NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Express Insurance Company (the "Company") were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("DOI").

The DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual subject to any deviations prescribed or permitted by the DOI. No deviations from NAIC statutory accounting practices ("NAIC SAP") were used in preparing these statutory-basis financial statements as illustrated in the table below:

ANNUAL STATEMENT FOR THE YEAR 2025 OF THE PROGRESSIVE EXPRESS INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

B. Use of Estimates in the Preparation of the Financial Statements

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense ("LAE") reserves and the Company's adjustment to realized losses for other-than-temporary impairment ("OTTI").

C. Accounting Policy

Premiums, Acquisition Costs, Other Income, and Nonadmitted Assets:

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company's exposure to credit risk.

Acquisition costs, such as agents' commissions, premium taxes, and other policy initiation costs, as well as advertising costs, are charged to operations as incurred.

Other income includes finance and service charges collected on premiums receivable installment payments which are earned when billed. This revenue is offset by finance and service charges ceded under the intercompany quota-share reinsurance agreement, which are also included in other income and reported separately as miscellaneous expense.

Certain assets designated as "nonadmitted assets," in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 4, Assets and Nonadmitted Assets, are reported on page 2 - Assets in column 2. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, Capital and Surplus section.

Investment Policies:

(1) Cash, Cash Equivalents, and Short-term Investments

Cash and cash equivalents can include bank accounts, issuer credit obligations ("ICO") acquired with remaining maturities of three months or less, and ICOs with original maturities of three months or less that are reported at amortized cost, which approximates fair market value. Cash and cash equivalents can also include money market mutual funds valued at fair value or net asset value ("NAV") as a practical expedient.

Short-term investments include ICOs acquired within one year of maturity or with an original maturity of one year or less, excluding those with maturities of three months or less (see cash and cash equivalents above). ICOs with an original maturity of one year or less are reported at amortized cost, which approximates fair market value.

(2) Bonds

Investment-grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider ("CRP") designations and are reported at amortized cost using the scientific method, which closely approximates the effective interest method. Non-investment-grade bond valuations are also based on NAIC designations or NAIC CRP designations and are reported at the lower of amortized cost or fair market value ("LCM"). Changes in LCM are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Asset-backed securities follow the guidance prescribed by SSAP No. 43, Asset-Backed Securities ("SSAP No. 43"), for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.

(3) Common Stocks

Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market value based on active market closing quotations from a regulated exchange. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(4) Preferred Stocks

Nonredeemable preferred stocks are reported at fair market value and are not to exceed currently effective call price. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(5) Mortgage Loans

Not applicable

(6) Asset-backed Securities

Asset-backed securities are accounted for as prescribed by SSAP No. 43. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Interest income for asset-backed securities is included in net investment gain based on estimated cash flows, including expected changes in interest rates and estimated prepayments of principal. Prepayment assumptions are reviewed and updated quarterly, and effective yields are recalculated when differences arise between the prepayments originally estimated, and the actual prepayments received and currently estimated. The sources used to determine prepayment assumptions are derived from updated cashflows from widely utilized reputable industry sources. The Company's portfolio managers review the available cashflow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.

For asset-backed securities of high credit quality, the effective yield is recalculated on a retrospective basis to the inception of the investment holding period, and applies the required adjustment, if any, to the cost basis, with the offset recorded to net investment gain. For those securities below high credit quality, interest-only securities, and certain asset-backed securities where there is a greater risk of non-performance, the effective yield is recalculated on a prospective basis for future period adjustments, resulting in no current period impact (see Note 5.D).

(8) Investments in Joint Ventures, Partnerships and Limited Liability Companies

Fair Market Values, Realized Gains and Losses, and Other-Than-Temporary Impairment:

The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. The approved methods for computation of fair market value are prescribed in the Purposes and Procedures Manual of the NAIC Investment Analysis Office.

ANNUAL STATEMENT FOR THE YEAR 2025 OF THE PROGRESSIVE EXPRESS INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

Determining the fair value of the investment portfolio is the responsibility of the Company's management. As part of the responsibility, Management evaluates whether a market is distressed or inactive in determining the fair value for the Company's portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market.

Realized gains and losses on sales of securities are computed based on the first-in, first-out method.

