Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The statutory Financial statements of OhioHealthy Health Insuring Corporation have been prepared on the statutory basis of accounting, in accordance with the accounting practices adopted by the National Association of Insurance Commissioners (NAIC) codification project (Codification), as prescribed or permitted by the Ohio Department of Insurance (DOI). These practices differ in some respects from U.S. generally accepted accounting principles (GAAP). For statutory purposes, certain assets are accorded no value and thus reduce statutory capital and surplus. Also, short term investments and bonds are recorded at amortized cost for statutory purposes which differ from GAAP whereby short-term investments and bonds may be recorded at fair value. The presentation of the direct method statutory statement of cash flows under Codification is different from what would be presented under GAAP for cash flows from investing and financing activities.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

20. Fair Value Measurements

The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The hierarchy gives the highest priority to fair values determined using unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to fair values determined using unobservable inputs (Level 3). An asset's or liability's classification is determined based on the lowest level input that is significant to its measurement.

For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3). The levels of the fair value hierarchy are as follows:

- Level 1: Inputs are unadjusted, quoted prices for identical assets or liabilities in active markets at the measurement date.
- Level 2: Inputs are other than quoted prices included in level 1 that are observable for the asset or liability through corroboration with market data at the measurement date.
- Level 3: Inputs are unobservable and reflect management's best estimate of what market participants would use in pricing the asset or liability at the measurement date.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

Fair value of actively traded fixed-income and equity securities is based on quoted market prices. Fair value of inactively traded fixed-income securities is based on quoted market prices of identical or similar securities based on observable inputs like interest rates using a market valuation approach is generally classified as Level 2. Investments measured based on the practical expedient being net asset value (NAV), based on the NAV of the fund as provided for in the audited financial statements and other fund reporting, are generally classified as Level 3.
