B. No significant change.

C. Accounting Policies

Bonds with a NAIC rating 1 and 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. Mandatory convertible bonds are stated at the lower of book value or fair value, regardless of the NAIC designation. The Company does not own any SVO Identified Exchanged Traded Funds.

For residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS) and all other asset-backed securities, the NAIC has retained third-party investment management firms to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based not only on the probability of loss, but also the severity of loss. RMBS, CMBS and all other asset-backed securities that are not modeled receive a current year NAIC Credit Rating Provider equivalent designation. The prospective adjustment method is used for all these securities.

D. Going Concern

Based on its evaluation of relevant conditions and events, management does not have substantial doubt about the Company's ability to continue as a going concern.

2. The Company had no asset-backed securities with a recognized other-than-temporary impairment ("OTTI") due to either the intent to sell or the inability or lack of intent to hold to recovery during the six months ended June 30, 2025.

NOTES TO FINANCIAL STATEMENTS

3. The Company does not have any asset-backed securities with an OTTI recognized during the six months ended June 30, 2025.

4. The following table shows all asset-backed securities with an unrealized loss:

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

NOTES TO FINANCIAL STATEMENTS

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date.

Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves.

Level 3 inputs are unobservable inputs for the asset or liability.

The following table provides information as of June 30, 2025 about the Company’s investments measured at fair value.

Assets at fair value	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
Bonds:					
Issuer credit obligations	\$ -	\$ 307,310	\$ -	\$ -	\$ 307,310
Total assets at fair value	\$ -	\$ 307,310	\$ -	\$ -	\$ 307,310

2. Rollforward of Level 3 Items

The Company did not hold any Level 3 securities carried at fair value during the three months ended June 30, 2025.

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred between levels. The Company’s policy is to recognize transfers in and transfers out as of the end of the reporting period.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company’s investment manager, American Money Management Corporation (“AMMC”) (an affiliate), is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value. Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses, and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company’s affiliated investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment professionals compare the valuation received to independent third-party pricing sources and consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions, and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the pricing service to value specific securities.

Level 1 consists of publicly traded equity securities and highly liquid, direct obligations of the U.S. Government whose fair value is based on quoted prices that are readily and regularly available in an active market. Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and perpetual preferred stocks that are not actively traded. Level 3 consists of valuations derived from market valuation techniques generally consistent with those used to estimate the fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management’s own assumptions about the assumptions market participants would use based on the best information available in the circumstances. The Company’s Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or

NOTES TO FINANCIAL STATEMENTS

internally developed using significant inputs not based on, or corroborated by, observable market information. The Company primarily uses the market approach valuation technique for all investments.
