NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Choice Insurance Company (the “Company”) were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance (“DOI”).

The DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners’ (“NAIC”) Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the DOI. No deviations from NAIC statutory accounting practices (“NAIC SAP”) were used in preparing these statutory-basis financial statements as illustrated in the table below:

	SSAP #	F/S Page	F/S Line #		2024		2023

B. Use of Estimates in the Preparation of the Financial Statements

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense (“LAE”) reserves.

C. Accounting Policy

Premiums, Acquisition Costs, and Nonadmitted Assets:

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company’s exposure to credit risk.

Acquisition costs, such as agents’ commissions, premium taxes, and other policy initiation costs, as well as advertising costs are charged to operations as incurred.

Certain assets designated as “nonadmitted assets,” in accordance with Statement of Statutory Accounting Principles (“SSAP”) No. 4, Assets and Nonadmitted Assets, are reported on page 2 - Assets in column 2. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, Capital and Surplus section.

Investment Policies:

(1) Cash, Cash Equivalents, and Short-term Investments

Cash and cash equivalents can include bank accounts, repurchase and reverse repurchase commitment transactions, securities with original maturities of three months or less, and securities acquired with remaining maturities of three months or less that are reported at amortized cost which approximates fair market value. Cash and cash equivalents also includes money market mutual funds valued at fair value or net asset value (NAV) as a practical expedient.

Short-term investments include securities acquired within one year of maturity, excluding those with maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost which approximates fair market value.

(2) Bonds

Investment-grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider (“CRP”) designations and are reported at amortized cost using the scientific method, which closely approximates the effective interest method. Non-investment-grade bond valuations are also based on NAIC designations or NAIC CRP designations and are reported at the lower of amortized cost or fair market value. Loan-backed and structured securities follow the guidance prescribed by SSAP No. 43R, Loan-backed and Structured Securities (“SSAP No. 43R”), for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.

(3) Common Stocks

Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market value based on active market closing quotations from a regulated exchange. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(4) Preferred Stocks

Nonredeemable preferred stocks are reported at fair market value and are not to exceed currently effective call price. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(5) Mortgage Loans

Not applicable

NOTES TO FINANCIAL STATEMENTS

(6) Loan-backed Securities

Loan-backed and structured securities are accounted for as prescribed by SSAP No. 43R. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Prepayment assumptions for loan-backed and structured securities are obtained from available market data, broker/dealers, and/or internal estimates, and are consistent with current interest rate and economic trends (see Note 5.D).

(7) Investments in Subsidiaries, Controlled and Affiliated Entities

(8) Investments in Joint Ventures, Partnerships and Limited Liability Companies

Repurchase Agreements and Reverse Repurchase Commitment Transactions:

The Company may enter into repurchase agreements in which it borrows cash by providing certain underlying securities as collateral for the arrangement. The cash borrowed is invested in cash equivalents and an offsetting liability is established. The cash equivalent investment maturities and the term of the borrowing arrangement on the collateralized securities match, eliminating duration risk exposure to the Company. The Company did not have any open repurchase agreements at either balance sheet date presented in the accompanying financial statements.

The Company may enter into reverse repurchase commitment transactions. In these transactions, the Company loans cash to an accredited bank and receives U.S. Treasury Notes pledged as general collateral against the cash borrowed. The Company chooses to enter into these transactions as rates on general collateral are more attractive than other short-term rates available in the market. The Company's exposure to credit risk is limited, as these internally managed transactions are typically overnight arrangements. The income generated on these transactions is calculated at the then applicable general collateral rates on the value of U.S. Treasury securities received. The Company has counterparty exposure on reverse repurchase agreements in the event of a counterparty default to the extent the general collateral security's value is below the cash which was delivered to acquire the collateral. The short-term duration of the transactions (primarily overnight investing) reduces that default exposure. The Company did not have any open reverse repurchase commitment transactions at either balance sheet date presented in the accompanying financial statements.

Fair Market Values, Realized Gains and Losses, and Other-Than-Temporary Impairment:

The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. In very rare cases, if none of the aforementioned primary sources are available, matrix pricing using the reporting entity's own market-based assumptions may be utilized. The approved methods for computation of fair market value are prescribed in the Securities Valuation Office Purposes and Procedures Manual.

Realized gains and losses on sales of securities are computed based on the first-in, first-out method.

The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for other-than-temporary impairment ("OTTI") requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43R). This evaluation reflects management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

When persuasive evidence exists that causes management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

Loss, LAE, and Premium Deficiency Reserves:

Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company reviews a large majority of its reserves by product/state subset combinations on a quarterly time frame, with the remaining reserves generally reviewed on a semiannual basis. A change in the Company's scheduled reviews of a particular subset of the business depends on the size of the subset or emerging issues relating to the product or state (see Note 25).

