NOTES TO THE FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory financial statements of Nationwide Life Insurance Company (NLIC or the Company) have been prepared in conformity with accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of Ohio.

The Ohio Department of Insurance (Department) recognizes only statutory accounting practices (SAP) prescribed or permitted by the Department for determining and reporting the financial condition and results of operations of an insurance company, as well as, determining its solvency under the Ohio Insurance Law. The NAIC’s *Accounting Practices and Procedures* manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Ohio. The Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices.

The Commissioner of the Department promulgated Ohio Administrative Code Section 3901-1-67, Alternative Derivative and Reserve Accounting Practices (OAC 3901-1-67), which constitutes a prescribed practice as contemplated by the NAIC SAP. The prescribed practice allows Ohio-domiciled insurance companies to utilize certain alternative derivative and reserve accounting practices for eligible derivative instruments and indexed products, respectively, in order to better align the measurement of indexed product reserves and the derivatives that hedge them. The Company elected to apply OAC 3901-1-67 to its derivative instruments hedging equity indexed annuity products and equity indexed annuity reserve liabilities. As a result, the Company’s net income changed by \$(21,855,839) and \$(27,393,966) for the periods ended September 30, 2024 and December 31, 2023, respectively, and the Company’s statutory surplus changed by \$(21,769,042) and \$(1,618,474) as of September 30, 2024 and December 31, 2023, respectively. The Company’s subsidiary, Nationwide Life and Annuity Insurance Company (NLAIC), has also elected to apply the same prescribed practice to its eligible indexed products, which changed NLIC’s subsidiary valuation of NLAIC by \$(376,975,735) and \$(89,264,563) as of September 30, 2024 and December 31, 2023, respectively.

The Company’s subsidiary, Eagle Captive Reinsurance, LLC (Eagle), applies one prescribed practice with multiple applications which values assumed guaranteed minimum death benefits (GMDB) and guaranteed lifetime withdrawal benefits (GLWB) risks on variable annuity contracts from NLIC and GLWB risks on fixed indexed annuity contracts from NLIC and NLAIC, using an alternative reserving basis from the Statutory Accounting Principles detailed within the NAIC SAP pursuant to Ohio Revised Code Chapter 3964 and approved by the Department. The impact of Eagle’s prescribed practice applications changed the Company’s subsidiary valuation of Eagle by \$524,702,391 and \$228,427,395 as of September 30, 2024 and December 31, 2023, respectively.

Effective October 1, 2023, Eagle was granted a permitted practice from the Department allowing Eagle to carry a reinsurance recoverable asset under an excess of loss reinsurance agreement with a third-party reinsurer as an admitted asset. The permitted practice changed the Company’s subsidiary valuation of Eagle by \$860,546,211 and \$852,929,663 as of September 30, 2024 and December 31, 2023, respectively.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio is shown below:

C. Accounting Policies

There were no changes that were considered significant to the Company from prior year end.

(2) Bonds, excluding loan-backed and structured securities, are stated at amortized cost, except those with a NAIC designation of “6”, which are stated at the lower of amortized cost or fair value. The Company does not hold any mandatory convertible securities or Securities Valuation Office (SVO) identified investments.

The retrospective adjustment method is used to value loan-backed securities where the collection of all contractual cash flows is probable. For all other loan-backed securities, the Company uses the prospective adjustment method. Refer to Note 5(D) for a discussion of the other-than-temporary impairment policy for loan-backed securities.

- 2. Not applicable.
- 3. The following table summarizes other-than-temporary impairments for loan-backed securities recognized in the current reporting period based on the fact that the present value of projected cash flows expected to be collected was less than the amortized cost of the securities.

	(1)	(2)	(3)	(4)	(5)	(6)	(7)
CUSIP	Amortized cost before current period OTTI	Present value of projected cash flows	Recognized other-than-temporary impairment	Amortized cost after other-than-temporary impairment	Fair value at time of OTTI	Date of financial statement where reported

- 4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:	1. Less than 12 Months	\$ (445,042)
	2. 12 Months or Longer	\$ (206,980,171)
b. The aggregate related fair value of securities with unrealized losses:	1. Less than 12 Months	\$ 85,456,123

If the present value of cash flows expected to be collected, discounted at the security's effective interest rate, is less than the amortized cost basis of the security, the impairment is considered other-than-temporary and a realized loss is recorded.

NOTES TO THE FINANCIAL STATEMENTS

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

1. To manage short-term liquidity needs within the Nationwide insurance subsidiaries, the Company has agreements to enter into repurchase or reverse repurchase agreements with several authorized affiliated insurance companies. The collateral required meets minimum state specific requirements or statutory requirements if state of domicile does not specify.

As these transactions are with affiliated insurance companies within the Nationwide family and are short-term in nature, the risk of changes in the fair value of the collateral are considered negligible.

For yield enhancement, the Company has agreements to enter into repurchase agreements through its securities lending program with collateral consisting of United States (U.S.) Government/Agency securities with investment grade counterparties. The collateral, which is marked to market daily, must represent 102% of the amount loaned and is monitored by the plan’s manager, Bank of New York Mellon, for changes in fair value.

In August 2022, the Inflation Reduction Act of 2022 (Act) was passed by the U.S. Congress and signed into law. The Act includes a new Federal corporate alternative minimum tax (CAMT), effective in 2023, that is based on the adjusted financial statement income (AFSI) set forth on the applicable financial statement (AFS) of an Applicable Corporation. A corporation is an Applicable Corporation if its rolling average pre-tax AFSI over three prior years (starting with 2020-2022) is greater than \$1 billion. The \$1 billion threshold is determined on a controlled-group basis by aggregating the AFSI of all entities treated as a single employer under tax law. The group's AFS is generally treated as the AFS for all separate entities in the group. Except under limited circumstances, once a corporation is an Applicable Corporation, it is an Applicable Corporation in all future years.

