B. Use of Estimates in the Preparation of the Financial Statements - No Significant Changes

C. Accounting Policy

The Company uses the following accounting policies:

- (1) Short-term investments - No Significant Changes
- (2) Investments

The Company accounts for its investments in bonds at amortized cost. Bonds consist of obligations issued and guaranteed by the U.S. Government or its agencies. The Company utilizes the level-yield method to amortize premiums and accrete discounts over the stated maturity period of the related investment and is reported in net investment income.

Gains or losses on investments sold are based on the specific identification method and are included in investment income net of tax. Investment purchases and sales are recorded on the trade date. Interest income is accrued when earned.

The Company employs a systematic methodology that considers available evidence in evaluating potential other-than-temporary impairment of investments. In the event that the cost of an investment exceeds its fair value, the Company evaluates, among other factors, the magnitude and duration of the decline in fair value; the financial health of and business outlook for the issuer; changes to the debt rating of the issuer, or specific security, by a rating agency; and the performance of the underlying assets. For debt investments, an assessment is made by the Company as to its ability and intent to hold the security, and the probability that the Company will be able to collect all amounts due according to the debt security’s contractual terms in effect at the date of acquisition. Once a decline in fair value of an investment security is determined to be other than temporary, an impairment charge is recorded to net realized capital gains and losses, in the statement of income, and a new cost basis in the investment is established.

20. Fair Value Measurements

A. Fair Value Measurement

With regard to the Company’s financial assets that are disclosed at a fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, the Company uses various valuation approaches, including quoted market prices and discounted cash flows. The Accounting Standards Codification (“ASC”) and SSAP No. 100, “Fair Value Measurement” establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that most observable inputs be used when available. Observable inputs are obtained from independent sources and can be validated by a third party, whereas, unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. The fair value hierarchy is broken down into three levels based on the reliability of inputs as follows:

- Level 1 - Valuations based on quoted prices in active markets for identical instruments that the Company is able to access. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.
- Level 2 – Valuations based on quoted prices in active markets for instruments that are similar, or quoted prices in markets that are not active for identical or similar instruments, and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3 – Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

Reclassification of certain financial instruments may occur when observability of inputs change. There were no transfers between assets carried at fair value classified within Level 1 and Level 2 of the fair value hierarchy during the period ending March 31, 2025, and the year ended December 31, 2024.

There were no purchases, sales, transfers into or transfers out of assets carried at fair value and classified within Level 3 of the fair value hierarchy for the period ending March 31, 2025, and the year ended December 31, 2024.

The Company does not have any material financial assets or liabilities carried at fair value.

There were no assets or liabilities measured and reported at fair value on a non-recurring basis in 2025 or 2024.

Fair Value of Financial Instruments:

The following methods and assumptions were used to estimate the fair value of financial instruments.

- Level 1 – Financial assets include cash and cash equivalents. Unadjusted quoted prices for these securities are provided by an independent pricing service.
- Level 2 – Financial assets include US Treasury and US Government agency bonds. Prices are provided using third-party pricing services, such as model-based pricing methods that utilize observable market data as inputs. Broker-dealer bids or quotes of securities with similar characteristics may also be used.

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination - Not Applicable

25. Changes in Incurred Losses and Loss Adjustment Expenses

A. Reasons for Changes in the Provision for Incurred Loss and Loss Adjustment Expenses Attributable to Insured Events of Prior Years

The Company writes two lines of business, “Other”, which is excess share insurance, and Surplus Lines.

“Other” has loss reserves set on a prudent basis for potential claims events. Excess insurance claims events are infrequent (rare) but potentially severe and as a result, upon consultation with the Company’s independent actuary, the Company provides annual loss reserve additions so that cumulative loss reserves are within an actuarially accepted range. Further, since the Company has no specific loss events identified, for which a loss reserve would normally be established, all of the Company’s loss reserves are unallocated IBNR loss reserves. As a result, for purposes of Schedule P, in any given year the cumulative loss reserves held are considered to have occurred as follows: (1) 60% in current year; (2) 30% in the previous year; and (3) 10% in the second previous year and have been allocated as such in Schedule P, which is comparable to methods used by other insurance companies with infrequent claims events. Since claims events are rare (infrequent but potentially severe), the typical year shows favorable development.

The Company began writing Surplus Line insurance in the 2nd quarter of 2024 and has set reserves at \$300,000 for this line of business. The Company accounts for Surplus Lines reserves in the same manner as described above for the “Other” line of business, including the allocation of losses to prior years and that the typical year will show favorable development.