The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for OTTI requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43). This evaluation reflects Management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

Asset-backed securities are analyzed for impairment under SSAP No. 43. An initial review is performed to determine whether it is likely the Company would be required, or intends, to sell any securities prior to the recovery of their respective cost bases (which could be maturity), and if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. For those securities the Company determines it is not likely, or does not intend, to sell prior to a potential recovery, additional analysis is performed to determine if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

When persuasive evidence exists that causes Management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

Loss, LAE, and Premium Deficiency Reserves:

Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company reviews a large majority of its reserves by product/state subset combinations on a quarterly time frame, with the remaining reserves generally reviewed on a semiannual basis. A change in the Company's scheduled reviews of a particular subset of the business depends on the size of the subset or emerging issues relating to the product or state (see Note 25).

The Company does not anticipate investment income when evaluating the need for premium deficiency reserves (see Note 30).

Capitalization of Assets:

The Company has written capitalization policies for its various asset classes. The capitalization policy thresholds have not materially changed from the prior year.

NOTE 14 Liabilities, Contingencies and Assessments

A. Contingent Commitments

B. Assessments

(1) Nature and Amount of Assessments

The Company is subject to state guaranty fund and other assessments based on where it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the state and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2025 and 2024, the Company's estimated liability for state guaranty fund and other assessments was \$74,586 and \$66,199, respectively.

As of December 31, 2025 and 2024, the Company's estimated liability for various surcharges was \$58,461 and \$33,038, respectively.

G. All Other Contingencies

(1) Premiums and Agents' Balances Receivable

The Company routinely assesses the collectability of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible.

(2) Litigation

The Company and/or its affiliates are named as defendants in various lawsuits arising out of claims made under insurance policies written in the ordinary course of business. The Company considers all legal actions relating to such claims in establishing its loss and LAE reserves.

In addition, the Company and/or its affiliates are named as defendants in a number of class action or individual lawsuits that challenge certain of the operations of the Company and/or its affiliates. Management plans to contest the pending lawsuits vigorously, but may pursue settlement negotiations in some cases, as it deems appropriate. Although outcomes of pending cases are uncertain until final disposition, the Company establishes accruals for these lawsuits when it is probable that a loss has been or will be incurred and Management can reasonably estimate potential loss exposure, which may include a range of loss. As to lawsuits for which the loss is considered neither probable nor estimable, or is considered probable but not estimable, the Company does not establish an accrual. Management continues to evaluate pending litigation to determine if any losses not deemed probable and estimable become so, at which point the Company would establish an accrual at either its best estimate of the loss or the lower end of the range of loss.

The Company shares litigation expenses with other insurance affiliates through a management agreement (see Note 10) and an intercompany quota-share reinsurance agreement (see Note 1).

NOTE 20 Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

(1) Fair Value Measurements by Levels 1, 2, and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

See Note 1.C for further information regarding methods used to determine fair market value.

As of the reporting date, the Company did not measure and report any securities at fair value on the balance sheet. All bonds were carried at amortized cost.

(2) Fair Value Measurements in Level 3 of the Fair Value Hierarchy

Not applicable

(3) Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

See Note 1.C and Note 20.A.1 above.

The following subprime disclosure and the review and procedures described within are completed at a consolidated level for all the Progressive companies. To the extent the Company had any direct subprime exposure, those securities would be listed in Note 21.F.3.

Management's review of the investment portfolio for securities with direct subprime exposure, such as Alt-A residential mortgage loan-backed bonds and home equity loan-backed bonds is performed in conjunction with the OTTI analysis and procedures (see Note 1.C). Additionally, securities that were determined to have an indirect subprime exposure were also reviewed as part of the OTTI process.

The Company's management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the subprime mortgage loan disruption, as well as broader credit and financial market events.

In the reporting period, the Company recorded no OTTI write-downs on any securities as a result of direct subprime exposure.

THE COMPANY'S TOTAL EXPOSURES ARE PRIMARILY IN THE STATE OF FLORIDA. THE BUSINESS IS 90% REINSURED WITH UNITED FINANCIAL CASUALTY COMPANY, AN AFFILIATE, THUS THERE IS LIMITED NET EXPOSURE TO THE COMPANY'S TOTAL SURPLUS. THE ESTIMATE OF THE PML IS 4% OF TOTAL SURPLUS.
