NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices
The financial statements of Mid-Continent Casualty Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Company has no prescribed or permitted practices that would result in differences between NAIC SAP and the state of Ohio basis, as shown below:

B. Use of Estimates in the Preparation of the Financial Statements
The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from these estimates.

C. Accounting Policy
Investments – Invested asset values are generally stated as follows:

Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. For residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and loan-backed and structured securities (LBASS), the NAIC has retained a third-party investment management firm to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based not only on the probability of loss, but also the severity of loss. Those RMBS, CMBS and LBASS securities that are not modeled but receive a current year NAIC Credit Rating Provider (CRP) rating are subject to the Modified FE process that determines the appropriate NAIC designations and Book Adjusted Carrying Values. Mandatory convertible bonds are stated at the lower of book value or fair value, regardless of the NAIC designation. The Company does not own any SVO Identified Exchange Traded Funds.

Redeemable preferred stocks rated P1 and P2 are stated at amortized cost; perpetual preferred stocks rated 1 and 2 are stated at fair value; all others are stated at the lower of cost, amortized cost, or fair value.

Common stocks are stated at fair value except investment in subsidiaries. Investments in insurances subsidiaries are stated at the statutory equity in net assets plus any applicable remaining goodwill. Goodwill is amortized on a straight-line basis over ten years. Investments in non-insurance subsidiaries are stated at NAIC specified values.

Short-term investments are stated at cost.

Other invested assets are stated at the lower of cost or fair value.

Unpaid Losses and Loss Adjustment Expenses – The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses (including possible development on known claims) based on past experience; (d) estimates based on experience of expenses for investigating and adjusting claims; and (e) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental, and other mass tort claims involves considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency and other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the Statement of Income in the period in which determined. Despite the variability inherent in such estimates, management believes the liabilities for unpaid losses and loss adjustment expenses are adequate.

Premium Deficiency Reserve – The Company does not use anticipated investment income as a factor in premium deficiency calculations.

Premium Recognition – Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Generally, for direct business, such reserves are computed by pro rata methods. For certain collateral protection products, earned premium and unearned premium reserves are computed consistent with the proportion of the total exposure provided throughout the term of the contract. For assumed business, unearned premium reserves are based on reports received from ceding companies for reinsurance.

Underwriting Expense Recognition – Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Non-Admitted Assets – Certain assets designated as "non-admitted", in accordance with Statement of Statutory Accounting Principles (SSAP) No. 4 Assets and Non-Admitted Assets, are excluded from the statutory balance sheet and such amounts are charged directly to unassigned funds.

(3) Fair Value Recognition of Transfers Between Levels

The Company recognizes and records the transfer of securities into and out of Level 3 due to changes in availability of market observable inputs. All transfers are reflected in the table above at fair value as of the end of the reporting period.

(4) Inputs and Techniques Used in Estimating Fair Value

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments include corporate and municipal fixed maturity securities and MBS priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, American Money Management Corporation ("AMMC") (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

(5) The Company does not have any derivative assets or liabilities.

B. The Company has no additional fair value disclosures.

On February 9, 2021, the Company entered into a loss portfolio agreement (LPT) with Allianz Reinsurance America, Inc. covering construction defect losses on primary General Liability policies written on artisan sub-contracts in Florida for accident years 2004 through 2016. The agreement covers losses occurring on or after January 1, 2004 through and including December 31, 2016. Allianz shall be liable for 100% of the Company's Ultimate Net Losses paid on or after June 29, 2020 but not to exceed \$98,575,000. In consideration for the assumption of the loss reserves, the Company paid Allianz \$78,650,000 equal to the loss reserves transferred. No gain or loss was recorded on the transaction and the agreement is accounted for as retroactive reinsurance. As of March 31, 2024 the retroactive reinsurance ceded reserve was \$32 million with a deferred gain of \$5.0 million during 2023 and \$7.0 million inception to date. The Company has collected \$1.9 million during 2024 and \$53.6 million inception to date in reimbursed paid losses and had no recoverable balance outstanding as of March 31, 2024.

NOTE 24 Retrospectively Rated Contracts & Contracts Subject to Redetermination

The Company does not have any accrued retrospectively rated premiums reported as admitted assets.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses

Reserves as of December 31, 2023 were \$317.9 million. As of March 31, 2024, \$19.5 million has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$300.7 million as a result of re-estimation of unpaid claims and claim adjustment expenses principally on General Liability, Products Liability, and Commercial Auto Liability lines of insurance. Therefore, there has been \$2.3 million in unfavorable prior-year development from December 31, 2023 to March 31, 2024. The increase is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims.
