B. Use of Estimates in the Preparation of the Financial Statements
The preparation of financial statements in conformity with Statutory Accounting Principles as described in the NAIC Annual Statement Instructions and the Accounting Policies and Procedures Manual requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy
(1) Basis for Short-Term Investments
No significant changes

(2) Basis for Bonds and Amortization Schedule
Bonds not backed by other loans are stated at amortized cost using the scientific amortization method.

(3) - (5) No significant changes

(6) Basis for Loan-Backed Securities and Adjustment Methodology
Loan-backed securities are stated in accordance with the guidance provided in SSAP No. 43R: Loan-backed and Structured Securities. The restrospective adjustment method is used to value these securities

NOTE 20 Fair Value Measurements

- A. Fair Value Measurements
SSAP No. 100, Fair Value Measurements, clarifies the definition of estimated fair value and establishes a hierarchy for measuring estimated fair value. The hierarchy established by this standard consists of three levels to indicate the quality of the estimated fair value measurements as described below.
- Level 1 - Quoted Prices in Active Markets for Identical Assets and Liabilities: Unadjusted quoted prices for identical assets or liabilities in active markets that are readily and regularly obtainable.
- Level 2 - Significant Other Observable Inputs: Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1.
- Level 3 - Significant Unobservable Inputs: Prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Inputs reflect management's best estimates of the assumptions market participants would use at the measurement date in pricing the asset or liability. Consideration is given to the risk inherent in both the method of valuation and the valuation inputs. Primary inputs to this valuation technique include broker quotes, comparative trades, and independent third-party providers.
- The Company reviews its fair value heirarchy classifications for assets and liabilities quarterly. Changes in observability of significant valuation inputs identified during these reviews may trigger reclassifications in or out of Level 3. Reclassifications are reported as transfers at the beginning of the period in which the change occurs.
- The estimated fair values for substantially all bonds, including loan-backed and structured securities, unaffiliated common stock and certain short-term investments are based on quoted prices or quotations on comparable securities in active markets that are readily and regularly obtainable. Valuation of these securities does not involve management's judgement.
- When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data.
- When observable inputs are not available, the market standard valuation methodologies for determining the estimated fair value of certain types of securities that trade infrequently, and therefore have little or no price transparency, rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These observable inputs can be based in large part on management's judgement or estimation, and cannot be supported by reference or maket activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances.

NOTE 25 Change in Incurred Losses and Loss Adjustment Expenses
Reserves for the Company's incurred losses and loss adjustment expenses (after intercompany pooling) attributable to insured events of prior years reflect favorable development totaling \$370,882. The development can be attributed primarily to the re-estimation of unpaid losses and loss adjustment expenses in the homeowners and farmowners, private passenger auto liability, commercial auto liability, workers' compensation, auto physical damage, other liability, and other lines of buisness. The favorable development in these lines was slightly offset by losses in commercial multiple peril and products liability. The changes reflected in these lines were generally the result of recent development trends. There were not any premium adjustments made as a result of this loss and loss adjustment expense development.

NOTE 26 Intercompany Pooling Arrangements

A. Identification of the Lead Entity and all Affiliated Entities Participating in the Intercompany Pool
Motorists Mutual Insurance Company is the lead company in the Encova Pool. Each member contributes 100% of its applicable results to the Encova Pool through the reinsurance pooling agreement.
