## NOTES TO FINANCIAL STATEMENTS

### Note 1 - Summary of Significant Accounting Policies and Going Concern

#### A. Accounting Practices

The Annual Statement of Triumphe Casualty Company (Company) has been prepared on the basis of accounting practices prescribed or permitted by the State of Ohio Department of Insurance. The Ohio Department of Insurance requires insurance companies domiciled in the state of Ohio to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* subject to any deviations prescribed or permitted by the Ohio Department of Insurance. There are no deviations prescribed or permitted by the Ohio Department of Insurance utilized in the Company's financial statements as shown below:

	SSAP \$	F/S Page	F/S Line #	2025	2024

#### B. Use of Estimates

The preparation of financial statements in accordance with the NAIC *Accounting Practices and Procedures Manual* requires management to make estimates and assumptions that affect amounts reported in these financial statements and notes. It also requires the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from the estimates and assumptions used.

#### C. Accounting Policies

Premiums that are written, assumed and ceded under the Company's insurance policies and reinsurance contracts are earned over the terms of the related policies and contracts on a pro rata basis. Unearned premiums are established as liabilities and represent the portion of premiums written, but not yet earned.

Unlike the recognition of premiums revenue, expenses incurred while producing new insurance business such as commissions and premium taxes are charged to operations as incurred and ceding allowances received or receivable are credited to operations through reductions in expenses incurred.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at cost.
2. Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. Mandatory convertible bonds are stated at the lower of book value or fair value, regardless of the NAIC designation. The Company does not own any SVO Identified Exchange Traded Funds.
3. The Company does not have any investments in common stocks.
4. The Company does not have any investments in preferred stocks.
5. The Company does not have any investments in mortgage loans.
6. For residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS), the NAIC has retained a third-party investment management firm to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based on not only the probability of loss, but also the severity of loss. All other asset-backed securities and RMBS or CMBS that are not modeled but receive a current year NAIC Credit Rating Provider (CRP) rating equal to NAIC 1 and 2 are stated at amortized cost and NAIC 3-6 are stated at lower of amortized cost or fair value. The Company does not have any investments in subsidiaries, controlled or affiliated companies.
7. The Company does not have any investments in subsidiaries, controlled or affiliated companies.
8. The Company does not have any investments in joint ventures, partnerships or limited liability companies.
9. The Company does not have any investments in derivative instruments.
10. The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.
11. Unpaid losses and loss adjustment expense reserves represent management's best estimate of net costs for all reported and unreported losses incurred. The Company does not discount loss and loss adjustment expense reserves. The reserves for unpaid losses and loss adjustment expenses include an

amount determined using individual case estimates, loss reports, and an amount, based on past experience, for losses incurred but not reported. Those estimates are subject to the effects of trends in loss severity and frequency. Although considerable variability is inherent in such estimates and the ultimate liability may be in excess of or less than the amounts provided, management believes that the reserves for losses and loss adjustment expenses are adequate. The estimates are continually reviewed and adjusted as necessary as experience develops or new information becomes known; such adjustments are reflected in the period determined.

12. The Company has a capitalization policy for prepaid expenses and purchases of items such as office equipment, software/hardware, furniture, vehicles, and other equipment and leasehold improvements. The predefined capitalization thresholds under this policy have not changed from those of the prior year.
13. The Company is a property and casualty insurance company only and does not write major medical and/or prescription drug coverage.

3. The Company does not have any asset-backed securities with an OTTI recognized during 2025.

5. ### **Note 20 – Fair Value Measurements**

#### A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

##### 1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

## NOTES TO FINANCIAL STATEMENTS

Level 3 inputs are unobservable inputs for the asset or liability.

The following table provides information as of December 31, 2025 about the Company's investments measured at fair value.

### 2. Rollforward of Level 3 Items

The Company did not hold any Level 3 securities carried at fair value during the year ended December 31, 2025.

### 3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between levels. The Company's policy is to recognize transfers in and transfers out as of the end of the reporting period.

### 4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company's investment manager, American Money Management Corporation ("AMMC") (an affiliate) is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company's affiliated investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment professionals compare the valuation received to independent third party pricing sources and consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the pricing service to value specific securities.

Level 1 consists of publicly traded equity securities and highly liquid, direct obligations of the U.S. Government whose fair value is based on quoted prices that are readily and regularly available in an active market. Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and perpetual preferred stocks that are not actively traded. Level 3 consists of valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information. The Company primarily uses the market approach valuation technique for all investments.
