The Company is licensed as a health insuring corporation in Ohio by the Ohio Department of Insurance. The Company offers dental benefit plans.

A. Accounting Practices

The statutory basis financial statements (herein referred to as “financial statements”) of the Company are presented on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance.

The Ohio Department of Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Ohio for determining and reporting the financial condition and results of operations of a health insuring corporation, for determining its solvency under Ohio Insurance Law. The state of Ohio prescribes the use of the National Association of Insurance Commissioners’ Accounting Practices and Procedures manual in effect for the accounting periods covered in the financial statements.

No significant differences exist between the practices prescribed or permitted by the state of Ohio and the National Association of Insurance Commissioners’ Accounting Practices and Procedures manual, also known as NAIC SAP which materially affect the statutory basis net income (loss) and capital and surplus, as illustrated in the table below:

20. FAIR VALUE MEASUREMENTS

The National Association of Insurance Commissioners' Accounting Practices and Procedures manual defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 — Quoted (unadjusted) prices for identical assets in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and cash equivalents are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service ("pricing service"), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source; prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company's internal price verification procedures and review of fair value methodology documentation provided by independent pricing services have not historically resulted in an adjustment in the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest-level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

U.S. government and agency securities, state and agency municipal securities, city and county municipal securities, and corporate debt securities are now included as a component of issuer credit obligations and asset-backed securities as of June 30, 2025, whereas in 2024, these securities were listed in separate categories. The current year disclosures and corresponding tables reflect this change in presentation. No presentation change has been made to the prior year tables.
