STATEMENT AS OF March 31, 2025 OF THE Root Property & Casualty Insurance Company

NOTES TO FINANCIAL STATEMENTS

NOTE 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

Basis of Presentation - The financial statements of Root Property & Casualty Insurance Company ("Root Property & Casualty", the "Company" or "RPC") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance. The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the State of Ohio for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Ohio Insurance Law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Ohio, subject to any deviations prescribed or permitted by the Ohio Department of Insurance.

There are no significant differences between Ohio prescribed practices and the NAIC SAP which affect the Company.

The following reconciliation table illustrates the Company's net income and capital and surplus under NAIC SAP and those practices prescribed and permitted by the State of Ohio:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of statutory financial statements requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the statutory financial statements and the reported amounts of revenue and expense during the reporting period. Actual results could differ from those estimates.

C. Accounting Policies

Premiums are recognized as earned pro rata over the policy period. Unearned premium is established to cover the unexpired portion of premiums written. A premium deficiency reserve, as calculated on a gross basis, is recorded when the sum of expected losses, loss adjustment expenses and maintenance costs exceed the recorded unearned premium reserve and anticipated investment income. A premium deficiency reserve is recognized by accruing an additional liability for the deficiency, with a corresponding charge to operations. The Company did not record a premium deficiency reserve in 2025 or 2024.

Acquisition costs, including commissions paid to Root Insurance Agency ("RIA"), premium taxes, and other policy initiation costs, are charged to operations as incurred. Ceding commissions received under the terms of the Company's quota share reinsurance treaties are recorded as a reduction of underwriting expenses. If the ceding commission percentage exceeds the acquisition costs of the business ceded the excess ceding commission is recorded as a deferred liability and amortized over the period in which the related premiums are earned.

Loss and loss adjustment expense reserves include an amount determined from case-base estimates for reported claims and on estimates, based on experience and perceived trends, for unreported losses and loss expenses. These reserves have been established to cover the estimated ultimate cost to settle insured losses. The amounts are based on estimates of loss cost trends and other factors, and accordingly the ultimate liability may vary materially from such estimates. These estimates are continually reviewed by management and adjusted as necessary; with adjustments included in the period determined. As such, loss and loss adjustment expense reserves represent management's best estimate of the ultimate liability related to reported and unreported claims.

In the ordinary course of business, the Company cedes a portion of its business written to limit the maximum net loss potential arising from large risks and catastrophes. These arrangements, known as treaties, provide for reinsurance coverage on quota share (QS) and excess of loss (XOL) basis. Although the ceding of reinsurance does not discharge the Company from its primary liability to its policyholder, the insurance company that assumes the coverage assumes the related liability. Amounts recoverable from reinsurers are estimated in a manner consistent with the claim liability associated with the reinsured business. Ceded reinsurance premiums are recognized over the remaining policy period based on the reinsurance protection provided. The Company evaluates and monitors the financial condition associated with its reinsurers in order to minimize its exposure to significant losses from reinsurer insolvencies. Management evaluates, and may update, each reinsurance treaty to ensure the economic conditions remain advantageous to the Company and its affiliates. All reinsurance contracts provide for indemnification against loss or liability relating to insurance risk and have been accounted for as reinsurance.

Cash consists of cash on deposit. Cash equivalents are short-term, highly liquid investments that mature within three months from the date of origination. Money market mutual funds are stated at fair value and other cash equivalents are principally stated at amortized cost, which approximates their fair value. Short-term investments are securities with an original maturity greater than 3 months, but less than 1 year, and are stated at amortized cost, which approximates fair value.

STATEMENT AS OF March 31, 2025 OF THE Root Property & Casualty Insurance Company

NOTES TO FINANCIAL STATEMENTS

Bonds are valued in accordance with the valuations prescribed by the NAIC. Bonds with an NAIC designation of 1 or 2 are valued and reported at amortized cost. Bonds with an NAIC designation of 3 through 6 are carried at the lower of amortized cost or fair value, with the difference reflected in unassigned surplus.

Investment income is recognized when earned. Realized investment gains and losses are determined on the basis of specific identification. The effective interest method is used for amortization of premiums or discounts. Unrealized gains and losses, net of taxes, on investments are included in unassigned surplus.

Other invested assets consist of partnership interests in tax credit funds and are held at amortized cost with amortization charged to investment income over the period in which the tax benefits, primarily credits, are utilized.

Asset-backed securities are stated in accordance with the guidance provided in SSAP No. 43R: Asset-backed Structured Securities. The retrospective adjustment method is used to value these securities.

(1) For fixed-rate agency mortgage-backed securities, the Company reviews calculations from a third party vendor utilizing Mortgage Industry Advisory Corporation (MIAC) Mortgage Industry Medians (MIMs) for prepayment speeds. MIMs are derived from a semi-monthly dealer-consensus survey of long term prepayment projections. For other mortgage-backed, asset-backed, and structured securities, Clearwater utilizes prepayment assumptions from Moody's Analytics. Moody's applies a flat economic credit model and utilizes a vector of multiple monthly speeds as opposed to a single speed for more robust projections. In instances where Moody's projections are not available, Clearwater uses data from Reuters, which utilizes the median prepayment speed from contributors' models.

(3) The Company records transfers between Fair Value Levels at the end of each reporting period.

(4) Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which utilizes processes and other relevant information generated by market transactions involving identical or comparable assets or liabilities. To a lesser extent, the Company also uses the income approach which uses discounted cash flows to determine fair value. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs reflect the assumptions market participants would use in valuing a financial instrument based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's estimates about the assumptions market participants would use in valuing financial assets and financial liabilities based on the best information available in the circumstances.

The Company is required to categorize its financial assets and financial liabilities carried at fair value on the statutory statements of admitted assets, liabilities and capital and surplus according to a three-level hierarchy. A level is assigned to each financial asset and financial liability based on the lowest level input that is significant to the fair value measurement in its entirety. The levels of fair value hierarchy are as follows.

Level 1 - Fair Value is based on unadjusted quoted prices for identical assets or liabilities in an active market. The types of assets and liabilities utilizing Level 1 valuations generally include money-market funds.

STATEMENT AS OF March 31, 2025 OF THE Root Property & Casualty Insurance Company

NOTES TO FINANCIAL STATEMENTS

Level 2 - Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable in active markets for identical or similar assets and liabilities.

Level 3 - Fair value is based on at least one or more significant unobservable inputs. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the assets or liabilities.

The fair value of the Company's financial assets and financial liabilities has been determined using available market information as of March 31, 2025.

Although the Company is not aware of any factors that would significantly affect the fair value of financial assets and financial liabilities such amounts have not been comprehensively revalued since those dates. Therefore, estimates of fair value subsequent to the valuation dates may differ significantly from the amounts presented herein. Considerable judgement is required to interpret master data to develop the estimates of fair value. The use of different market assumption and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The Company uses prices and inputs that are current as of the measurement date. In periods of market disruption, the ability to observe prices and inputs may be reduced, which could cause an asset or liability to be reclassified to a lower level.

Inputs used to measure fair value or an asset or liability may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value based upon the lowest level input that is significant to the determination of the fair value.