The Company does not anticipate investment income when evaluating the need for premium deficiency reserves (see Note 30).

Capitalization of Assets:

The Company has written capitalization policies for its various asset classes. The capitalization policy thresholds have not materially changed from the prior year.

Pharmaceutical Rebate Receivables:

D. Going Concern

- (1) The sources used to determine prepayment assumptions are derived from updated cash flows from widely utilized reputable industry sources. The Company's portfolio managers review the available cash flow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings. The Company uses a retrospective adjustment methodology to revalue most loan-backed securities. For primarily interest-only securities, loan-backed securities below high investment-grade status (i.e., below AA), and certain loan-backed securities with sub-prime loan exposure, the Company uses the prospective method.
- (2) The Company has not recorded an OTTI for loan-backed and structured debt securities during the current year.
- (3) The Company has not recorded an OTTI for loan-backed and structured debt securities during the current year.
- (4) At the end of the reporting period, the composition of fair value and gross unrealized losses on loan-backed and structured debt securities by the length of time that individual securities have been in a continuous unrealized loss position is as follows:

a) The aggregate amount of unrealized losses:

1. Less than 12 Months\$-

2. 12 Months or Longer\$1,932

b) The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months\$-

2. 12 Months or Longer\$38,919

(5) Under SSAP No. 43R, the Company analyzes its structured debt securities to determine if the Company intends to sell, or if it is more likely than not that the Company will be required to sell, the security prior to recovery and, if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. To the extent that it is more likely than not that the Company will hold the debt security until recovery (which could be maturity), the Company determines if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

However, the controlled group of corporations of which the Company is a member does not expect to be liable for CAMT in 2024.

A. Contingent Commitments

B. Assessments

(1) Nature and Amount of Assessments

The Company is subject to state guaranty fund and other assessments by the states in which it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2024 and 2023, the Company's estimated liability for state guaranty fund and other assessments was \$33,149 and \$24,957, respectively.

E. Product Warranties

(1) Accounting Policy and Methodology

In 2024, the Company's affiliates began writing Mechanical Breakdown insurance, which is reported on Annual Statement Line 30 – Warranty, and provides coverage for major system repairs including mechanical and electrical failures (e.g., engine, transmission, air conditioning/heating) once the manufacturer's warranty expires. Mechanical Breakdown must be continuously in force on the policy and renewed each term from initial time of purchase until a loss occurs to be eligible for coverage. The reserves are immaterial and include an assumption that the carried reserves equal the indicated reserves. The Company assumes reserves from other insurance affiliates through a 100% pooling reinsurance agreement (see Note 26).

NOTES TO FINANCIAL STATEMENTS

G. All Other Contingencies

(1) Premiums and Agents' Balances Receivable

The Company routinely assesses the collectability of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible.

(2) Litigation

The Company and/or its affiliates are named as defendants in various lawsuits arising out of claims made under insurance policies written in the ordinary course of business. The Company considers all legal actions relating to such claims in establishing its loss and LAE reserves.

In addition, the Company and/or its affiliates are named as defendants in a number of class action or individual lawsuits that challenge certain of the operations of the Company and/or its affiliates. Management plans to contest the pending lawsuits vigorously, but may pursue settlement negotiations in some cases, as it deems appropriate. Although outcomes of pending cases are uncertain until final disposition, the Company establishes accruals for these lawsuits when it is probable that a loss has been or will be incurred and Management can reasonably estimate potential loss exposure, which may include a range of loss. As to lawsuits for which the loss is considered neither probable nor estimable, or is considered probable but not estimable, the Company does not establish an accrual. Nevertheless, Management continues to evaluate pending litigation to determine if any losses not deemed probable and estimable become so, at which point the Company would establish an accrual at either its best estimate of the loss or the lower end of the range of loss.

The Company shares litigation expenses with other insurance affiliates through a 100% pooling reinsurance agreement (see Note 26).

NOTE 20 Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

(1) Fair Value Measurements by Levels 1, 2, and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly (e.g., certain corporate and municipal bonds and certain preferred stocks). This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument (e.g., certain structured securities and privately held investments).

Determining the fair value of the investment portfolio is the responsibility of the Company's management. As part of the responsibility, management evaluates whether a market is distressed or inactive in determining the fair value for the Company's portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market. Based on this evaluation, management concluded that there was sufficient activity related to the sectors and securities for which they obtained valuations.

Certain securities are carried at fair market value in the statutory financial statements. Other securities are periodically measured at fair value, such as when impaired, or for certain bonds which are carried at the lower of amortized cost or fair market value.

See Note 1.C for further information regarding methods used to determine fair market value.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

F. Subprime Mortgage Related Risk Exposure

(1) Description of the Subprime-Mortgage-Related Risk Exposure and Related Risk Management Practices

The following subprime disclosure and the review and procedures described within are completed at a consolidated level for all the Progressive companies. To the extent the Company had any direct subprime exposure, those securities would be listed in Note 21.F.3.

