ANNUAL STATEMENT FOR THE YEAR 2025 OF THE PROGRESSIVE PREFERRED INSURANCE COMPANY  
**NOTES TO FINANCIAL STATEMENTS**

**NOTE 1 Summary of Significant Accounting Policies and Going Concern**

**A. Accounting Practices**

The accompanying statutory-basis financial statements of Progressive Preferred Insurance Company (the "Company") were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("DOI").

The DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") subject to any deviations prescribed or permitted by the DOI.

Since Florida insurance reform was enacted in early 2023, the Progressive Group of Insurance Companies (the "Group") has experienced lower loss costs on certain types of personal auto accident claims and favorable reserve development, resulting in strong profitability in its Florida personal auto business. The Group's personal auto profit in Florida for the 2023 to 2025 period exceeded the statutory profit limit that a Florida statute imposes on the profit that any insurance group can earn on personal auto insurance over any three-accident-year period. As a result, the profit earned in excess of the permitted limit will be credited in early 2026 to all Florida personal auto policyholders active at December 31, 2025. The Ohio Department of Insurance granted approval for the use of a permitted accounting practice, which allows for certain policyholder credits to Florida personal auto policyholders to be classified as an underwriting expense. NAIC SAP does not explicitly address the accounting treatment for these types of credits to policyholders. The approval of this permitted accounting practice is effective for all transactions related to the 2023 to 2025 three-accident-year period.

As of December 31, 2025, the Company reported \$33,594,974 in policyholder credit expense, net of intercompany pooling, which represents the Company's share of the current estimate of the profit the Group will earn on the three-accident-year period ending December 31, 2025, in excess of the permitted profit limit. In accordance with the permission granted by the Ohio Department of Insurance, the Company has included this policyholder credit expense in Other underwriting expenses incurred (Page 4, Line 4).

The table below illustrates that there were no deviations from NAIC SAP, and that the permitted practice described above has no net impact on either net income or surplus.

## NOTES TO FINANCIAL STATEMENTS

B. Use of Estimates in the Preparation of the Financial Statements

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense ("LAE") reserves and the Company's adjustment to realized losses for other-than-temporary impairment ("OTTI").

C. Accounting Policy

Premiums, Acquisition Costs, and Nonadmitted Assets:

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company's exposure to credit risk.

Acquisition costs, such as agents' commissions, premium taxes, and other policy initiation costs, as well as advertising costs, are charged to operations as incurred.

Certain assets designated as "nonadmitted assets," in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 4, Assets and Nonadmitted Assets, are reported on page 2 - Assets in column 2. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, Capital and Surplus section.

Investment Policies:

(1) Cash, Cash Equivalents, and Short-term Investments

Cash and cash equivalents can include bank accounts, issuer credit obligations ("ICO") acquired with remaining maturities of three months or less, and ICOs with original maturities of three months or less that are reported at amortized cost, which approximates fair market value. Cash and cash equivalents can also include money market mutual funds valued at fair value or net asset value ("NAV") as a practical expedient.

Short-term investments include ICOs acquired within one year of maturity or with an original maturity of one year or less, excluding those with maturities of three months or less (see cash and cash equivalents above). ICOs with an original maturity of one year or less are reported at amortized cost, which approximates fair market value.

(2) Bonds

Investment-grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider ("CRP") designations and are reported at amortized cost using the scientific method, which closely approximates the effective interest method. Non-investment-grade bond valuations are also based on NAIC designations or NAIC CRP designations and are reported at the lower of amortized cost or fair market value ("LCM"). Changes in LCM are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Asset-backed securities follow the guidance prescribed by SSAP No. 43, Asset-Backed Securities ("SSAP No. 43"), for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.

(3) Common Stocks

Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market value based on active market closing quotations from a regulated exchange. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(4) Preferred Stocks

Nonredeemable preferred stocks are reported at fair market value and are not to exceed currently effective call price. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(5) Mortgage Loans

Not applicable

(6) Asset-backed Securities

Asset-backed securities are accounted for as prescribed by SSAP No. 43. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Interest income for asset-backed securities is included in net investment gain based on estimated cash flows, including expected changes in interest rates and estimated prepayments of principal. Prepayment assumptions are reviewed and updated quarterly, and effective yields are recalculated when differences arise between the prepayments originally estimated, and the actual prepayments received and currently estimated. The sources used to determine prepayment assumptions are derived from updated cashflows from widely utilized reputable industry sources. The Company's portfolio managers review the available cashflow data and prepayment assumptions and make adjustments based on current performance indicators on the underlying assets (e.g., delinquency rates, foreclosure rates, and default rates), credit support (via current levels of subordination), and historical credit ratings.

For asset-backed securities of high credit quality, the effective yield is recalculated on a retrospective basis to the inception of the investment holding period, and applies the required adjustment, if any, to the cost basis, with the offset recorded to net investment gain. For those securities below high credit quality, interest-only securities, and certain asset-backed securities where there is a greater risk of non-performance, the effective yield is recalculated on a prospective basis for future period adjustments, resulting in no current period impact (see Note 5.D).

