C. Accounting Policy

The Company uses the following accounting policies:

(2) Basis for Bonds and Amortization Schedule

Bonds with a NAIC rating 1 or 2 are stated at amortized cost using the interest method; all others are stated at the lower of amortized cost or fair value. Mandatory convertible bonds are stated at the lower of book value or fair value, regardless of the NAIC designation. The Company does not own any SVO Identified Exchange Traded Funds.

(4) Basis for Preferred Stocks

Redeemable preferred stocks rated 1 and 2 are stated at amortized cost; perpetual preferred stocks rated 1 and 2 are stated at fair value; all others are stated at the lower of cost, amortized cost, or fair value.

(6) Basis for Asset-Backed Securities and Adjustment Methodology

For residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS") and all other asset-backed securities, the NAIC has retained a third-party investment management firm to assist in the determination of the appropriate NAIC designations and Book Adjusted Carrying Values based on not only the probability of loss, but also the severity of loss. Those RMBS, CMBS and all other asset-backed securities that are not modeled but receive a current year NAIC Credit Rating Provider ("CRP") rating equal to NAIC 1 and 2 are stated at amortized cost and NAIC 3-6 are stated at the lower of amortized cost or fair value.

(8) Accounting Policies for Investments in Joint Ventures, Partnerships and Limited Liability Entities

Residual tranches use the practical expedient and are stated at amortized cost.

D. Asset-Backed Securities

The Company had no asset-backed securities with a recognized OTTI due to either the intent to sell or lack of intent to hold to recovery during the current year.

(3) Policies when transfers between levels are recognized:

The Company recognizes and records the transfer of securities into and out of Level 3 due to changes in availability of market observable inputs. All transfers are reflected in the table above at fair value as of the end of the reporting period.

(4) Description of Valuation Techniques and Inputs Used in Fair Value Measurement

The Company categorizes its financial instruments based on the degree of subjectivity inherent in the method by which they are valued into a fair value hierarchy of three levels as follows:

Level 1 - Quoted prices for identical assets or liabilities in active markets (markets in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis). The Company's Level 1 financial instruments consist primarily of publicly traded equity securities and highly liquid government bonds for which quoted market prices in active markets are available.

Level 2 - Quoted prices for similar instruments in active markets; quoted prices for identical or similar assets or liabilities in inactive markets (markets in which there are few transactions, the prices are not current, price quotations vary substantially over time or among market makers, or in which little information is released publicly); and valuations based on other significant inputs that are observable in active markets. The Company's Level 2 financial instruments include corporate and municipal fixed maturity securities, asset-backed securities, and non-affiliated common stocks priced using observable inputs. Level 2 inputs include benchmark yields, reported trades, corroborated broker/dealer quotes, issuer spreads, and benchmark securities. When non-binding broker quotes can be corroborated by comparison to similar securities priced using observable inputs, they are classified as Level 2.

Level 3 - Valuations derived from market valuation techniques generally consistent with those used to estimate fair value of Level 2 financial instruments in which one or more significant inputs are unobservable or when the market for a security exhibits significantly less liquidity relative to markets supporting Level 2 fair value measurements. The unobservable inputs may include management's own assumptions about the assumptions market participants would use based on the best information available at the valuation date. The Company's Level 3 is comprised of financial instruments whose fair value is estimated based on non-binding broker quotes or internally developed using significant inputs not based on, or corroborated by, observable market information.

The Company's investment manager, American Money Management Corporation ("AMMC"), is responsible for the valuation process and uses data from outside sources (including nationally-recognized pricing services and brokers/dealers) in establishing fair value. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by AMMC's internal investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, these investment managers consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions, and the credit quality of the specific issuers. In addition, AMMC communicates directly with the pricing service regarding the methods and assumptions used in pricing, including verifying, on a test basis, the inputs used by the service to value specific securities.

(5) Fair Value Disclosures

Not applicable

B. Fair Value Reporting under SSAP 100 and Other Accounting Pronouncements

The Company has no additional fair value disclosures.

C. Fair Value Level

The table below reflects the fair value and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries, joint ventures, partnerships, and limited liability corporations). The fair values are also categorized into the three-level fair value hierarchy as described above in Note 20A.