An Applicable Corporation is not automatically subject to a CAMT liability. An Applicable Corporation's tentative CAMT liability is equal to 15% of its adjusted AFSI, and CAMT is payable to the extent the tentative CAMT liability exceeds its regular corporate income tax. However, any CAMT paid would be indefinitely available as a credit carryover that could reduce future regular tax in excess of CAMT. For financial statement reporting, in the event a corporation is subject to CAMT there will be no impact to total tax as any CAMT paid will be offset by the establishment of a deferred asset for the credit carryover.

The Company comprises a controlled-group of corporations and has determined that it will be an Applicable Corporation in 2024. In making such determination, the Company has made certain interpretations of, and assumptions regarding, the CAMT provisions of the Act. While the U.S. Treasury Department issued proposed regulations on September 12, 2024, there remain many open questions and significant portions of the guidance will not be effective until the regulations are issued in final form. However, the proposed regulations, including the portions not effective until finalized, will not materially impact the group's financial statements.

As of September 30, 2024 and December 31, 2023, the Act did not impact the Company's total tax.

B. Funding Agreements with Federal Home Loan Bank (FHLB)

1. The Company is a member of the Federal Home Loan Bank of Cincinnati (FHLB). Through its membership, the FHLB established the Company's capacity for short-term borrowings and cash advances under the funding agreement program at up to 40% of total admitted assets.

The Company's Board of Directors has authorized the issuance of funding agreements up to \$6,000,000,000 to the FHLB, shared between the Company and NLAIC, in exchange for cash advances, which are collateralized by pledged securities. The Company uses these funds in an investment spread strategy, consistent with its other investment spread operations. As such, the Company applies SSAP No. 52 – *Deposit-Type Contracts*, accounting treatment to these funds, consistent with its other deposit-type contracts. It is not part of the Company's strategy to utilize these funds for operations, and any funds obtained from the FHLB for use in general operations would be accounted for consistent with SSAP No. 15 – *Debt and Holding Company Obligations*, as borrowed money.

The Company has agreements with the FHLB to provide financing for operations. These agreements, which were renewed in June 2024 and expire June 2025, allow the Company access to borrow up to \$1,050,000,000. As of September 30, 2024 and December 31, 2023, the Company had no amounts outstanding under these agreements.

NOTES TO THE FINANCIAL STATEMENTS

Note 20 – Fair Value Measurements

A. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value measurements are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect the Company's view of market assumptions in the absence of observable market information. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. In determining fair value, the Company uses various methods including market, income and cost approaches.

The Company categorizes its financial instruments into a three-level hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument in its entirety.

The Company categorizes assets and liabilities held at fair value in the statutory statements of assets and liabilities, surplus and other funds as follows:

Level 1. Unadjusted quoted prices accessible in active markets for identical assets or liabilities at the measurement date and mutual funds where the value per share (unit) is determined and published daily and is the basis for current transactions.

Level 2. Unadjusted quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active or inputs (other than quoted prices) that are observable or that are derived principally from or corroborated by observable market data through correlation or other means. Primary inputs to this valuation technique may include comparative trades, bid/asks, interest rate movements, U.S. Treasury rates, Secured Overnight Financing Rate, prime rates, cash flows, maturity dates, call ability, estimated prepayments and/or underlying collateral values.

Level 3. Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimates of the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes and comparative trades.

The Company reviews its fair value hierarchy classifications for assets and liabilities quarterly. Changes in the observability of significant valuation inputs identified during these reviews may trigger reclassifications. Reclassifications are reported as transfers at the beginning of the reporting period in which the change occurs.

Independent pricing services are most often utilized, and compared to pricing from additional sources when available, to determine the fair value of bonds and stocks for which market quotations or quotations on comparable securities or models are used. For these bonds and stocks, the Company obtains the pricing services' methodologies and classifies the investments accordingly in the fair value hierarchy.

Corporate pricing matrices are used in valuing certain bonds. The corporate pricing matrices were developed using publicly and privately available spreads segmented by various weighted average lives and credit quality ratings. Certain private placement bonds have adjusted spreads to capture the impacts of liquidity premium based on industry sector. The weighted average life and credit quality rating of a particular bond to be priced using those matrices are important inputs into the model and are used to determine a corresponding spread that is added to the appropriate industry sector or U.S. Treasury yield to create an estimated market yield for that bond. The estimated market yield and other relevant factors are then used to estimate the fair value of the particular bond.

Non-binding broker quotes are also utilized to determine the fair value of certain bonds when deemed appropriate or when valuations are not available from independent pricing services or corporate pricing matrices. These bonds are classified with the lowest priority in the fair value hierarchy as only one broker quote is ordinarily obtained, the investment is not traded on an exchange, the pricing is not available to other entities and/or the transaction volume in the same or similar investments has decreased. Inputs used in the development of prices are not provided to the Company by the brokers, as the brokers often do not provide the necessary transparency into their quotes and methodologies. At least annually, the Company performs reviews and tests to ensure that quotes are a reasonable estimate of the investments' fair value. Price movements of broker quotes are subject to validation and require approval from the Company's management. Management uses its knowledge of the investment and current market conditions to determine if the price is indicative of the investment's fair value.

The Company carries short-term investments at amortized cost, which approximates fair value.

The value of separate account liabilities is set to equal the fair value of separate account assets.

The fair value of derivative instruments is determined using various valuation techniques relying predominately on observable market inputs. These inputs include interest rate swap curves, credit spreads, interest rates, counterparty credit risk, equity volatility and equity index levels.

The following table summarizes assets and liabilities held at fair value as of September 30, 2024:
