NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying statutory-basis financial statements of Progressive Max Insurance Company (the "Company") were prepared on the basis of accounting practices prescribed or permitted by the Ohio Department of Insurance ("DOI").

The DOI requires insurance companies domiciled in the state of Ohio to prepare their statutory-basis financial statements in accordance with the National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") subject to any deviations prescribed or permitted by the DOI. Since Florida insurance reform was enacted in early 2023, the Progressive Group of Insurance Companies (the "Group") has experienced lower loss costs on certain types of personal auto accident claims and favorable reserve development, resulting in strong profitability in its Florida personal auto business. Consequently, it is probable that the Group's personal auto profit, in Florida, for the 2023 to 2025 period will exceed the statutory profit limit that a Florida statute imposes on the profit that any insurance group can earn on personal auto insurance over any three-calendar-year period. In such event, the Group would need to credit any profit above the limit to all Florida personal auto policyholders active at December 31, 2025. Effective for the third quarter 2025 reporting period, the Ohio Department of Insurance granted approval for the use of a permitted accounting practice. This approval allows for certain policyholder credits to Florida personal auto policyholders to be classified as an underwriting expense. NAIC SAP does not explicitly address the accounting treatment for these types of credits to policyholders. The approval of this permitted accounting practice extends from the recording of the initial estimated liability until the time of payment.

As of September 30, 2025, the Company reported \$27,746,840 in policyholder credit expense, net of intercompany pooling, which represents the Company's share of the current estimate of the profit the Group will earn on the three-calendar-year period ending December 31, 2025, in excess of the permitted profit limit. In accordance with the permission granted by the Ohio Department of Insurance, the Company has included this policyholder credit expense in Other underwriting expenses incurred (Page 4, Line 4).

The table below illustrates that there were no deviations from NAIC SAP, and that the permitted practice described above has no net impact on either Net Income or Surplus.

B. Use of Estimates in the Preparation of the Financial Statements

The Company is required to make estimates and assumptions when preparing its financial statements and accompanying notes in conformity with NAIC SAP. Actual results may differ from those estimates. Material estimates that are susceptible to significant changes in the near term include the loss and loss adjustment expense ("LAE") reserves.

C. Accounting Policy

Premiums, Acquisition Costs, and Nonadmitted Assets:

Insurance premiums written are being earned into income on a pro rata basis over the period of risk based on a daily earnings convention. Unearned premiums are established to cover the unexpired portion of premiums written. The Company offers a variety of payment plans to meet individual customer needs. Generally, insurance premiums are collected in advance of providing risk coverage, minimizing the Company's exposure to credit risk.

Acquisition costs, such as agents' commissions, premium taxes, and other policy initiation costs, as well as advertising costs, are charged to operations as incurred.

Certain assets designated as "nonadmitted assets," in accordance with Statement of Statutory Accounting Principles ("SSAP") No. 4, Assets and Nonadmitted Assets, are reported on page 2 - Assets in column 2. The change in nonadmitted assets is charged directly against surplus as regards policyholders on page 4, Statement of Income, Capital and Surplus section.

Investment Policies:

(1) Cash, Cash Equivalents, and Short-term Investments

Cash and cash equivalents can include bank accounts, securities with original maturities of three months or less, and securities acquired with remaining maturities of three months or less that are reported at amortized cost, which approximates fair market value. Cash and cash equivalents also include money market mutual funds valued at fair value or net asset value (NAV) as a practical expedient.

Short-term investments include securities acquired within one year of maturity, excluding those with maturities of three months or less (see cash and cash equivalents above) and are reported at amortized cost which approximates fair market value.

(2) Bonds

Investment-grade bond valuations are based on NAIC designations or NAIC Credit Rating Provider ("CRP") designations and are reported at amortized cost using the scientific method, which closely approximates the effective interest method. Non-investment-grade bond valuations are also based on NAIC designations or NAIC CRP designations and are reported at the lower of amortized cost or fair market value ("LCM"). Changes in LCM are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes. Asset-backed securities follow the guidance prescribed by SSAP No. 43, Asset-Backed Securities ("SSAP No. 43"), for the determination of the bond valuation and reporting designation. The difference between the original cost and redemption value of these securities is recognized over the lives of the respective issues and included in net investment gain.

(3) Common Stocks

Common stocks, other than investments in stocks of subsidiaries and affiliates, are reported at fair market value based on active market closing quotations from a regulated exchange. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

NOTES TO FINANCIAL STATEMENTS

(4) Preferred Stocks

Nonredeemable preferred stocks are reported at fair market value and are not to exceed currently effective call price. Changes in the fair market value of these securities are reflected directly as unrealized gains or losses in statutory surplus, net of deferred income taxes.

(5) Mortgage Loans

Not applicable

(6) Asset-backed Securities

Asset-backed securities are accounted for as prescribed by SSAP No. 43. These securities are generally stated at amortized cost as determined by the estimated value of future cash flows. Interest income for asset-backed securities is included in net investment gain based on estimated cash flows, including expected changes in interest rates and estimated prepayments of principal. Prepayment assumptions are reviewed and updated quarterly, and effective yields are recalculated when differences arise between the prepayments originally estimated, and the actual prepayments received and currently estimated. For asset-backed securities of high credit quality, the effective yield is recalculated on a retrospective basis to the inception of the investment holding period, and applies the required adjustment, if any, to the cost basis, with the offset recorded to net investment gain. For those securities below high credit quality, interest-only securities, and certain asset-backed securities where there is a greater risk of non-performance, the effective yield is recalculated on a prospective basis for future period adjustments, resulting in no current period impact (see Note 5.D).

Fair Market Values, Realized Gains and Losses, and Other-Than-Temporary Impairment:

The fair market values reported are derived from independent and observable market input evaluations provided by reputable pricing services, independent broker/dealer bid lists, independent broker/dealer quotations, independent broker/dealer pricing services, or active market closing quotations from a regulated exchange. The approved methods for computation of fair market value are prescribed in the Purposes and Procedures Manual of the NAIC Investment Analysis Office.

Determining the fair value of the investment portfolio is the responsibility of the Company's management. As part of the responsibility, Management evaluates whether a market is distressed or inactive in determining the fair value for the Company's portfolio. Management reviews certain market level inputs to evaluate whether sufficient activity, volume, and new issuances exist to create an active market.

Realized gains and losses on sales of securities are computed based on the first-in, first-out method.

The Company's management routinely monitors individual securities in its investment portfolio for pricing changes that might indicate potential impairments and performs detailed reviews of securities with unrealized losses based on predetermined guidelines to determine whether a decline in the value of a security is other-than-temporary. A review for other-than-temporary impairment ("OTTI") requires making certain judgments regarding the materiality of the decline, its effect on the financial statements, the probability, extent, and timing of a valuation recovery, and the Company's ability and intent to hold the security. The scope of this review is broad and requires a forward-looking assessment of the fundamental characteristics of a security, as well as the market-related prospects of the issuer and its industry.

Management assesses valuation declines to determine the extent to which such changes are attributable to (i) fundamental factors specific to the issuer, such as financial conditions, business prospects or other factors, or (ii) market-related factors such as interest rates or equity market declines (i.e., negative returns at either a sector index level or the broader market level), or (iii) credit-related losses where the present value of cash flows expected to be collected are lower than the amortized cost basis of the security (includes only those securities covered under SSAP No. 43). This evaluation reflects Management's assessment of current conditions, as well as predictions of uncertain future events that may have a material effect on the financial statements related to security valuation.

Asset-backed securities are analyzed for impairment under SSAP No. 43. An initial review is performed to determine whether it is likely the Company would be required, or intends, to sell any securities prior to the recovery of their respective cost bases (which could be maturity), and if so, the Company writes down the security to its current fair market value with the entire amount of the write-down recorded as a realized loss. For those securities the Company determines it is not likely, or does not intend, to sell prior to a potential recovery, additional analysis is performed to determine if any of the decline in value is due to a credit loss (i.e., where the present value of cash flows expected to be collected is lower than the amortized cost basis of the security) and, if so, the Company recognizes that portion of the impairment as a realized loss.

When persuasive evidence exists that causes Management to conclude that a decline in fair value is other-than-temporary, the book value of such security is written down and recognized as a realized loss. All other unrealized gains or losses are reflected in statutory surplus.

Loss, LAE, and Premium Deficiency Reserves:

Loss reserves represent the estimated liability on claims reported to the Company, plus reserves for losses incurred but not yet reported ("IBNR"). These estimates are reported net of amounts recoverable from salvage and subrogation. LAE reserves represent the estimated expenses required to settle reported claims and IBNR losses. Such loss and LAE reserves could be susceptible to significant change in the near term. The Company reviews a large majority of its reserves by product/state subset combinations on a quarterly time frame, with the remaining reserves generally reviewed on a semiannual basis. A change in the Company's scheduled reviews of a particular subset of the business depends on the size of the subset or emerging issues relating to the product or state (see Note 25).

The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.

Capitalization of Assets:

The Company has written capitalization policies for its various asset classes. The capitalization policy thresholds have not materially changed from the prior year.

NOTE 20 Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured at Fair Value

(1) Fair Value Measurements by Levels 1, 2, and 3

The Company categorizes its financial instruments, based on the degree of subjectivity inherent in the method by which they are valued, into a fair value hierarchy of three levels, as follows:

Level 1 - Inputs are unadjusted, quoted prices in active markets for identical instruments at the measurement date (e.g., U.S. government obligations, which are continually priced on a daily basis, active exchange-traded equity securities, and certain short-term securities).

Level 2 - Inputs (other than quoted prices included within Level 1) that are observable for the instrument either directly or indirectly. This includes: (i) quoted prices for similar instruments in active markets, (ii) quoted prices for identical or similar instruments in markets that are not active, (iii) inputs other than quoted prices that are observable for the instruments, and (iv) inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 - Inputs that are unobservable. Unobservable inputs reflect the Company's subjective evaluation about the assumptions market participants would use in pricing the financial instrument.

See Note 1.C for further information regarding methods used to determine fair market value.

Fair Value Measurements at Reporting Date:

Description for each class of asset or liability	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Total
a. Assets at fair value					
Issuer Credit Obligations	\$ -	\$ 1,533,469	\$ -	\$ -	\$ 1,533,469
