ANNUAL STATEMENT FOR THE YEAR 2025 OF THE GREAT AMERICAN CASUALTY INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Great American Casualty Insurance Company ("the Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for purposes of determining its solvency under the Ohio insurance law. The National Association of Insurance Commissioners ("NAIC") Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the state of Ohio. The Company has no prescribed or permitted practices that would result in differences between NAIC Statutory Accounting Principles ("SAP") and the state of Ohio, as shown below:

	SSAP #	F/S Page	F/S Line #	2025	2024
NET INCOME					
(1) State basis (Page 4, Line 20, Columns 1 & 2)	XXX	XXX	XXX	\$ 387,205	\$ 401,376

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premium Recognition - Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Generally, for direct business, such reserves are computed by pro rata measures. For certain collateral protection products, earned premium and unearned premium reserves are computed consistent with the proportion of the total exposure provided throughout the term of the contract. For assumed business, unearned premium reserves are based on reports received from ceding companies.

Underwriting Expense Recognition - Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

In addition, the Company uses the following accounting policies:

- (1) **Basis for Short-Term Investments**
Short-term investments are stated at cost.
- (2) **Basis for Bonds and Amortization Schedule**
Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. Mandatory convertible bonds are stated at the lower of book value or fair value, regardless of the NAIC designation. The Company does not own any SVO Identified Exchange Traded Funds.
- (3) **Basis for Common Stocks**
Common stocks are stated at fair value.
- (4) **Basis for Preferred Stocks**
Redeemable preferred stocks rated 1 and 2 are stated at amortized cost; all others are stated at the lower of amortized cost or fair value. Perpetual preferred stocks are stated at fair value.
- (5) **Basis for Mortgage Loans**
Mortgage loans on real estate are stated at the aggregate unpaid balance, net of unamortized discount.
- (6) **Basis for Asset-Backed Securities and Adjustment Methodology**
For residential mortgage-backed securities ("RMBS") and commercial mortgage-backed securities ("CMBS"), the NAIC has retained a third-party investment management firm to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based on not only the probability of loss, but also the severity of loss. All other asset-backed securities and RMBS or CMBS that are not modeled but receive a current year NAIC Credit Rating Provider ("CRP") rating equal to NAIC 1 and 2 are stated at amortized cost and NAIC 3-6 are stated at lower of amortized cost or fair value.
- (7) **Accounting Policies for Investments in Subsidiaries, Controlled and Affiliated ("SCA") Entities**
Not applicable
- (8) **Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities**

(9) Accounting Policies for Derivatives

(10) Anticipated Investment Income Used in Premium Deficiency Calculation
 The Company does not use anticipated investment income as a factor in premium deficiency calculations.

(11) Management's Policies and Methodologies for Estimating Liabilities for Losses and Loss/Claim Adjustment Expenses
 Unpaid Losses and Loss Adjustment Expenses - The net liabilities stated for unpaid claims and for expenses of investigation and adjustment of unpaid claims are based upon: (a) the accumulation of case estimates for losses reported prior to the close of the accounting period on the direct business written; (b) estimates received from ceding reinsurers and insurance pools and associations; (c) estimates of unreported losses, including possible development on known claims, based on past experience; (d) estimates based on experience of expenses for investigating and adjusting claims; and (e) the current state of the law and coverage litigation. Establishing reserves for asbestos, environmental, and other mass tort claims involve considerably more judgment than other types of claims due to, among other things, inconsistent court decisions, an increase in bankruptcy filings as a result of asbestos-related liabilities, novel theories of coverage, and judicial interpretations that often expand theories of recovery and broaden the scope of coverage.

Loss reserve liabilities are subject to the impact of changes in claim amounts and frequency, as well as other factors. Changes in estimates of the liabilities for losses and loss adjustment expenses are reflected in the Statement of Income in the period in which determined. Despite the variability inherent in such estimates, management believes the liabilities for unpaid losses and loss adjustment expenses are adequate.

(12) Changes in the Capitalization Policy and Predefined Thresholds from Prior Period
 The Company has not modified its capitalization policy from the prior period.

(13) Method Used to Estimate Pharmaceutical Rebate Receivables
 Not applicable

D. Asset-Backed Securities

(1) Description of Sources Used to Determine Prepayment Assumptions

The Company uses dealer-modeled prepayment assumptions for mortgage-backed securities and asset-backed securities at the date of purchase to determine effective yields; significant changes in estimated cash flows from the original purchase assumptions are accounted for on a prospective basis.

(2) Other-Than-Temporary Impairments ("OTTI")

The Company had no asset-backed securities with a recognized OTTI due to either the intent to sell or lack of intent to hold to recovery during the current year.

(3) Recognized OTTI Securities

The Company had no asset-backed securities with a credit-realized OTTI recognized during the current year.

(4) All impaired securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss, including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains:

a) The aggregate amount of unrealized losses:	
1. Less than 12 Months	\$ -
2. 12 Months or Longer	\$ (104,975)
b) The aggregate related fair value of securities with unrealized losses:	
1. Less than 12 Months	\$ -
2. 12 Months or Longer	\$ 2,670,180

(5) Information Investor Considered in Reaching Conclusion that Impairments are Not Other-Than-Temporary

Based on cash flow projections received from independent sources (which reflect loan to collateral values, subordination, vintage and geographic concentration), implied cash flows inherent in security ratings and analysis of historical payment data, management believes that the Company will recover its cost basis in all securities with unrealized losses as of December 31, 2025. The Company has the intent to hold such securities until they recover in value or mature.

ANNUAL STATEMENT FOR THE YEAR 2025 OF THE GREAT AMERICAN CASUALTY INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

(4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement

The Company categorizes its financial instruments based on the degree of subjectivity inherent in the method by which they are valued into a fair value hierarchy of three levels as follows:

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available.

Level 2 - Quoted prices for similar instruments in active markets, quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly), and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments consist primarily of bonds priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads, and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available at the valuation date. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, AMMC, is responsible for the valuation process and uses data from outside sources (including nationally-recognized pricing services and brokers/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices as benchmarks, recent trades, changes in interest rates, general economic conditions, and the credit quality of specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.