(7) Investments in Subsidiaries, Controlled and Affiliated Entities

Not applicable

(8) Investments in Joint Ventures, Partnerships and Limited Liability Companies

Not applicable

(9) Derivatives

Not applicable

Fair Market Values, Realized Gains and Losses, and Other-Than-Temporary Impairment:

The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. The approved methods for computation of fair market value are prescribed in the Purposes and Procedures Manual of the NAIC Investment Analysis Office.

Determining the fair value of the investment portfolio is the responsibility of the Company's management. As part of the responsibility, Management evaluates whether a market is distressed or inactive in determining the fair value for the Company's portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market.

Realized gains and losses on sales of securities are computed based on the first-in, first-out method.

ANNUAL STATEMENT FOR THE YEAR 2025 OF THE PROGRESSIVE PREFERRED INSURANCE COMPANY

## NOTES TO FINANCIAL STATEMENTS

The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for OTTI requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43). This evaluation reflects Management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

Asset-backed securities are analyzed for impairment under SSAP No. 43. An initial review is performed to determine whether it is likely the Company would be required, or intends, to sell any securities prior to the recovery of their respective cost bases (which could be maturity), and if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. For those securities the Company determines it is not likely, or does not intend, to sell prior to a potential recovery, additional analysis is performed to determine if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

When persuasive evidence exists that causes Management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

#### Loss, LAE, and Premium Deficiency Reserves:

Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company reviews a large majority of its reserves by product/state subset combinations on a quarterly time frame, with the remaining reserves generally reviewed on a semiannual basis. A change in the Company's scheduled reviews of a particular subset of the business depends on the size of the subset or emerging issues relating to the product or state (see Notes 25 and 33).

The Company does not anticipate investment income when evaluating the need for premium deficiency reserves (see Note 30).

(1) Nature and Amount of Assessments

The Company is subject to state guaranty fund and other assessments based on where it writes business. State guaranty fund assessments are accrued at the time of any known insolvencies. Other assessments are accrued either at the time of assessment or at the time the premiums are written. These accruals are based on information received from the state and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

As of December 31, 2025 and 2024, the Company's estimated liability for state guaranty fund and other assessments was \$993,073 and \$900,775, respectively.

As of December 31, 2025 and 2024, the Company's estimated liability for various surcharges was \$671,913 and \$706,637, respectively.

E. Product Warranties

(1) Accounting Policy and Methodology

The Company and/or its affiliates write Mechanical Breakdown insurance, which is reported on Annual Statement Line 30 – Warranty, and provides coverage for major system repairs including mechanical and electrical failures (e.g., engine, transmission, air conditioning/heating) once the manufacturer's warranty expires. Mechanical Breakdown must be continuously in force on the policy and renewed each term from initial time of purchase until a loss occurs to be eligible for coverage. The reserves are immaterial and include an assumption that the carried reserves equal the indicated reserves. The Company shares Warranty losses with other insurance affiliates through a 100% intercompany pooling reinsurance agreement (see Note 26).

G. All Other Contingencies

(1) Premiums and Agents' Balances Receivable

The Company routinely assesses the collectability of premiums and agents' balances receivable and records a bad debt reserve for amounts exceeding the nonadmitted balance that the Company believes are uncollectible.

(2) Litigation

The Company and/or its affiliates are named as defendants in various lawsuits arising out of claims made under insurance policies written in the ordinary course of business. The Company considers all legal actions relating to such claims in establishing its loss and LAE reserves.

In addition, the Company and/or its affiliates are named as defendants in a number of class action or individual lawsuits that challenge certain of the operations of the Company and/or its affiliates. Management plans to contest the pending lawsuits vigorously, but may pursue settlement negotiations in some cases, as it deems appropriate. Although outcomes of pending cases are uncertain until final disposition, the Company establishes accruals for these lawsuits when it is probable that a loss has been or will be incurred and Management can reasonably estimate potential loss exposure, which may include a range of loss. As to lawsuits for which the loss is considered neither probable nor estimable, or is considered probable but not estimable, the Company does not establish an accrual. Management continues to evaluate pending litigation to determine if any losses not deemed probable and estimable become so, at which point the Company would establish an accrual at either its best estimate of the loss or the lower end of the range of loss.

The Company shares litigation expenses with other insurance affiliates through a 100% intercompany pooling reinsurance agreement (see Note 26).

**NOTE 20 Fair Value Measurements**

A. Inputs Used for Assets and Liabilities Measured at Fair Value

(1) Fair Value Measurements by Levels 1, 2, and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

See Note 1.C for further information regarding methods used to determine fair market value.

Fair Value Measurements at Reporting Date:

Description for each class of asset or liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at fair value

(1) Description of the Subprime-Mortgage-Related Risk Exposure and Related Risk Management Practices

The following subprime disclosure and the review and procedures described within are completed at a consolidated level for all the Progressive companies. To the extent the Company had any direct subprime exposure, those securities would be listed in Note 21.F.3.

Management's review of the investment portfolio for securities with direct subprime exposure, such as Alt-A residential mortgage loan-backed bonds and home equity loan-backed bonds is performed in conjunction with the OTTI analysis and procedures (see Note 1.C). Additionally, securities that were determined to have an indirect subprime exposure were also reviewed as part of the OTTI process.

