B. Use of Estimates in the Preparation of the Financial Statements

No change

C. Accounting Policy

(1) General – No change

(2) Investments – Net investment income earned consists primarily of interest, dividends and rental income reduced by investment related expenses. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed, or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other-than-temporary to the extent necessary.

Investment grade non-loan-backed bonds with NAIC designations of 1 or 2 are stated at amortized value using the effective interest method. Non-investment grade non-loan-backed bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value.

Common stocks, other than investments in stocks of subsidiaries and affiliates, are stated at fair value. Common stocks also include publicly traded equity securities as permitted by Ohio Revised Code Section 3925.08 in an aggregate amount not to exceed the Company's statutory unassigned surplus as reduced by its authorized control level risk-based capital. Common stocks include the Company's investment in its wholly owned subsidiary, Excess Share Insurance Corporation (ESI), and is carried at the value determined under the equity method of accounting, which management believes approximates market value. The estimated fair value of the investment in ESI is determined based on the Statement of Statutory Accounting Principles (SSAP) No. 97, Investments in Subsidiary, Controlled, and Affiliated Entities, a replacement of SSAP No. 88, and accordingly is carried at the subsidiary's underlying audited capital and surplus amounts as determined on a statutory basis.

Common stocks also include 2,977 shares of Federal Home Loan Bank (FHLB) common stock with a cost, par value and carrying value of \$297,700 at September 30, 2024 and December 31, 2023. To maintain its membership, the Company is required to hold FHLB membership stock in an amount equal to 0.16% of the Company's admitted assets as determined under statutory accounting principles, which is adjusted annually by the FHLB. FHLB membership stock is restricted, can only be sold to the FHLB at par value, and requires a five-year notice by the Company to terminate membership and redeem the shares. The Company may borrow from the FHLB but must purchase additional shares of FHLB stock (activity stock) equal to 2% of borrowings. FHLB activity stock is redeemable at any time by the Company or by the FHLB, as the Company's FHLB borrowings are paid down and can only be sold to the FHLB. Due to the restrictions placed on transferability and the Company's determination that there is no known impairment as to the ultimate recoverability of the par value of FHLB stock, the Company's carrying value of its investment in FHLB stock is considered to approximate its fair value at September 30, 2024 and December 31, 2023.

The Company employs a systematic methodology that considers available evidence in evaluating potential other-than-temporary impairment of investments. In the event that the cost of an investment exceeds its fair value, the Company evaluates, among other factors, the magnitude and duration of the decline in fair value; the financial health of and business outlook for the issuer; changes to the debt ratings of the issuer, or specific security, by a rating agency; and the performance of the underlying assets. For debt investments, the ability and intent to hold the security, and the probability that the Company will be unable to collect all amounts due according to contractual terms of a debt security in effect at the date of acquisition is assessed. For equity securities, the Company evaluates impairment by considering a number of factors including the length of time and/or the significance of decline below cost, the Company's ability and intent to hold these securities through their anticipated recovery periods, the current financial condition of the issuer and its future business prospects, and an assessment of the ability of the security's fair value to recover back to cost in the foreseeable future. Subsequent recoveries in fair value are not recognized in earnings but are recorded as unrealized gains in statutory surplus. Once a decline in fair value of an investment security is determined to be other than temporary, an impairment charge is recorded to net realized capital gains and losses, in the Statement of Income, and a new cost basis in the investment is established.

The Company from time-to-time advances funds in connection with the liquidation or merger of, or capital assistance provided to, troubled credit unions in exchange for the right to receive future repayments. The Company expects to recover these amounts through repayment from the credit unions, the collection of loans, the sale of assets or the settlement of subrogated claims against third party insurers. For any such advances, generally only loans secured by the first mortgages are recorded as admitted assets in the accompanying statutory-basis financial statements, in an amount not to exceed the fair value of the underlying collateral. In addition, any unsecured advances that are collected within 90 days of year end are reported as admitted assets.

Real estate is recorded at cost less depreciation. Depreciation is computed on the straight-line basis using 25-year to 40-year lives, for buildings and improvements.

Gains or losses on investments sold are based on the specific identification method and are included in investment income. Investment purchases and sales are recorded on the trade date. Interest income is accrued when earned.

