There were no changes that were considered significant to the Company from prior year end, except for the following.

In August 2022, the Inflation Reduction Act of 2022 (Act) was passed by the United States (U.S.) Congress and signed into law. The Act includes a new Federal corporate alternative minimum tax (CAMT), effective in 2023, that is based on the adjusted financial statement income (AFSI) set forth on the applicable financial statement (AFS) of an Applicable Corporation. A corporation is an Applicable Corporation if its rolling average pre-tax AFSI over three prior years (starting with 2020-2022) is greater than \$1 billion. The \$1 billion threshold is determined on a controlled-group basis by aggregating the AFSI of all entities treated as a single employer under tax law. The group's AFS is generally treated as the AFS for all separate entities in the group. Except under limited circumstances, once a corporation is an Applicable Corporation, it is an Applicable Corporation in all future years.

An Applicable Corporation is not automatically subject to a CAMT liability. An Applicable Corporation's tentative CAMT liability is equal to 15% of its adjusted AFSI, and CAMT is payable to the extent the tentative CAMT liability exceeds its regular corporate income tax. However, any CAMT paid would be indefinitely available as a credit carryover that could reduce future regular tax in excess of CAMT. For financial statement reporting, in the event a corporation is subject to CAMT there will be no impact to total tax as any CAMT paid will be offset by the establishment of a deferred asset for the credit carryover.

The Company comprises a controlled-group of corporations and has determined that it will be an Applicable Corporation in 2024. In making such determination, the Company has made certain interpretations of, and assumptions regarding, the CAMT provisions of the Act. While the U.S. Treasury Department issued proposed regulations on September 12, 2024, there remain many open questions and significant portions of the guidance will not be effective until the regulations are issued in final form. However, the proposed regulations, including the portions not effective until finalized, will not materially impact the group's financial statements.

As of September 30, 2024 and December 31, 2023, the Act did not impact the Company's total tax.

Note 20 – Fair Value Measurements

A. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes assets and liabilities held at fair value in the statutory statements of assets and liabilities, surplus and other funds as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

NOTES TO THE FINANCIAL STATEMENTS

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, Secured Overnight Financing Rate, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management’s best estimates of the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for assets and liabilities quarterly. Changes in the observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the reporting period in which the change occurs.

Independent pricing services are most often utilized, and compared to pricing from additional sources when available, to determine the fair value of bonds and stocks for which market quotations or quotations on comparable securities or models are used. For these bonds and stocks, the Company obtains the pricing services’ methodologies and classifies the investments accordingly in the fair value hierarchy.

Corporate pricing matrices are used in valuing certain bonds. The corporate pricing matrices were developed using publicly and privately available spreads segmented by various weighted average lives and credit quality ratings. Certain private placement bonds have adjusted spreads to capture the impacts of liquidity premium based on industry sector. The weighted average life and credit quality rating of a particular bond to be priced using those matrices are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate industry sector or U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when deemed appropriate or when valuations are not available from independent pricing services or corporate pricing matrices. These bonds are classified with the lowest priority in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers, as the brokers often do not provide the necessary transparency into their quotes and methodologies. At least annually, the Company performs reviews and tests to ensure that quotes are a reasonable estimate of the investments’ fair value. Price movements of broker quotes are subject to validation and require approval from the Company’s management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment’s fair value.

The Company carries short-term investments at amortized cost, which approximates fair value.

No assets or liabilities were held at fair value as of September 30, 2024.

B. & C. The following table summarizes the carrying value and fair value of the Company's assets not held at fair value as of September 30, 2024:
