks are stated at amortized cost, except those with a NAIC designation of “3” through “6”, which are stated at the lower of amortized cost or fair value. Perpetual preferred stocks are stated at fair value, not exceeding any currently effective call price.

NOTES TO THE FINANCIAL STATEMENTS

5. Mortgage loans are carried at the unpaid principal balance adjusted for premiums and discounts, less an allowance for credit losses. The allowance for credit losses for mortgage loans reflects management’s best estimate of probable credit losses.
6. Loan-backed and structured securities (collectively, loan-backed securities) are stated at amortized cost or the lower of amortized cost or fair value in accordance with the provisions of Statement of Statutory Accounting Principles (SSAP) No. 43 Revised – *Loan-Backed and Structured Securities* and the *Purposes and Procedures Manual* of the NAIC SVO. The retrospective adjustment method is used to value loan-backed securities where the collection of all contractual cash flows is probable. For all other loan-backed securities, the Company uses the prospective adjustment method. Refer to Note 5(D) for a discussion of the other-than-temporary impairment policy for loan-backed securities.
7. Investments in subsidiary and affiliated companies are stated as follows:

The admitted investments in all subsidiary, controlled, and affiliated (SCA) entities are valued using an equity method approach. Under this approach, investments in insurance affiliated companies are stated at underlying audited statutory surplus adjusted for unamortized goodwill. The equity method of accounting would be discontinued if the investment is reduced to zero, unless the Company has guaranteed obligations of the subsidiary or otherwise committed to provide further financial support. Investments in non-insurance affiliated companies that have no significant ongoing operations other than to hold assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates are stated at audited GAAP equity adjusted to a statutory basis of accounting. Investments in non-insurance affiliated companies that have significant ongoing operations beyond holding assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates are stated at audited GAAP equity. Unaudited affiliated companies of the reporting entity or its affiliates are nonadmitted under prescribed SAP accounting practices. Goodwill arising from the acquisition of subsidiaries or affiliated companies is amortized over a period of ten years. Investments in affiliated companies are generally included in stocks.
8. Other invested assets consist primarily of alternative investments in hedge funds, private equity funds, private and emerging market debt funds, tax credit funds and real estate partnerships. Except for investments in certain tax credit funds, these investments are recorded using the equity method of accounting. Changes in carrying value as a result of the equity method are reflected as net unrealized capital gains and losses as a direct adjustment to surplus. Gains and losses are generally recognized through income at the time of disposal or when operating distributions are received. Partnership interests in tax credit funds are held at amortized cost with amortization charged to investment income over the period in which the tax benefits, primarily credits, are utilized. Refer to Note 1(C)7 above for the accounting treatment for the Company’s investments in limited liability companies, which are wholly-owned subsidiaries.
9. Refer to Note 8 for the derivative accounting policy.
10. The Company includes anticipated investment income when calculating its premium deficiency reserves, in accordance with SSAP No. 53 – *Property-Casualty Contracts – Premiums*.
11. The Company establishes losses and loss expense reserves for reported claims and claims incurred but not yet reported (IBNR). Estimating the liability for losses and loss expense reserves involves significant judgment and multiple assumptions. Management considers the Company’s experience with similar claims, historical trends, economic factors and judicial, legislative and regulatory changes in establishing reserves. The Company’s losses and loss expense reserves are recorded net of reinsurance and amounts expected to be received from salvage (the amount recovered from property after the Company pays for a total loss) and subrogation (the right to recover payments from third parties).

Assumptions and estimates for losses and loss expense reserves are updated as new information becomes available. Due to the inherent uncertainty in estimating losses and loss expense reserves, the actual cost of settling claims may differ materially from recorded amounts. Changes in losses and loss expense reserve estimates are included in results of operations in the period the estimates are revised.
12. The Company has a written capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, vehicles, other equipment and leasehold improvements. The Company has not modified its capitalization policy from the prior period.
13. Not applicable – The Company does not write major medical insurance with prescription drug coverage.

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:		
1.	Less than 12 Months	\$ (50,923)
2.	12 Months or Longer	\$ (4,279,469)
b. The aggregate related fair value of securities with unrealized losses:		
1.	Less than 12 Months	\$ 8,384,821
2.	12 Months or Longer	\$ 29,272,828

5. The Company periodically reviews loan-backed and structured securities in an unrealized loss position by comparing the present value of cash flows, including estimated prepayments, expected to be collected from the security to the amortized cost basis of the security. If the present value of cash flows expected to be collected, discounted at the security's effective interest rate, is less than the amortized cost basis of the security, the impairment is considered other-than-temporary and a realized loss is recorded.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

1. The Company's securities lending agreement requires a minimum of 102% of the fair value of loaned securities to be held as collateral. Cash collateral received is invested in short-term investments and reported on the Asset page as Securities Lending Reinvested Collateral assets. The offsetting collateral liability is reported in the Payable for Securities Lending line on the Liabilities page.
2. No assets were pledged as collateral as of year-end.

NOTES TO THE FINANCIAL STATEMENTS

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

1. To manage short-term liquidity needs within the Nationwide insurance subsidiaries, the Company has agreements to enter into repurchase or reverse repurchase agreements with several authorized affiliated insurance companies. The collateral required meets minimum state specific requirements or statutory requirements if state of domicile does not specify.

As these transactions are with affiliated insurance companies within the Nationwide family and are short-term in nature, the risk of changes in the fair value of the collateral are considered negligible.

