B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the statutory financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned in full when the policies/bonds are written. Expenses incurred in connection with acquiring new business are expensed to operations as incurred. Net investment income earned consists of interest less investment related expense.

Expenses incurred in the connection with acquiring new insurance business, including such items as marketing or referral fees, are charged to underwriting expenses as incurred.

- (1) Short-term investments are stated at amortized value using the scientific method excluding Money Market Mutual Funds classified as "All Other", which are carried at fair value.
- (2) Bonds not backed by other loans are stated at amortized value using the scientific method. Non-investment grade bonds are stated at the lower of amortized cost or fair value.

Bonds are valued in accordance with the valuations prescribed by the NAIC. Bonds with an NAIC designation of 1 or 2 are valued and reported at amortized costs. Bonds with an NAIC designation of 3 through 6 are carried at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus.