11 - Debt

Under three separate unused committed line of credit arrangements with three third-party financial institutions, the Company may borrow on a demand basis up to an aggregate of \$100,000,000 at an interest rate generally equal to the prevailing prime rate or LIBOR rate. Borrowings under the lines must be collateralized by investment securities and other collateral with a market value, which varies by agreement, of 103% to 120% of the amount borrowed. The Company pays annual commitment fees aggregating \$120,000 under these arrangements and one arrangement requires the Company to maintain \$1,000,000 on deposit with the financial institution. The arrangements were renewed by the Company and the financial institutions on May 29, 2024 (\$70,000,000 with FHLB), on June 10, 2024 (\$10,000,000 with Fifth Third Bank), and May 21, 2024 (\$20,000,000 with US Bank) and are subject to annual renewal procedures. The Company had no outstanding borrowings at any time under any of its committed lines of credit through September 30, 2024 nor during 2023.

20 – Fair Value Measurement

With regard to the Company’s financial assets that are disclosed at a fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, the Company uses various valuation approaches, including quoted market prices and discounted cash flows. The ASC and SSAP No. 100, Fair Value Measurement, establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that most observable inputs be used when available. Observable inputs are obtained from independent sources and can be validated by a third party, whereas, unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.

Level 2 – Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3 – Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Reclassification of certain financial instruments may occur when observability of inputs change. There were no transfers between assets carried at fair value within Level 1 and Level 2 of the fair value hierarchy through September 30, 2024 or during the year ended December 31, 2023. There were no purchases, sales, transfers into or transfers out of assets carried at fair value and classified within Level 3 of the fair value hierarchy through September 30, 2024 or during the year ended December 31, 2023.

B. Fair Value Reporting under SSAP 100 and Other Accounting Pronouncements

There were no purchases, sales, transfers into, or transfers out of assets carried at fair value and classified within Level 3 of the fair value hierarchy through September 30, 2024 or during the year ended December 31, 2023.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)

Cash & Cash Equivalents	\$ 21,808,216	\$ 21,808,216	\$21,808,216				

- D. Not Practicable to Estimate Fair Value – Does not apply
- E. NAV Practical Expedient Investments – Does not apply

21 – Other Items – Does not apply

22 – Subsequent Events

The Company evaluated all events or transactions that occurred after September 30, 2024 and through the date the financial statements were available to be issued by the Company. During this period, the Company did not have any material recognizable or non-recognizable events.

23 – Reinsurance

The Company cedes business to one reinsurer, including a single layer of aggregate reinsurance coverage of \$9 million. The Company does not assume any reinsurance. The Company does not have any unsecured aggregate recoverable losses, paid and unpaid including IBNR, loss adjustment expenses and unearned premium with any individual reinsurers, authorized or unauthorized, or amounts that exceed 3% of policyholders’ surplus.

24 - Retrospectively Rated Contracts and Contracts Subject to Redetermination - Does not apply

25 - Change in Incurred Claims and Claim Adjustment Expenses

The Company writes only one line of business, “Other” (with two products written solely to credit unions: primary share insurance and excess share insurance) and sets loss reserves on a prudent basis for potential claims events. Primary insurance claims can involve specifically identified claims events and other events incurred but not reported (IBNR). The Company also sets aside unallocated loss reserves for its primary insurance book of business so that aggregate loss reserves remain within an actuarially accepted range. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company’s independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range.

Although the Company does not normally charge a premium under its primary insurance program, the Company’s governing Ohio statute and its primary insurance policy permit premiums to be assessed against Primary-insureds in order to ensure that the Company maintains a sufficient equity base for its insurance risk.

The Company did not charge a special premium assessment in 2024 nor 2023.

Since the Company has no specific excess insurance loss events identified at September 30, 2024, for which a loss reserve would normally be established, all of the Company’s loss reserves related to excess insurance and its unallocated primary insurance loss reserves related to excess insurance and its unallocated primary insurance loss reserves are treated as unallocated IBNR loss reserves. For purposes of Schedule P, in any given year the cumulative unallocated IBNR loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other insurance companies with infrequent claims events. Since claims events are rare (infrequent but potentially severe), the typical year shows favorable development.