For yield enhancement, the Company has agreements to enter into repurchase agreements through its securities lending program with collateral consisting of U.S. Government/Agency securities with investment grade counterparties. The collateral, which is marked to market daily, must represent 102% of the amount loaned and is monitored by the plan’s manager, Bank of New York Mellon, for changes in fair value.

Note 9 – Income Taxes

In August 2022, the Inflation Reduction Act of 2022 (Act) was passed by the U.S. Congress and signed into law. The Act includes a new Federal CAMT, effective in 2023, that is based on the adjusted financial statement income (AFSI) set forth on the applicable financial statement (AFS) of an Applicable Corporation. A corporation is an Applicable Corporation if its rolling average pre-tax AFSI over three prior years (starting with 2020-2022) is greater than \$1 billion. The \$1 billion threshold is determined on a controlled-group basis by aggregating the AFSI of all entities treated as a single employer under tax law. The group's AFS is generally treated as the AFS for all separate entities in the group. Except under limited circumstances, once a corporation is an Applicable Corporation, it is an Applicable Corporation in all future years.

An Applicable Corporation is not automatically subject to a CAMT liability. An Applicable Corporation's tentative CAMT liability is equal to 15% of its adjusted AFSI, and CAMT is payable to the extent the tentative CAMT liability exceeds its regular corporate income tax. However, any CAMT paid would be indefinitely available as a credit carryover that could reduce future regular tax in excess of CAMT. For financial statement reporting, in the event an Applicable Corporation is subject to CAMT there will be no impact to total tax as any CAMT paid will be offset by the establishment of a deferred asset for the credit carryover.

The Company comprises a controlled-group of entities and has determined that it will be an Applicable Corporation in 2024. In making such determination, the Company has made certain interpretations of, and assumptions regarding, the CAMT provisions of the Act. While the U.S. Treasury Department issued proposed regulations on September 12, 2024, there remain many open questions and significant portions of the guidance will not be effective until the regulations are issued in final form. However, the proposed regulations, including the portions not effective until finalized, will not materially impact the Company's financial statements.

The Company has made an accounting policy election to disregard CAMT when evaluating the need for a valuation allowance for its non-CAMT DTA.

For the years ended December 31, 2024 and 2023, the Act did not impact the Company's total tax.

Note 17 – Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of Receivables Reported as Sales

Not applicable.

B. Transfer and Servicing of Financial Assets

1. The Company has entered into a securities lending agreement with an agent bank whereby eligible securities may be loaned to third parties, primarily major brokerage firms. These transactions are used to generate additional income on the securities portfolio. Loaned securities continue to be reported as invested assets and the Company is entitled to receive any payments of interest or dividends paid on loaned securities. The agreement requires a minimum of 102% of the fair value of loaned securities to be held as collateral. Cash collateral received from borrowers is reflected as a "Payable for securities lending" on the "Statement of Liabilities, Surplus and Other Funds" while non-cash collateral is recorded off-balance sheet. Cash collateral received is reinvested by the agent bank in accordance with the Company's authorized investment policy and included in "Securities lending reinvested collateral assets" in the "Statement of Assets". If the fair value of the reinvested collateral assets is less than the fair value of the securities loaned, the shortfall is non-admitted. Because the borrower or the Company may terminate a securities lending transaction at any time, if loans are terminated in advance of the reinvested collateral asset maturities, the Company would repay its securities lending obligation from operating cash flows or the proceeds of sales from its investment portfolio, which includes significant liquid securities.

The fair value of loaned securities was \$2,400,839 as of December 31, 2024. The Company holds \$0 of non-cash collateral for loaned securities as of December 31, 2024.

Reinvested collateral assets reported on Schedule DL are excluded from other statutory schedules and disclosures.

Note 20 – Fair Value Measurements

A. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes assets and liabilities held at fair value in the statutory statements of assets and liabilities, surplus and other funds as follows:

NOTES TO THE FINANCIAL STATEMENTS

Level/ 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level/ 2. Unadjusted quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, Secured Overnight Financing Rate, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level/ 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimates of the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for assets and liabilities quarterly. Changes in the observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the reporting period in which the change occurs.

Independent pricing services are most often utilized, and compared to pricing from additional sources when available, to determine the fair value of bonds and stocks for which market quotations or quotations on comparable securities or models are used. For these bonds and stocks, the Company obtains the pricing services' methodologies and classifies the investments accordingly in the fair value hierarchy.

Corporate pricing matrices are used in valuing certain bonds. The corporate pricing matrices were developed using publicly and privately available spreads segmented by various weighted average lives and credit quality ratings. Certain private placement bonds have adjusted spreads to capture the impacts of liquidity premium based on industry sector. The weighted average life and credit quality rating of a particular bond to be priced using those matrices are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate industry sector or U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when deemed appropriate or when valuations are not available from independent pricing services or corporate pricing matrices. These bonds are classified with the lowest priority in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers, as the brokers often do not provide the necessary transparency into their quotes and methodologies. At least annually, the Company performs reviews and tests to ensure that quotes are a reasonable estimate of the investments' fair value. Price movements of broker quotes are subject to validation and require approval from the Company's management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment's fair value.

The Company carries short-term investments at amortized cost, which approximates fair value.

The following table summarizes assets held at fair value as of December 31, 2024:

- A. Method Used to Estimate
- The Company sells property and casualty policies for which the premiums vary based on loss experience. Future premium adjustments for these retrospective policies are estimated and accrued. - B. Method Used to Record