Management’s review of the investment portfolio for securities with direct subprime exposure, such as Alt-A residential mortgage loan-backed bonds and home equity loan-backed bonds is performed in conjunction with the OTTI analysis and procedures (see Note 1.C). Additionally, securities that were determined to have an indirect subprime exposure were also reviewed as part of the OTTI process.

The Company’s management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the subprime mortgage loan disruption, as well as broader credit and financial market events.

In the reporting period, the Company recorded no OTTI write-downs on any securities as a result of direct subprime exposure.

NOTE 26 Intercompany Pooling Arrangements

The Company participates in a pooling reinsurance agreement with the property-casualty affiliates listed below (the “Direct Pool”) under which 100% of the underwriting business of each member company, net of external reinsurance, is ceded to Progressive Direct, the Direct Pool manager and a Direct Pool participant. The combined premiums, losses, and expenses are then retroceded to each Direct Pool member based on pre-determined pooling percentages.

Mountain Laurel Assurance Company (“Mountain Laurel”), an insurance affiliate domiciled in Ohio, terminated its future participation in the Direct Pool effective November 5, 2005. Mountain Laurel has a zero percent retrocession participation in the Direct Pool for all policies written prior to that date.

The pooling percentages for each Direct Pool participant were as follows:

ANNUAL STATEMENT FOR THE YEAR 2024 OF THE PROGRESSIVE CHOICE INSURANCE COMPANY

GENERAL INTERROGATORIES

PART 2 - PROPERTY AND CASUALTY INTERROGATORIES

6.1

What provision has this reporting entity made to protect itself from an excessive loss in the event of a catastrophe under a workers' compensation contract issued without limit of loss?
THE COMPANY DOES NOT WRITE WORKERS' COMPENSATION INSURANCE.

6.2

Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations of concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:
THE COMPANY'S PROBABLE MAXIMUM LOSS (PML) IS ESTIMATED BY ANALYZING HISTORICAL MAJOR OCCURRENCES AND ESTIMATING FREQUENCY OF LOSS AND SEVERITY BASED ON THE POTENTIAL FORCE OF AN OCCURRENCE AND THE TOTAL NUMBER OF AUTOS AND BOATS EXPOSED. THE ESTIMATE OF THE PML WAS COMPLETED BY PROGRESSIVE EMPLOYEES. THE COMPANY'S NET COMPREHENSIVE EXPOSURE IN THE CATASTROPHE PRONE STATES OF FLORIDA, LOUISIANA, TEXAS, MISSISSIPPI, NEW JERSEY, NEW YORK, AND CALIFORNIA IS LIMITED SINCE THE COMPANY IS A MEMBER OF A 100% POOLING REINSURANCE ARRANGEMENT WITH 7 OF ITS PROPERTY AND CASUALTY AFFILIATES. THE PRIMARY PROPERTY COVERAGE SOLD BY THE COMPANY IS COMPREHENSIVE FOR AUTOMOBILE AND INLAND MARINE FOR BOATS. THE ESTIMATE OF THE PML IS 7% OF THE SURPLUS.

6.3

What provision has this reporting entity made (such as a catastrophic reinsurance program) to protect itself from an excessive loss arising from the types and concentrations of insured exposures comprising its probable maximum property insurance loss?
THE COMPANY'S ESTIMATED PML IS 7% OF THE SURPLUS. THE COMPANY CARRIES NO EXTERNAL CATASTROPHE REINSURANCE TO COVER ITS LIMITED CATASTROPHE EXPOSURE. THE COMPANY PARTICIPATES IN A POOLING ARRANGEMENT WHICH SPREADS THE UNDERWRITING RISK INCLUDING THE CATASTROPHE EXPOSURE AMONG ALL PARTIES TO THE POOLING AGREEMENT.

NONE

7.1

Yes [☐] No [☒]

7.2

If yes, indicate the number of reinsurance contracts containing such provisions.

(c) Aggregate stop loss reinsurance coverage;
(d) A unilateral right by either party (or both parties) to commute the reinsurance contract, whether conditional or not, except for such provisions which are only triggered by a decline in the credit status of the other party;
(e) A provision permitting reporting of losses, or payment of losses, less frequently than on a quarterly basis (unless there is no activity during the period); or
(f) Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity.

(a) Accounted for that contract as reinsurance (either prospective or retroactive) under statutory accounting principles ("SAP") and as a deposit under generally accepted accounting principles ("GAAP"); or
(b) Accounted for that contract as reinsurance under GAAP and as a deposit under SAP?

Yes [☐] No [☒]

9.5

If yes to 9.4, explain in the Reinsurance Summary Supplemental Filing for General Interrogatory 9 (Section D) why the contract(s) is treated differently for GAAP and SAP.

Yes [☐] No [☒]