The Company's management continues to perform a detailed review of its investment portfolio, paying particular attention to the credit profile of the issuers to identify the extent to which any asset values may have been impacted by direct or indirect exposure to the subprime mortgage loan disruption, as well as broader credit and financial market events.

In the reporting period, the Company recorded no OTTI write-downs on any securities as a result of direct subprime exposure.

**NOTE 26 Intercompany Pooling Arrangements**

The Company participates in a pooling reinsurance agreement with the property-casualty affiliates listed below (the "Agency Pool") under which 100% of the underwriting business of each member company, net of external reinsurance, is ceded to Casualty, the Agency Pool manager and an Agency Pool participant. The combined premiums, losses, and expenses are then retroceded to each Agency Pool member based on pre-determined pooling percentages.

Progressive Hawaii Insurance Corp. ("Hawaii"), an insurance affiliate domiciled in Ohio and National Continental Insurance Company ("National Continental"), an insurance affiliate domiciled in New York, terminated their future participation in the Agency Pool effective November 5, 2005 and January 1, 1996, respectively. Hawaii and National Continental have zero percent retrocession participation in the Agency Pool for all policies written prior to the dates listed above.

The pooling percentages for each Agency Pool participant were as follows:

Company	NAIC Code	2025 Pool %	2024 Pool %
Progressive Casualty Insurance Company (Lead)	24260	49.0%	49.0%
Progressive Northern Insurance Company	38628	12.0%	12.0%

Progressive Hawaii Insurance Corp.	10067	--	--
National Continental Insurance Company	10243	--	--
		100.0%	100.0%

All business written by each Agency Pool participant is subject to pooling. Business ceded by Agency Pool members to non-affiliated reinsurers prior to pooling is primarily due to state-provided reinsurance programs. The Company does not participate in any intercompany sharing of the provision for reinsurance and the write-off of uncollectible reinsurance.

At the end of the reporting period amounts recoverable from and payable to Casualty and all affiliates participating in the Agency Pool are as follows:

Company	Amounts Recoverable	Amounts Payable

**NOTE 33 Asbestos/Environmental Reserves**

The Company is primarily an insurer of motor vehicles, therefore it has limited exposure for asbestos and environmental claims. In accordance with disclosure requirements, the amounts reported for direct, assumed, and net below reflect the Company's pooled share (see Note 26) of the Agency Pool's exposure to asbestos and environmental claims. The Agency Pool's exposure arises from Casualty's participation in various reinsurance pools from 1972 to 1975, which underwrote general liability insurance, Casualty's aggregate stop loss reinsurance agreement with Max for various reinsurance pools from 1972 to 1974, Progressive American Insurance Company's, an insurance affiliate domiciled in Ohio and Agency Pool member, exposure from a limited number of general liability policies issued from 1972 to 1975, and Casualty's aggregate stop loss reinsurance agreement with National Continental for general liability business written on or before November 25, 1985. In prior years, Casualty, Max, and National Continental entered into commutation agreements to commute various reinsurance pool reserves from 1965 to 1975.

The Company records case and DCC reserves based on financial information received from the various external reinsurance pool managers. IBNR reserves are established based on previous experience.

 THE COMPANY DOES NOT WRITE WORKERS' COMPENSATION INSURANCE. ....
- 6.2 Describe the method used to estimate this reporting entity's probable maximum insurance loss, and identify the type of insured exposures comprising that probable maximum loss, the locations or concentrations of those exposures and the external resources (such as consulting firms or computer software models), if any, used in the estimation process:  
 THE COMPANY'S PROBABLE MAXIMUM LOSS (PML) IS ESTIMATED TO REFLECT THE RISK OF CATASTROPHIC WEATHER EVENTS: HURRICANE, FLOODING, SEVERE CONVECTIVE STORMS, AND WINTER WEATHER. THE RESULTS REFLECT THE ANNUAL AGGREGATE LOSSES IN 10,000 SIMULATIONS FOR ALL VEHICLE EXPOSURE. THE VARIOUS WEATHER PERILS ARE MODELED WITH THE COMMERCIAL KATRISK SOFTWARE AND OUR OWN INTERNAL MODELS. THE ESTIMATE OF THE PML WAS MADE EXCLUSIVELY BY PROGRESSIVE EMPLOYEES. THE COMPANY'S NET COMPREHENSIVE EXPOSURE IN THE CATASTROPHE PRONE STATES OF FLORIDA, LOUISIANA, TEXAS, MISSISSIPPI, NEW JERSEY, NEW YORK, AND CALIFORNIA IS LIMITED SINCE THE COMPANY IS A MEMBER OF A 100% POOLING REINSURANCE ARRANGEMENT WITH 12 OF ITS PROPERTY AND CASUALTY AFFILIATES.  NONE .....
- 7.1 Has this reporting entity reinsured any risk with any other entity under a quota share reinsurance contract that includes a provision that would limit the reinsurer's losses below the stated quota share percentage (e.g., a deductible, a loss ratio corridor, a loss cap, an aggregate limit or any similar provisions)?..... Yes [ ] No [ X ]
