Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Branch Insurance Exchange (the "Company") are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance requires insurance companies domiciled in the state of Ohio to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) subject to any deviations prescribed or permitted by the Ohio Department of Insurance.

A reconciliation of the company's net income and capital surplus between NAIC SAP and practices prescribed and permitted by the State of Ohio are as follows below:

	SSAP #	F/S Page	F/S Line #	06/30/2025	12/31/2024

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Direct and ceded premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods.

Commissions and other expenses incurred in connection with acquiring new insurance business are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Net investment income earned consists of interest less investment related expenses. Interest is recognized on an accrual basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed, or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Investment grade bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds with NAIC designation of 3 through 6 would be stated at lower of amortized cost or fair values. The Company does not currently have any of these non-investment grade bonds. The Company's bond portfolio is reviewed quarterly and as a result the carrying value of a bond may be reduced to reflect changes in valuation resulting from asset impairment. The Company does not hold any mandatory convertible securities or SVO-identified investments referenced in SSAP No. 26R.
- (3) Common stocks - Not Applicable
- (4) Preferred stocks - Not Applicable
- (5) Mortgage loans - Not Applicable
- (6) Investment grade loan-backed securities are stated at amortized cost. The retrospective adjustment method is used to determine amortized value for all loan-backed securities. Non-investment grade loan-backed securities with NAIC designations of 3 through 6 would be stated at the lower of cost or fair value. The Company does not currently have any non-investment grade loan-backed securities.

The carrying value and final NAIC designation for non-agency residential mortgage-backed securities are determined using a special two-step NAIC process. Those assigned a NAIC designation in first step of 1 or 2 are stated at amortized cost and those assigned a 3 through 6 are stated at the lower of amortized cost or fair value. The NAIC designation assigned under the second step of the process is reported for these securities in Schedule D and is used in the risk-based capital calculation. The Company does not currently have any non-agency residential mortgage-backed securities.

- (11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of, or less than, the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

1. Summary of Significant Accounting Policies and Going Concern (Continued)

(13) Pharmaceutical rebate receivables - Not Applicable

D. Going Concern

On September 13, 2024, the Company issued its audited statutory financial statements for the year ended December 31, 2023. At that time, management identified substantial doubt about the Company's ability to continue as a going concern for the following 12 months. This assessment was based on insufficient cash and invested assets to cover projected operating losses and meet regulatory capital requirements.

As of December 31, 2024, the Company met its capital requirement with no further capital support from Branch Financial, LLC. In addition, based on management's assessment, as of May 15, 2025, the Company projects that it will have sufficient cash and invested assets to cover operational losses for the following 12 months and will meet its capital requirement without further capital support from Branch Financial, LLC.

During 2024 and into 2025, the Company improved operational performance and significantly reduced exposure to catastrophe losses. The improvement in financial condition is attributed to several corrective actions, including rate increases, higher policyholder surplus contributions, and revised underwriting guidelines, which collectively led to favorable loss ratio trends for the current accident year. The Company also aligned its operating expenses with its business volume through workforce reductions and other cost-saving initiatives.

These measures have strengthened the Company's financial position, enabled more favorable reinsurance renewal terms with enhanced pricing and surplus protection, and allowed the Company to resume actively writing new business.

Based upon its evaluation of relevant conditions and events, management does not have substantial doubt about the Company's ability to continue as a going concern.

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months..... \$..... - .
2. 12 months or longer..... 4,084,738 .

(5) The Company determines a decline to be other than temporary by reviewing and evaluating relevant objective and subjective factors for each security, including the extent of the depressed value, the length of time the value has been depressed, the Company's intent and ability to hold the security, a security's current performance, the financial condition of the issuer, the industry in which the issuer operates, and the status of the market as a whole. Assessments include judgments about an obligor's or guarantor's current and projected financial position, projected ability to service and repay its debt obligations, the existence of and realizable value for, any collateral backing the obligations, and the macro-economic and micro-economic outlooks for specific industries and issuers. Estimating the future cash flows of asset-backed securities also involves assumptions regarding the underlying collateral such as prepayment rates, default and recovery rates, existence of subordinated classes capable of absorbing losses, and third-party servicing abilities. There have been no security declines determined to be other than temporary in the current or prior year.

Along with their policy premium, subscribers agree to make a surplus contribution to the Company equal to a percentage of all premiums. The surplus contribution is payable to the Company on or prior to the initial effective date of coverage and on or prior to the effective date of all endorsements generating additional premium. The amounts paid as surplus contributions are credited to policyholder surplus for the benefit and protection of subscribers. Upon the issuance of a policy, or any other confirmation of coverage by the Company, the return of surplus contributions can occur only after withdrawal of the subscriber from the Company, and only with the approval of BFL and regulating authorities, where so required. The Company will return any surplus contributions (without interest) made during the policy term on a pro-rata basis to those subscribers who terminate coverage for any reason proportional to their unearned premiums returned. All other surplus contributions, including those made on previous policy terms, are retained by the Company for the benefit of all remaining subscribers unless otherwise distributed into subscriber savings accounts.

The below table summarizes the surplus notes issued and outstanding as of the end of the reporting period.

20. Fair Value Measurements

A. Fair Value Measurement

SSAP 100, Fair Value Measurements, establishes a framework for measuring fair value. That framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are described as follows:

- Level 1 - Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level 2 - Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable; or inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 - Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

The fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company believes its valuation methods are appropriate and consistent with other market participants. The use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

25. Changes in Incurred Losses and Loss Adjustment Expenses

A. Reasons for Changes in the Provision for Incurred Loss and Loss Adjustment Expenses Attributable to Insured Events of Prior Years

Reserves as of December 31, 2024 were \$33,035,609. As of June 30, 2025, \$12,624,451 has been paid on a net basis for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$17,903,134 on a net basis as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been \$2,508,024 of favorable prior-period development from December 31, 2024 to June 30, 2025. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims included in this decrease.

The company does not write any retrospectively rated policies.
